The Anthropology of Self and Behavior Gerald Michael Erchak,1992      **The Self in European and North American Culture** J.H. Oosterwegel,R.A. Wicklund,2012-12-06 How diverse or potentially overlapping are the numerous self models self theories and directions of self research It has become clear that the processes associated with the self are complex and diverse and that many of the approaches associated with the self have been pursued in isolation Moreover the fact of there being different traditions within developmental and social psychology as well as different traditions in Europe and North America has also led to a certain cacophony when we examine the self field as a whole The chapters here confront these differences trying to come to terms with phenomena that are overarching that extend through the dimensions of developmental psychology social psychology motivation psychology and parts of clinical psychology The book as whole gives a clear presentation of the issues questions and phenomena that surface in research fields known as self psychology

Tomonaga, 2012-10-20 tentative What bring about biodiversity are not always genes As is the case with humans cultural  
diversity of non human animals has also been found Most of well known examples of animal cultures are those of food  
acquisition behaviors such as sweet potato washing by Japanese macaques and nut cracking by chimpanzees First author  
Naofumi Nakagawa introduces cultural diversity of social behaviors in wild Japanese macaques such as the embracing  
behaviors between adult females in a wild group in each population of Yakushima Kinkazan and Shimokita The subtle local

**Self and Identity** Richard D. Ashmore, Lee Jussim, 1997-05-15 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline. Recently, psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self. This volume presents a critical analysis of fundamental issues in the scientific study of self and identity. These chapters go much farther than merely taking stock of recent scientific progress. World-class social scientists from psychology, sociology, and anthropology present new and contrasting perspectives on these fundamental issues. Topics include the personal versus social nature of self and identity, multiplicity of selves versus unity of identity, and the societal, cultural, and historical formation and expression of selves. These creative contributions provide new insights into the major issues involved in understanding self and identity. As the first volume in the Rutgers Series on Self and Social Identity, the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity. Scholars and advanced students in the social sciences will find this highly informative and provocative reading. Dr. Richard D. Ashmore is a professor and Dr. Lee Jussim is an associate professor in the Department of Psychology at Rutgers University, New Brunswick, New Jersey.
