The Anatomy School:

The Anatomy School Bernard MacLaverty, 2003-07-17 A coming of age story of a northern Irish boy getting out from under the thumb of mother church and country Set in Belfast in the late sixties Bernard MacLaverty's new novel takes us into Martin Brennan's last semester of high school when he finds old friendships tested and is forced to face the unknown Before he can become an adult Martin must unravel the sacred and contradictory mysteries of religion science and sex he must learn the value of friendship but most of all he must pass his exams at any cost Celebrating the desire to speak and the need to say nothing The Anatomy School moves from the enforced silence of Martin's Catholic school retreat through the hilarious tea and biscuits repartee of his eccentric elders to the awkward wit and loose profanity of his two friends the charismatic Kavanagh and the subversive Blaise Foley

The Dodo and the Solitaire Jolyon C. Parish, 2012-12-03 This account of two extinct bird species offers an amazing amount of history references facts maps and illustrations Library Journal The Dodo and the Solitaire is the most comprehensive book to date about these two famously extinct birds It contains all the known contemporary accounts and illustrations of the dodo and solitaire covering their history after extinction and discussing their ecology classification phylogenetic placement and evolution Both birds were large and flightless and lived on inhabited islands some five hundred miles east of Madagascar The first recorded descriptions of the dodo were provided by Dutch sailors who encountered them in 1598 and within a century the dodo was extinct So quickly did the bird disappear that there is insufficient evidence to form an entirely accurate picture of its appearance and ecology and the absence has led to much speculation This extraordinary book pieces together the story of these two lost species from the fragments that have been left behind An up to date and comprehensive review of everything we know about the dodo and solitaire Journal of Vertebrate Paleontology

Bodysnatchers Suzie Lennox, 2016-09-30 The grim history of England's bodysnatching trade Lennox's thorough exploration is riveting Naomi Clifford author of The Disappearance of Maria Glenn From the string of murders committed by Burke and Hare a pair of ghouls who are still the stuff of pop culture legend to the lesser known but equally gruesome grave robbing exploits of Henry Gillies William Patrick and Joseph Grainger here is the fascinating true chronicle of England's Resurrection Men During the winter months of 1742-1832 selling fresh cadavers to anatomists up and down the country all in aid of medical advancement was the surest way to earn a living for desperate men After all anatomy schools would pay high prices for corpses to dissect the fresher the better And they asked no questions as to their origins This resulted in the criminal underworld of the Sack 'em up Men who left behind disinterred churchyards and burial grounds and spread fear and horror throughout the United Kingdom In Bodysnatchers Suzie Lennox unearths the truth behind the macabre tales separating fact from folktale and setting the record straight about Britain's gruesome often forgotten history

The Dublin University Calendar Trinity College (Dublin, Ireland), 1867 **With Words and Knives** Lynda Payne, 2016-02-11 The practice of medicine in the days before the development of anaesthetics could often be a brutal and

painful experience Many procedures especially those involving surgery must have proved almost as distressing to the doctor as to the patient Yet in order to cure the medical practitioner was often required to inflict pain and the patient to endure it Some level of detachment has always been required of the doctor and especially of the surgeon It is the construction of this detachment or dispassion in early modern England with which this work is concerned The book explores the idea of medical dispassion and shows how practitioners developed the intellectual verbal and manual skill of being able to replace passion with equanimity and distance As the skill of dispassion became more widespread it was both enthusiastically promoted and vehemently attacked by scientific and literary writers throughout the early modern period To explain why the practice was so controversial and aroused such furor this study takes into account not only patterns of medical education and clinical practice but wider debates concerning social philosophical and religious ideas

Science in the Enlightenment William E. Burns, 2003-11-17 The first introductory A Z resource on the dynamic achievements in science from the late 1600s to 1820 including the great minds behind the developments and science s new cultural role Though the Enlightenment was a time of amazing scientific change science is an often neglected facet of that time Now Science in the Enlightenment redresses the balance by covering all the major scientific developments in the period between Newton s discoveries in the late 1600s to the early 1800s of Michael Faraday and Georges Cuvier Over 200 A Z entries explore a range of disciplines including astronomy and medicine scientists such as Sir Humphry Davy and Benjamin Franklin and instruments such as the telescope and calorimeter Emphasis is placed on the role of women and proper attention is given to the shifts in the worldview brought about by Newtonian physics Antoine Laurent Lavoisier s chemical revolution and universal systems of botanical and zoological classification Moreover the social impact of science is explored as well as the ways in which the work of scientists influenced the thinking of philosophers such as Voltaire and Denis Diderot and the writers and artists of the romantic movement

