The Ants:

The Ants Sawako Nagayasu, 2025-08-22 The Ants is a study not of but through ants In a dashing sequence of prose pieces Sawako Nakayasu takes the human to the level of the ant and the ant to the level of the human Prima facie The Ants is a catalogue of insect observations and observations of insects But the expos of insect life humbles and disrupts the myopia that is human life where experience is seen in its most raw and animal form and human nouveau ambitious and free thinking lifestyles become estranged uncovered and humbled Found in dumpling soups and remembered in childhood vignettes these ants trail through what Nakayasu describes as the industry of survival exploring interfaces of love ambition and strategy The danger is not in sentiment but rather in a gash a wall an argument an intention Is it more lonely to be crushed into the core of a non mechanical pencil to be isolated in the safety of home or to find it all at the very very last moment The Ants is the distance the break and the tenuous wilderness between exoskeleton and endoskeleton and Nakayasu puts her finger on it and it and it This title is a new and expanded edition released as part of punctum s Special Collections project containing additionally seventeen bilingual English Japanese poems from the chapbook Insect Country E Bilingual Insects *The Ants* Bert Hölldobler, Edward O. Wilson, 1990 This landmark work is a thoroughgoing survey of one of the largest and most diverse groups of animals on the planet H lldobler and Wilson review in exhaustive detail virtually all topics in the anatomy physiology social organization ecology and natural history of the ants *The Ants and the Dragonfly* AQEEL AHMED, 2023-05-16 The Ants and the Dragonfly Summary of this story In a lush green area there was a prosperous ant colony that was known for its hard work intelligence and complex tunnels Their most important accomplishment was the Great Food Chamber which showed how well they had planned for the harsh winter One sunny day Dewey a dragonfly came to the nest People liked Dewey s adventurous attitude and how well he flew Still he was so carefree that he didn t even think about the future After seeing how hard the ants worked in the hot sun he questioned their work and told them they should just enjoy the moment The wise and calm Ant Queen responded by pointing out how important it is to plan for the future Dewey didn t fully understand this lesson at the time As the seasons changed Dewey kept living his carefree life and enjoying the beauty of the land while the ants worked nonstop to get ready for winter When the harsh winter started Dewey was weak and hungry because he hadn t done anything to get ready He went to the ants for help when he was desperate and they were happy to take him into their well prepared house Even though Dewey had made fun of the ants work in the past the Ant Queen gave him food and a place to live This shows how the ants feel about helping those in need Dewey was moved by this surprising kindness and wisdom and he was thankful for it During his time with the ants Dewey heard their stories saw how they worked together and understood how important their planning and hard work were By the time spring came Dewey had changed He left the anthill promising to keep in mind what he had learned He kept his promise and like the ants spent the summer months not only playing but also getting ready for the coming winter The most important part of this story is how he

went from being a carefree dragonfly to a smarter one who knew how to enjoy the present while also planning for the future. The story *The Ants and the Dragonfly* shows how important it is to work hard, think ahead, work together, and care about others. It shows how important it is to live in the present while making plans for the future. It does this by showing us what we can learn from nature's smallest but most intelligent animals. How it all started: Once upon a time, an ant colony was growing in the middle of a beautiful place where nature grew and danced with every breeze. This wasn't just a pile of dirt; it was a great example of the ants' hard work, creativity, and sense of community. It was a place where people were always doing things, and the pace of life kept time with the seasons. The ant colony was a maze of intricately woven tubes and chambers that showed how smart and hardworking the ants were. The ants worked hard day and night to build a beautiful house out of sand grains and small bits of dirt. Every grain was a brick, every tunnel was a road, and every room was a reminder of how hard they worked and how they stuck together. It showed how strong their spirits were as a group and how determined they were to stay alive no matter what. The ant population grew and did well in a green area. Tall trees with branches that reach up to the sky, like nature's arms, provide shade and protection with their branches. The smell of flowers in bloom filled the air, and the sound of leaves rustling was like a lullaby that filled the quiet. The scenery was a colorful mosaic with the anthill's earthy brown color going well with the green grass. The ant colony was beautiful, but it wasn't an invasive building. Instead, it fits in well with the environment around it. It lived in the earth and sounded like its heartbeat. The ants and the plants got along well because the ants stirred up the earth and helped the plants break down, which was part of the life cycle. Even though they were small, the ants worked hard. Each ant, whether it was a worker, a fighter, or a caretaker, did its part for the colony as a whole. They moved as one, like a beautiful dance of purpose and determination. Each knew its role and worked for the good of the whole. This healthy colony was a sign of how united they were, how strong their spirit was, and how determined they were. The ant colony was a clear example of how strong it is to work together and how powerful it is to be one. Each ant, no matter how small or insignificant it seemed, helped a much bigger goal. They worked together to build an empire, a stronghold that stood up to the forces of nature, a beacon of hope, and a monument to their power and unity. In a way, the busy ant colony, which was in a lush green area full of life, was a miniature version of life itself. It showed how important community is, how strong cooperation is, and how hard work and persistence can be powerful. It was a powerful lesson that even the smallest organisms can build huge structures, get past problems, and live on the big, colorful canvas of life. These ants were just amazing. They weren't like the usual ants you might find in a patch of grass. No, these ants worked hard, were smart, and were so good at building things that other animals were amazed. They were known throughout the area for the tunnels and chambers that they dug into the ground to make a complex network. Other insects and even bigger animals knew them from these tunnels and chambers. These tunnels and rooms did not happen by accident. Instead, they were carefully made by the ants, a sign of how hardworking and smart they were. Each tunnel was built on purpose to make it easy to get around the

