City Views in the Habsburg and Medici Courts Ryan E. Gregg,2018-12-10 In *City Views in the Habsburg and Medici Courts* Ryan E Gregg relates how Charles V Holy Roman Emperor and Duke Cosimo I of Tuscany employed city view artists such as Anton van den Wyngaerde and Giovanni Stradano to aid in constructing authority These artists produced a specific style of city view that shared affinity with Renaissance historiographic practice in its use of optical evidence and rhetorical techniques History has tended to see city views as accurate recordings of built environments Bringing together ancient and Renaissance texts archival material and fieldwork in the depicted locations Gregg demonstrates that a close knit school of city view artists instead manipulated settings to help persuade audiences of the truthfulness of their patrons official narratives

The Cultural World of Eleonora di Toledo Konrad Eisenbichler,2017-07-05 Eleonora di Toledo was a powerful and influential woman who over the course of nearly a quarter century 1539-62 contributed profoundly to the cultural flowering of ducal Florence Her patronage of some of the leading artists of the time her support of newly arrived Jesuit preachers her involvement in charitable activities her unfailing devotion to her husband and his policies not to mention her successful farming and business ventures are only some of the areas where her influence was unambiguously exercised and felt She also provided the House of Medici with a full stable of children to re invigorate the failing family line ensure male succession even in the face of unexpected calamities and provide enough females to establish marriage connections with a variety of noble and ruling houses in Italy In spite of all these contributions Eleonora has attracted little attention from scholars This apparent disinterest may be a factor of Eleonora s personal style or of the bad press that as a Spanish noblewoman she quickly received from her Florentine subjects or of modern antipathy for some of the basic characteristics of ducal Florence An examination of her impact on Tuscany is long overdue In fact a fuller more nuanced understanding of the duchess can shed a more profound light not only on her as a person or on her impact on Tuscan culture in the sixteenth century but also on the contribution of female consorts to the vitality of a successful early modern state The essays collected here bring together a variety of scholars working in various disciplines While many of the articles take their cue from art history a natural reflection of the innovative research recent art historians have carried out on the duchess they also reach out towards other disciplines political history literature spectacle and religion to mention just a few In so doing they expand our understanding of Eleonora s place in her society and reveal a very complex

Collecting and the Princely Apartment Susan Bracken,2020-05-15 Collecting is an obsession that goes back to the mists of history While spare time and spare cash seem an absolute necessity for this kind of activity every collector has

his or her own approach to the formation of a collection The way in which one's treasures are displayed is another important instance in which one collector differs from another Glass cases niches trays cupboards or drawers have been adopted sometimes cards offer information on the subject its age and provenance an overall theme may have prompted the choice of the actual objects displayed together security reasons suggest one room over another While some collectors keep their treasures as close as possible in their bedroom throughout their living quarters or in a locked up closet nearby others may find that they want to be able to show off their collection without being disturbed by visitors in the rooms in which they actually spend most of their time Certainly our notions of private and public have changed considerably over the centuries and this has had an impact on questions of display and on the separation of particular parts of the house from other less accessible ones in particular in great houses that allow for the establishment of a museum The museum in such cases is quite separate from the living quarters for example situated on the ground floor off the main hall Not all displays were so defined there were many forms of exhibition just as there were many forms of collections The aims and ambitions of the collector are often discussed in terms of the display of their collections in part because we believe that analysing how a collection was shown and how it was received are key contributors to our understanding the role and purpose of the collection In lieu of any other documentation inventories sales catalogues and wills remain essential tools for the historian of collecting both in terms of what was owned and where it was housed This volume the second in a series of four presents ten articles that explore the connection between collections and their display in near or separate from the princely apartment within a time frame that runs from the sixteenth century to the early nineteenth and within a geographical area that includes courts on the Italian peninsula in England France The Netherlands and Germany

Wives, Widows, Mistresses, and Nuns in Early Modern Italy Katherine A. McIver, 2016-12-05 Through a visually oriented investigation of historical invisibility in early modern Italy the essays in this volume recover those women wives widows mistresses the illegitimate who have been erased from history in modern literature rendered invisible or obscured by history or scholarship as well as those who were overshadowed by male relatives political accident or spatial location A multi faceted invisibility of the individual and of the object is the thread that unites the chapters in this volume Though some women chose to be invisible for example the cloistered nun these essays show that in fact their voices are heard or seen through their commissions and their patronage of the arts which afforded them some visibility Invisibility is also examined in terms of commissions which are no longer extant or are inaccessible What is revealed throughout the essays is a new way of looking at works of art a new way to visualize the past by addressing representational invisibility the marginalized or absent subject or object and historical invisibility to discover who does the looking and how this shapes how something or someone is visible or invisible The result is a more nuanced understanding of the place of women and gender in early modern Italy

Tapestry in the Renaissance Thomas P. Campbell, Metropolitan Museum of Art (New York, N.Y.), 2002 Tapestries the art form of kings were a principal tool used by powerful Renaissance

rulers to convey their wealth and might From 1460 to 1560 courts and churches lavished vast sums on costly weavings in silk and gold thread from designs by leading artists In this lavishly illustrated book the first major survey of tapestry production of this period contributors analyze some of these beautiful tapestries examine the stylistic and technical development of tapestry production in the Low Countries France and Italy during the Renaissance and discuss the contribution that the medium made to art liturgy and propaganda of the day *Mapping Space, Sense, and Movement in Florence* Nicholas Terpstra, Colin Rose, 2016-02-05 Mapping Space Sense and Movement in Florence explores the potential of digital mapping or Historical GIS as a research and teaching tool to enable researchers and students to uncover the spatial kinetic and sensory dimensions of the early modern city The exploration focuses on new digital research and mapping projects that engage the rich social cultural and artistic life of Florence in particular One is a new GIS tool known as DECIMA Digitally Encoded Census Information and Mapping Archive and the other is a smartphone app called Hidden Florence The international collaborators who have helped build these and other projects address three questions how such projects can be created when there are typically fewer sources than for modern cities how they facilitate more collaborative models for historical research into social relations senses and emotions and how they help us interrogate older historical interpretations and create new models of analysis and communication Four authors examine technical issues around the software programs and manuscripts Five then describe how GIS can be used to advance and develop existing research projects Finally four authors look to the future and consider how digital mapping transforms the communication of research results and makes it possible to envision new directions in research This exciting new volume is illustrated throughout with maps screenshots and diagrams to show the projects at work It will be essential reading for students and scholars of early modern Italy the Renaissance and digital humanities **The Building of Renaissance Florence** Richard A.
