**The American Steel Industry** Luc Kiers, 2019-07-16 What is the cause of the American steel industry's deplorable situation today Troubled in many areas competition from imports technology implementation cost and utilization of raw materials investment policy philosophy of management and union attitudes to name only a few can the industry survive These are the questions Dr Kiers confronts in this book Unless answers can be found he warns the result will be further decline and finally bankruptcy or nationalization Unwilling to accept either possibility Dr Kiers challenges the steel industry to achieve a rebirth he sees as feasible only through a hard nosed realistic approach an insistence on innovation and a willingness to apply discipline to every facet of steel making Dr Kiers presents an in depth analysis of Japan's steel industry compares it with the U S industry and discusses U S technology and import problems with reference to Japan He then inventories the factors responsible for the current problems and lays the groundwork for a new start going on to point out that the difficulties faced by the steel industry may be a portent of what will happen to other industries unless they too reassess both labor and management attitudes and make radical changes The U.S. Primary Iron and Steel Industry Since 1958 ,1985

The Politics of Steel Yves Meny, Vincent Wright, Martin Rhodes, 2012-02-14 No detailed description available for The Politics of Steel *Politics vs Economics in World Steel Trade* Kent Jones, 2017-10-10 There can be few industries which have generated as much political controversy as the world steel industry Since 1968 the trade policies of both the US and the EEC have created a vicious circle of protectionism and delayed adjustment in their steel industries In particular protectionist policies by one government have tended to lead directly to rebound protectionist policies by the other This book first published in 1986 begins by tracing the historical roots of steel protectionism and describes the changing competitive structure of the world steel market which has led to increased government involvement in the traditional steel making countries as they became vulnerable to imports from the newly industrialised countries The most distinctive feature of the book is its economic analysis of a policy crisis a crisis whose inner dynamics work against a viable solution **How Japan**

Smith,2002 While some may dispute that economics is the driving force behind much of history nobody can argue that trade is not a significant factor in international relations In an increasingly globalised world products are perpetually crossing borders leading to both political and fiscal conflicts Businesses have to face diverse markets and regions while worrying about protectionist government initiatives that hamper free trade Even the ostensible champion of free markets America has its own streak of inhibiting the flow of goods witness the recent steel tariffs which have angered European partners No society therefore is immune to the pressures of world trade and the need to balance the free movement of products with the desire to preserve domestic industries This book assembles a collection of articles examining some of the most current and divisive issues in the international trade arena They range from the tensions between the United States and Mexico in NAFTA to the war fuelled trade in diamonds in Africa With such a broad range of issues discussed this book serves as a needed tool for understanding the most important contemporary economic subjects