village and get things done quickly Like the restrooms the bedrooms were made with a specific use in mind whether it was for the queen the children or to rest With their knowledge and hard work these ants had turned a small mound of dirt into a busy lively city The Great Food Chamber on the other hand was the best building they ever made This room wasn't just an anthill it was a huge vault full of food that had been stored during the warm months The room was big and there was enough food for the whole population to eat through the cold winter months when food was scarce It was made to keep food fresh and safe from thieves or other dangers The way the ants got ready for winter was amazing During the summer they were always looking for food and would carry loads that were many times their own weight To get food for their colony they would journey long distances get past obstacles and even face danger Their dedication to keeping their group alive was amazing and it showed how much they cared about each other and did what they had to do The Great Food Chamber was more than just a place to store food it showed their vision hard work and sense of community It showed that they were aware of nature's changes and could adapt to and get ready for them Their ability to save food for the winter shows that they are good at planning and can work toward a long term goal which sets them apart from many other creatures Through their hard work cleverness and amazing building skills these ants taught us how important it is to think ahead plan and work together They weren't just any ants they were unique beings that were small but very wise Their complex tunnels rooms and the Great Food Chamber were proof of how smart and determined they were This made them a wonder in the animal world and they were admired and respected everywhere One sunny day as the ants went about their work under the sun's good light a new figure appeared in the sky The dragonfly Dewey flew over their anthill for a moment throwing a brief shadow on their hard work Dewey's entrance was just as different as he was He wasn't just a dragonfly he was the embodiment of grace and freedom Dewey was beautiful to look at His thin body shone in the sun His wings which were both delicate and strong shone like the morning dew The way the light moved across his shimmering wings made a beautiful dance of colors that made him look like a flying piece of art Dewey moved with a carefree grace that showed how he felt about life His flight was more than just a way to get around it was a show a dance that showed off how free and agile he was His athletic acrobatics quick spins quick ascents and soft descents showed that he was not limited to the ground but was a master of the air But elegance and freedom were not the only things that made Dewey stand out He was also known for being a free spirit who liked to have fun While the ants stood for hard work and sticking with something Dewey stood for happiness and not caring He flitted from flower to flower rode on gentle breezes and played in the warm rays of the sun He had a charming and contagious sense of humor Even though he was relaxed even the ants respected and liked Dewey Because he was graceful independent and happy he was a popular figure As he flew above the busy ant colony he brought with him a sense of wonder and a reflection of how exciting and free life could be outside of the anthill Dewey the agile playful and free spirited dragonfly was a one of a kind character in their shared world He gave the hard working ants a splash of color and a breath of fresh air Hello hardworking

ants Dewey shouted as he fell gently from the blue sky His voice was loud enough to be heard over the anthill As he landed on top of the busy anthill his shiny wings moved gently The ants stopped what they were doing and their antennae twitched at the same time to let him know they saw him Why work under this hot sun when you could be like me and enjoy the cool breeze Dewey asked in a light funny way Even though he was kidding he said things that showed he was really interested He lived a very easy life compared to the hard work of the ants The ants stopped what they were doing and looked at the dragonfly who had the nerve to question what they were doing *The Ants of Fiji* Eli M. Sarnat,Evan P.

Economo,2012-08-02 The ant fauna of the Fijian archipelago is a diverse assemblage of endemic radiations pan Pacific species and exotics introduced from around the world The Ants of Fiji describes the entire Fijian ant fauna and includes the results of a recently completed archipelago wide biodiversity inventory A total of 187 ant species representing 43 genera are recognized here with an illustrated key to genera synopses of each species keys to species of all genera and a species list The work is heavily illustrated with specimen images distribution maps and habitat elevation charts The Ants' First Day In School AQEEL AHMED,2023-06-14 In the cute story The Ants First Day in School a group of hardworking and curious ants go on an amazing trip of learning growing up and making friends The ants want to find out more about the world outside of their anthill They are known for being able to work together and being very determined The ants are looking forward to their first day of school Their kind and experienced teacher Miss Daisy will be in charge The bright posters and tiny books that are all over the classroom make them even more interested and excited Miss Daisy who has a warm smile and acts like a mother shows them that the world is full of new choices The ants learn about many different things at school which helps them become well rounded people They learn how important it is to work together and how big things can be accomplished when people work together As they learn about the worlds of numbers and letters they are eager to solve problems and use their tiny ears to trace the letters of the alphabet But their education isn't just about school topics The ants do study many different topics like art science and music They make music with leaves and acorns paint with crushed flower petals and do science projects with water and baking soda Each action helps them be more creative gives them a chance to let their imaginations run wild and brings them closer together as a group The ants go on field trips to the grass to learn about the different plants and animals that live there These trips make experiences that will last a lifetime They write down what they notice about butterflies bees and other animals in a small notebook Because of these things their understanding of how all living things is linked will grow a lot which will make them love nature even more The end of their trip is putting on a play that shows how they've changed what they've learned and the new friends they've made Under Miss Daisy's watch they write the play's plot make the costumes and practice for many hours The performance shows how hard they work how good they are at telling stories and how much storytelling can move people to make big changes in their lives As the story comes to an end the ants desire to learn grows and gets stronger They leave the meadow to study environments like forests mountains

