The Archaeology Of Tribal Societies Imp Archaeological Series:

The Archaeology of Tribal Societies William A. Parkinson, 2002-03-01 Anthropological archaeologists have long attempted to develop models that will let them better understand the evolution of human social organization In our search to understand how chiefdoms and states evolve and how those societies differ from egalitarian bands we have neglected to develop models that will aid the understanding of the wide range of variability that exists between them This volume attempts to fill this gap by exploring social organization in tribal or autonomous village societies from several different ethnographic ethnohistoric and archaeological contexts from the Pre Pottery Neolithic Period in the Near East to the contemporary Jivaro of Amazonia

Written in Stone P. Nick Kardulias, Richard W. Yerkes, 2003-01-01 Written in Stone The Multiple Dimensions of Lithic Analysis demonstrates the vitality of contemporary lithics analysis by examining material from a variety of geographical locations This edited collection is primarily concerned with the link between craft production and social complexity the nature of trade and the delineation of settlement patterns and manipulation of landscape While deconstructing the present to reconstruct the past each chapter incorporates a technological dimension shaped by the type of analysis utilized Methods include microwear analysis which adds significant understanding of stone tool function to the identification of obsidian sources which illustrates the potential of lithic provenance studies for reconstructing trade This book verifies and expands on the notion that lithics play an integral role in our understanding of past societies at all levels of complexity from Paleolithic hunter gatherers to archaic states

Author-title Catalog University of California, Berkeley. Library, 1963 *Archaeological Perspectives on Warfare on the Great Plains* Andrew Clark, Douglas Bamforth, 2018-05-15 The Great Plains has been central to academic and popular visions of Native American warfare largely because the region's well documented violence was so central to the expansion of Euroamerican settlement However social violence has deep roots on the Plains beyond this post Contact perception and these roots have not been systematically examined through archaeology before War was part and perhaps an important part of the process of ethnogenesis that helped to define tribal societies in the region and it affected many other aspects of human lives there In *Archaeological Perspectives on Warfare on the Great Plains* anthropologists who study sites across the Plains critically examine regional themes of warfare from pre Contact and post Contact periods and assess how war shaped human societies of the region Contributors to this volume offer a bird's eye view of warfare on the Great Plains

consider artistic evidence of the role of war in the lives of indigenous hunter gatherers on the Plains prior to and during the period of Euroamerican expansion provide archaeological discussions of fortification design and its implications and offer archaeological and other information on the larger implications of war in human history Bringing together research from across the region this volume provides unprecedented evidence of the effects of war on tribal societies Archaeological Perspectives on Warfare on the Great Plains is a valuable primer for regional warfare studies and the archaeology of the Great Plains as a whole Contributors Peter Bleed Richard R Drass David H Dye John Greer Mavis Greer Eric Hollinger Ashley Kendell James D Keyser Albert M LeBeau III Mark D Mitchell Stephen M Perkins Bryon Schroeder Douglas Scott Linea Sundstrom Susan C Vehik