Dissection in Enlightenment England and Beyond Piers Mitchell, 2016-04-15 Excavations of medical school and workhouse cemeteries undertaken in Britain in the last decade have unearthed fascinating new evidence for the way that bodies were dissected or autopsied in the eighteenth and nineteenth centuries This book brings together the latest discoveries by these biological anthropologists alongside experts in the early history of pathology museums in British medical schools and the Royal College of Surgeons of England and medical historians studying the social context of dissection and autopsy in the Georgian and Victorian periods Together they reveal a previously unknown view of the practice of anatomical dissection and the role of museums in this period in parallel with the attitudes of the general population to the study of human anatomy in the Enlightenment The Body Emblazoned Jonathan Sawday, 2013-10-16 An outstanding piece of scholarship and a fascinating read The Body Emblazoned is a compelling study of the culture of dissection the English Renaissance which

informed intellectual enquiry in Europe for nearly two hundred years In this outstanding work Jonathan Sawday explores the dark morbid eroticism of the Renaissance anatomy theatre and relates it to not only the great monuments of Renaissance art but to the very foundation of the modern idea of knowledge Though the dazzling displays of the exterior of the body in Renaissance literature and art have long been a subject of enquiry *The Body Emblazoned* considers the interior of the body and what it meant to men and women in early modern culture A richly interdisciplinary work *The Body Emblazoned* reassesses modern understanding of the literature and culture of the Renaissance and its conceptualization of the body within the domains of the medical and moral the cultural and political

Chemistry at Oxford R J P Williams, John S

Rowlinson, Allan Chapman, 2008-11-06 This fascinating and unique history reveals the major influence of the Oxford Chemistry School on the advancement of chemistry It shows how the nature of the University and individuals within it have shaped the school and made great achievements both in teaching and research The book will appeal to those interested in the history of science and education the city of Oxford and chemistry in general Chemistry has been studied in Oxford for centuries but this book focuses on the last 400 years and in particular the seminal work of Robert Boyle Robert Hooke and the proto Royal Society of the 1650 s Arranged in chronological fashion it includes specialist studies of particular areas of innovation The book shows that chemistry has advanced not just as a consequence of research but because of the idiosyncratic nature of the collegiate system and the characters of the individuals involved In other words it demonstrates that science is a human endeavour and its advance in any institution is conditioned by the organization and people within it For chemists the main appeal will be the book s examination of the way separate branches of chemistry organic physical inorganic and biological have evolved in Oxford It also enables comparison with the development of the subject at other universities such as Cambridge London and Manchester For historians and sociologists the book reveals the motivations of both scientists and non scientists in the management of the School It exposes the unusual character of Oxford University and the tensions between science and administration The desire of the college to retain its academic values in the face of external and financial pressures is emphasized

, 1896 **Early Science in Oxford** Robert Theodore Gunther, 1923 Aaron Klug - A Long Way from Durban Kenneth C.

Holmes, 2017-02-09 The atomic structures of macromolecules provide the key to understanding how life works Aaron Klug led the way in the development of methods for solving such structures and is one of the pioneers of structural molecular biology He was awarded a Nobel Prize in 1982 for his work Illuminating both his personal life and scientific achievements this unique biography begins with Klug s youth in Durban and his studies at Johannesburg Cape Town and then Trinity College Cambridge Holmes proceeds to explore Klug s career from his work on the structure of viruses with Rosalind Franklin at Birkbeck College London to his time as Director of the MRC Laboratory of Molecular Biology LMB in Cambridge and as President of the Royal Society Drawing on their long term collaboration interviews and unique access to Klug s archives

Holmes provides a fascinating account of an innovative man and his place in the history of structural molecular biology

The Dark Side of Oxford Marilyn Yurdan, 2019-04-30 Marilyn Yurdan was born in Oxford the idea for the book came from her research where she quickly learned that the idyllic City of Dreaming Spires is very far from an accurate view of life in Oxford over the ages *The Dark Side of Oxford* ranges from the 13th century to late Victorian times and paints a fascinating and sometimes shocking picture of how our ancestors lived and died

The Home Office, 1848-1914, from Clerks to Bureaucrats Jill Pellew, 1982 Examines the changing social and educational backgrounds functions of the British civil servant especially after the reforms following the Northcote Trevelyan report Considers the structure of the department and the Home Office's alleged failure to effectively respond to contemporary social and political needs