and even the depths of the ocean They go on to jobs in science art music and storytelling where they use their knowledge and skills to make the world a better place The Ants First Day in School is a fun story about how exciting learning is how strong friendships are and how getting a good education can change your whole life It s a gentle but powerful way to remind readers of their own limitless potential and how important it is to respect curiosity creativity and working as a team The story encourages young people to go on their own learning adventures enjoy the wonders of the world and do good things in their communities Story begins Once upon a time there was a group of hardworking ants who lived in a small anthill on the edge of a large always busy field The hardworking ants got a great name throughout the whole field for how hard they worked and how well they worked together People thought of them as the perfect example of hard work and community because of how hard they worked to gather food build hard tunnels and keep their community going This was the name they were known by Even though they looked very serious there was a spark of interest in their little hearts The ants daily routines were getting boring and they silently wanted something new and exciting to happen They were driven by a strong desire to learn as much as they could and to explore the world beyond their immediate surroundings They wanted to go to unknown places and see the amazing things that were outside of their anthill but they were stuck there Their minds were excited to see new things and they couldn t wait to dive into the mysteries and thrills that lay ahead These small beings were well aware that there was still a lot to learn and know so they decided to go on an epic journey to learn new things and broaden their views Their tiny antennae twitched with excitement as they got ready to take in every interesting detail and soak up the beauty that was just out of reach The ants hearts were beating in a steady rhythm telling them to get out of their comfort zone and fall headfirst into the huge ocean of information that was waiting for them They knew there were a lot of questions riddles and important lessons to learn Their desire to learn led them to leave the confines of their anthill and take advantage of the many opportunities that awaited them in the bigger world The ants went off with a strong desire to learn explore and add to the huge amount of information that was already around them They were excited and ready to learn new things as a group This gave them a strong drive that helped them move forward as they began an exciting journey of intellectual growth and knowledge They would work together to figure out the complexities of the natural world be amazed by the wonders of the universe and find the wisdom jewels hidden in the vast amount of knowledge As they moved forward into the vast unknown they stayed committed to each other and to working as a team Each ant brought their own unique skills and points of view to the talk They helped each other and shared what they knew to get around problems and find new points of view On their educational trip they kept going because they were determined to go to new places and learn about interesting things So the ants left their anthills to see what was outside of it They did so with both excitement and thanks in their hearts They had built a strong base through hard work and teamwork but what really moved them forward was their insatiable curiosity and desire to learn new things As they moved step by step into the beauty of undiscovered land they enjoyed the thrill of finding new

things and the thrill of satisfying their natural interest The ants trip was about more than just getting information and knowledge It was also about how their fragile brains and hearts changed Because of their journey they would learn more and have more understanding and compassion They would become messengers of knowledge sharing what they had learned with the rest of their kind and encouraging future generations to go on their own journeys to learn more and become wiser The ants thought that the world outside of their anthill was a beautiful place full of treasures and secrets that were just waiting to be found And because they worked hard worked together and were very curious they would not leave any questions open or any stones unturned in their search On that beautiful morning the warm sun rays hit the anthill s surface and the anthill woke up with its own pulsing energy The ants were busy getting ready for their first day of school which was a big deal As they ran around you could hear the sound of their little feet The air was full of anticipation so the anthill buzzed with an electric buzz of eagerness This was the day they had been waiting for with bated breath the day when their thirst for knowledge would be quenched and their world would grow Miss Daisy their favorite teacher had been working hard to get ready for this important event When the ants walked into the classroom they were shocked and amazed by what they saw Miss Daisy had worked hard to set up the room so that it was now a nice and friendly place to learn The room was full of tiny desks and chairs that had been shrunk to fit their small bodies One of the walls had a great whiteboard that was ready to be filled with wise words and new ideas And much to their joy one corner of the anthill proudly showed off a small library Its shelves were full of books that offered to show people how amazing the world outside their door was Miss Daisy met each ant with a smile and a twinkle in her eye This made the ants feel like they were loved and cared for She had spent a lot of time planning this day because she knew it would have a big effect on these younger students futures Her hard work and enthusiasm for teaching were inspiring and they helped create an atmosphere of love warmth and hope As the ants sat down at their tiny seats they looked around in amazement at all the possibilities that lay ahead Miss Daisy started the day by saying who she was and how much she likes to learn and discover new things She told them that school would be full of interesting new things to try discoveries to make and chances to grow as people The ants listened carefully and became interested They couldn t wait to start this learning trip
