*Archaeological Encounters* Margarita Díaz-Andreu, 2012-11-13 This book examines the relationship between British and Spanish archaeology in the light of international geographies of knowledge. It looks at the practical aspects of the personal relationships established between British and Spanish prehistoric archaeologists from the 1920s to the 1970s. Part I of the book sets the scene. It provides some contextual information on the main events in the archaeology of both countries in the period under study. It also introduces Professor Luis Pericot, the archaeologist whose archive serves as the basis for much of what is discussed throughout the following chapters. In Part II of the book, an analysis of the correspondence held in the Pericot Archive, the Fons Pericot in the Biblioteca de Catalunya, is undertaken. The examination of the letters exchanged between Spanish and British prehistorians in general and in particular between Luis Pericot and about a dozen major British scholars of his time allows the reconstruction of the nature of the relationships formed between them. The analysis has been divided into three chapters corresponding to the three main towns where his correspondents lived for most of their academic careers: London, Cambridge, and Oxford. In Part III of the book, the information obtained from the correspondence is then complemented and re-examined considering three main aspects: the production, transmission, and reception of knowledge. This analysis puts together aspects discussed in Part I of the book with the data gathered from the letters in Part II, as well as other information provided by publications, including translations and reviews. First of all, an assessment is made as to whether the geographical context affected the way knowledge of prehistoric archaeology was produced. Secondly, the mechanisms and networks that allowed the international transmission of both ideas and practices linked to prehistoric archaeology are assessed. A third aspect looked into is the reception of knowledge, linking this with issues such as academic prestige and authority.

**The Etruscan World** Jean MacIntosh Turfa, 2014-11-13 The Etruscans can be shown to have made significant and in some cases perhaps the first technical advances in the central and northern Mediterranean. To the Etruscan people, we can attribute such developments as the tie beam truss in large wooden structures, surveying and engineering, drainage, and water tunnels; the development of the foresail for fast long distance sailing vessels; fine techniques of metal production and other pyrotechnology; post mortem CT sections in medicine; and more. In art, many technical and iconographic developments, although they certainly happened first in Greece or the Near East, are first seen in extant Etruscan works preserved in the lavish tombs and goods of Etruscan aristocrats. These include early portraiture, the first full length painted portrait, the first perspective view of a human figure in monumental art, specialized techniques of bronze casting, and reduction fired pottery, the bucchero phenomenon. Etruscan contacts through trade, treaty, and intermarriage linked their culture with Sardinia, Corsica, and Sicily with the Italic tribes of the peninsula, and with the Near Eastern kingdoms, Greece, and the Greek colonial world, Iberia, Gaul, and the Punic network of North Africa, and influenced the cultures of northern Europe. In the past fifteen years, striking advances have been made in scholarship and research techniques for Etruscan Studies. Archaeological and scientific discoveries have changed our picture of the Etruscans and furnished us with

new specialized information Thanks to the work of dozens of international scholars it is now possible to discuss topics of interest that could never before be researched such as Etruscan mining and metallurgy textile production foods and agriculture In this volume over 60 experts provide insights into all these aspects of Etruscan culture and more with many contributions available in English for the first time to allow the reader access to research that may not otherwise be available to them Lavishly illustrated The Etruscan World brings to life the culture and material past of the Etruscans and highlights key points of development in research making it essential reading for researchers academics and students of this fascinating civilization
