Encyclopedia of Greece and the Hellenic Tradition Graham Speake, 2021-01-31 Hellenism is the living culture of the Greek-speaking peoples and has a continuing history of more than 3,500 years. The Encyclopedia of Greece and the Hellenic Tradition contains approximately 900 entries devoted to people, places, periods, events, and themes, examining every aspect of that culture from the Bronze Age to the present day. The focus throughout is on the Greeks themselves and the continuities within their own cultural tradition. Language and religion are perhaps the most obvious vehicles of continuity, but there have been many others: law, taxation, gardens, music, magic, education, shipping, and countless other elements have all played their part in maintaining this unique culture. Today, Greek arts have blossomed again; Greece has taken its place in the European Union; Greeks control a substantial proportion of the world's merchant marine; and Greek communities in the United States, Australia, and South Africa have carried the Hellenic tradition throughout the world. This is the first reference work to embrace all aspects of that tradition in every period of its existence.

Conversing with Chaos in Graeco-Roman Antiquity Esther Eidinow, Christopher Schliephake, 2024-11-14 How did ancient Greeks and Romans perceive their environments? Did they see order or chaos, chance or control? And how do their views compare to modern perceptions? *Conversing with Chaos in Graeco-Roman Antiquity* challenges prevailing ideas that ancient perceptions of the non-human world rested on a profound belief in universal order and that the cosmos was harmonious and under human control. Engaging with the concept of chaos in both its ancient and modern meanings and focusing on the ancient Mediterranean and Near East, this book reveals another sense of environmental awareness, one that paid equal attention to chance and chaos and the sometimes fatal consequences of human interventions in nature. Bringing together a team of international scholars, the volume investigates the experience of the interaction of humans with the environment as reflected in ancient evidence from myths and philosophical treatises to epigraphic evidence and archaeological remains. The contributors consider the role of the human in the formation of perspectives about the natural world and explore themes of agency, affordances, ecophobia, gender, and temporality. Overall, the volume reveals how in ancient imaginations, environments were perceived as living entities with their own agency and respondent or even vulnerable to human actions and decision making. It highlights how modern insights can enrich our understanding of the past and demonstrates the increasing relevance of ancient historical research for reflecting on current relations to the natural

Ancient Western Asia Beyond the Paradigm of Collapse and Regeneration (1200-900 BCE) Maria Grazia Masetti-Rouault, Ilaria Calini, Robert

Hawley, Lorenzo d'Alfonso, 2024-05-07 New results and interpretations challenging the notion of a uniform macroregional collapse throughout the Late Bronze Age Eastern Mediterranean Ancient Western Asia Beyond the Paradigm of Collapse and Regeneration 1200 900 BCE presents select essays originating in a two year research collaboration between New York University and Paris Sciences et Lettres The contributions here offer new results and interpretations of the processes and outcomes of the transition from the Late Bronze Age to the Iron Age in three broad regions Anatolia northern Mesopotamia and the Levant Together these challenge the notion of a uniform macroregional collapse throughout the Eastern Mediterranean followed by the regeneration of political powers Current research on newly discovered or reinterpreted textual and material evidence from Western Asia instead suggests that this transition was characterized by a diversity of local responses emerging from diverse environmental settings and culture complexes as evident in the case studies collected here in history archaeology and art history The editors avoid particularism by adopting a regional organization with the aim of identifying and tracing similar processes and outcomes emerging locally across the three regions Ultimately this volume reimagines the Late Bronze Iron Age transition as the emergence of a set of recursive processes and outcomes nested firmly in the local cultural interactions of western Asia before the beginning of the new unifying era of Assyrian imperialism
