T. Witschey, 2015-12-24

Ancient Southeast Mesoamerica Patricia A. Urban, Edward M. Schortman, 2024-03-21 Ancient Southeast Mesoamerica explores the distinctive development and political history of the region from its earliest inhabitants up to the Spanish conquest It was composed of a matrix of social networks rather than divided by distinct cultures and domains Making use of the area's rich archaeological data Edward Schortman and Patricia Urban provide a social network analysis of southeast Mesoamerica They demonstrate how inhabitants from different locales were organized within such networks and how they mobilized the assets that they needed to define and achieve their own goals They also provide evidence for the actions of other groups who sought to promote their importance at local and regional scales and often opposed those efforts Schortman and Urban's study demonstrates the fresh insights gained from study of socio political structures via a social network perspective It also challenges models that privilege the influence of powerful leaders in shaping those structures **The Maya and Their Central American Neighbors** Geoffrey E. Braswell, 2014-04-16 The ancient Maya created one of the most studied and best known civilizations of the Americas Nevertheless Maya civilization is often considered either within a vacuum by sub region and according to modern political borders or with reference to the most important urban civilizations of central Mexico Seldom if ever are the Maya and their Central American neighbors of El Salvador and Honduras considered together despite the fact that they engaged in mutually beneficial trade intermarried and sometimes made war on each other The Maya and Their Central American Neighbors seeks to fill this lacuna by presenting original research on the archaeology of the whole of the Maya area from Yucatan to the Maya highlands of Guatemala western Honduras and El Salvador With a focus on settlement pattern analyses architectural studies

and ceramic analyses this ground breaking book provides a broad view of this important relationship allowing readers to understand ancient perceptions about the natural and built environment the role of power the construction of historical narrative trade and exchange multiethnic interaction in pluralistic frontier zones the origins of settled agricultural life and the nature of systemic collapse

Beekman, 2019-10-14 Bringing the often neglected topic of migration to the forefront of ancient Mesoamerican studies this volume uses an illuminating multidisciplinary approach to address the role of population movements in Mexico and Central America from AD 500 to 1500 the tumultuous centuries before European contact Clarifying what has to date been chiefly speculation researchers from the fields of archaeology biological anthropology linguistics ethnohistory and art history delve deeply into the causes and impacts of prehistoric migration in the region They draw on evidence including records of the Nahuatl language murals painted at the Cacaxtla polity ceramics in the style known as Coyotlatelco skeletal samples from multiple sites and conquest era accounts of the origins of the Chich n Itz Maya from both Native and Spanish scribes The diverse datasets in this volume help reveal the choices and priorities of migrants during times of political economic and social changes that unmoored populations from ancestral lands **Migrations in Late Mesoamerica** shows how migration patterns are vitally important to study due to their connection to environmental and political disruption in both ancient societies and today s world A volume in the series **Maya Studies** edited by Diane Z Chase and Arlen F Chase
