Shipping the Medieval Military Craig L. Lambert, 2011 Mariners made a major but neglected contribution to England's warfare in the middle ages Here their role is examined anew showing their importance During the fourteenth century England was scarred by famine plague and warfare Through such disasters however emerged great feats of human endurance Not only did the English population recover from starvation and disease but thousands of the kingdom's subjects went on to defeat the Scots and the French in several notable battles Victories such as Halidon Hill Neville's Cross Cr cy and Poitiers not only helped to recover the pride of the English chivalrous class but also secured the reputation of Edward III and the Black Prince Yet what has been underemphasized in this historical narrative is the role played by men of more humble origins none more so than the medieval mariner This is unfortunate because during the fourteenth century the manpower and ships provided by the English merchant fleet underpinned every military expedition The aim of this book is to address this gap Its fresh approach to the sources allows the enormous contribution of the English merchant fleet to the wars conducted by Edward II and Edward III to be revealed the author also explores the complex administrative process of raising a fleet and provides career profiles for many mariners examining the familial relationships that existed in port communities and the shipping resources of English ports Craig L. Lambert is Research Assistant at the University of Hull

Knights and Warhorses Andrew Ayton, 1999 Dr Ayton has transformed understanding of Edward III's armies compulsory reading for anyone interested in the Hundred Years War WAR IN HISTORY Michael Prestwich The mounted armoured knight is one of the most potent symbols of medieval civilisation indeed for much of the middle ages the armoured warhorse was what defined a man as a member of the military class However despite the status of the knightly warrior in medieval society the military service of the later medieval English aristocracy remains an unaccountably neglected subject and the warhorse itself has never attracted a major study based upon archival sources This book seeks to open up new fields of research it focuses on the horse inventories documents which offer detailed lists of men at arms and their appraised warhorses the valuation of which is a measure of its owner's social and military status Dr Ayton is primarily concerned with the inventories and related records for Edward III's reign a period which witnessed significant changes in the organisation of the English fighting machine The documents produced during this period of military revolution cast valuable light on the character and attitudes of the aristocratic military community at a time when its traditional role was in the course of re-evaluation Dr ANDREW AYTON is senior lecturer in history at the University of Hull **The Political Theory of Christine De Pizan** Kate Langdon Forhan, 2018-02-06 This title was first published in 2002 Christine de Pizan held no political office and her work was not influential on any political theorist living today However in the disciplines of women's studies and French literature she has inspired intellectual debate so much that the two sides of the debate are referred to as Christinophiles and Christinoclasts This book presents the political paradoxes of Christine de Pizan She was a woman in a man's world an Italian at a French court and the daughter of a civil servant in a world structured by social class Her corpus of political works include five works designed to educate the male ruling class two works expressly princesses and a treatise on warfare The goal of this book is to outline the political theory of Christine de Pizan and situate her ideas within the history of political ideas in general
