Dawe,1969 **What Did the Biblical Writers Know and When Did They Know It?** William G. Dever,2001-05-10 For centuries the Hebrew Bible has been the fountainhead of the Judeo Christian tradition Today however the entire biblical tradition including its historical veracity is being challenged Leading this assault is a group of scholars described as the minimalist or revisionist school of biblical studies which charges that the Hebrew Bible is largely pious fiction that its writers

and editors invented ancient Israel as a piece of late Jewish propaganda in the Hellenistic era In this fascinating book noted Syro Palestinian archaeologist William G Dever attacks the minimalist position head on showing how modern archaeology brilliantly illuminates both life in ancient Palestine and the sacred scriptures as we have them today Assembling a wealth of archaeological evidence Dever builds the clearest most complete picture yet of the real Israel that existed during the Iron Age of ancient Palestine 1200 600 B C Dever s exceptional reconstruction of this key period points up the minimalists abuse of archaeology and reveals the weakness of their revisionist histories Dever shows that ancient Israel far from being an invention is a reality to be discovered Equally important his recovery of a reliable core history of ancient Israel provides a firm foundation from which to appreciate the aesthetic value and lofty moral aspirations of the Hebrew Bible *Black Athena Revisited* Mary R. Hilber, 2020-04-03 In order to reconcile the discrepancies between ancient and modern cosmology confessional scholars from every viewpoint on the interpretation of the early chapters of Genesis agree that God accommodated language to finite human understanding But in the history of interpretation no consensus has emerged regarding what accommodation entails at the linguistic level More precise consideration of how the ancient cognitive environment functions in the informative intention of the divine and human authors is necessary Not only does relevance theory validate interpretative options that are inherently most probable within the primary communication situation but the application of relevance theory can also help disentangle the complexities of dual authorship inherent in any model of accommodation The results also make a salutary contribution to the theological reading of Scripture Reimagining at the Sources James Atwell, 2024-03-21 Re imagining at the Sources offers the fruits of a lifetime s reflection on the Bible and its role within the Christian faith from a respected scholar and priest Atwell lays out the history of Israel and the biblical roots of Christian faith from the origins of Israel s religious traditions to Jesus of Nazareth This book explores the sources of faith and analyses the complex faith journey that has taken place as Israel s religious traditions have developed The book provides a single coherent account which joins up the period covered by Israel s early religious traditions with that of Second Temple Judaism and the world of Jesus of Nazareth A distinctive feature of the volume is its focus on apocalyptic literature **Politics and culture in international history** Adda BrÄ¼mmer Bozeman, **Studies in Culture Contact** James G. Cusick, 2015-03-05 People have long been fascinated about times in human history when different cultures and societies first came into contact with each other how they reacted to that contact and why it sometimes occurred peacefully and at other times was violent or catastrophic *Studies in Culture Contact Interaction Culture Change and Archaeology* edited by James G Cusick seeks to define the role of culture contact in human history to identify issues in the study of culture contact in archaeology and to provide a critical overview of the major theoretical approaches to the study of culture and contact In this collection of essays anthropologists and archaeologists working in Europe and the Americas consider three forms of culture contact colonization cultural entanglement and symmetrical exchange Part I provides a critical overview of theoretical approaches to the study of culture contact offering assessments of older concepts in anthropology such as acculturation as well as more recently formed concepts including world systems and center periphery models of contact Part II contains eleven case studies of specific contact situations and their relationships to the archaeological record with times and places as varied as pre and post Hispanic Mexico Iron Age France Jamaican sugar plantations European provinces in the Roman Empire and the missions of Spanish Florida *Studies in*

El-Hi Textbooks in Print ,1979      *Culture and Ideology under the Seleukids* Eva Anagnostou-Laoutides,Stefan Pfeiffer,2022-01-19 The volume offers a timely re appraisal of Seleukid cultural dynamics While the engagement of Seleukid kings with local populations and the issue of Hellenization are still debated a movement away from the Greco centric approach to the study of the sources has gained pace Increasingly textual sources are read alongside archaeological and numismatic evidence and relevant near eastern records are consulted Our study of Seleukid kingship adheres to two game changing principles 1 We are not interested in judging the Seleukids as strong or weak whether in their interactions with other Hellenistic kingdoms or with the populations they ruled 2 While appreciating the value of the social imaginaries approach Stavrianopoulou 2013 we argue that the use of ethnic identity in antiquity remains problematic Through a pluralistic approach in line with the complex cultural considerations that informed Seleukid royal agendas we examine the concept of kingship and its gender aspects tensions between centre and periphery the level of acculturation intended and achieved under the Seleukids the Seleukid Ptolemaic interrelations As rulers of a multi cultural empire the Seleukids were deeply aware of cultural politics      **National Culture and the New Global System** Frederick Buell,1994-09 The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In National Culture and the New Global System he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order      **Syria-Palestine in The Late Bronze Age** Emanuel Pfoh,2016-02-22 Syria Palestine in the Late Bronze Age presents an explicitly anthropological perspective on

politics and social relationships An anthropological reading of the textual and epigraphic remains of the time allows us to see how power was constructed and political subordination was practised and expressed Syria Palestine in the Late Bronze Age identifies a particular political ontology native to ancient Syro Palestinian societies which informs and constitutes their social worlds This political ontology based on patronage relationships provides a way of understanding the political culture and the social dynamics of ancient Levantine peoples It also illuminates the historical processes taking place in the region processes based on patrimonial social structures and articulated through patron client bonds
