Root* Barbara Anderson, University of Kansas. School of Architecture and Urban Design, 1990 Nature's Laboratory Elizabeth Grennan Browning, 2022-11-15 The untold history of how Chicago served as an important site of innovation in environmental thought as America transitioned to modern industrial capitalism In *Nature's Laboratory* Elizabeth Grennan Browning argues that Chicago a city characterized by rapid growth severe labor unrest and its position as a gateway to the West offers the clearest lens for analyzing the history of the intellectual divide between countryside and city in the United States at the end of the nineteenth century By examining both the material and intellectual underpinnings of Gilded Age and Progressive Era environmental theories Browning shows how Chicago served as an urban laboratory where public intellectuals and industrial workers experimented with various strains of environmental thinking to resolve conflicts between capital and labor between citizens and their governments and between immigrants and long term residents Chicago she argues became the taproot of two intellectual strands of American environmentalism both emerging in the late nineteenth century first the conservation movement and the discipline of ecology and second the sociological and anthropological study of human societies as natural communities where human behavior was shaped in part by environmental conditions Integrating environmental labor and intellectual history *Nature's Laboratory* turns to the workplace to explore the surprising ways in which the natural environment and ideas about nature made their way into factories and offices places that appeared the most removed from the natural world within the modernizing city As industrialization urbanization and immigration transformed Chicago into a microcosm of the nation's transition to modern industrial capitalism environmental thought became a protean tool that everyone from anarchists and industrial workers to social scientists and business managers looked to in order to stake their claims within the democratic capitalist order Across political and class divides Chicagoans puzzled over what relationship the city should have with nature in order to advance as a modern nation Browning shows how historical understandings of the complex interconnections between human nature and the natural world both reinforced and empowered resistance against the stratification of social and political power in the city **Architecture** Henry-Russell Hitchcock, 1987-01-01 This book examines a period which is far more than a prelude to the age of steel and concrete The first half century culminated in the bold iron and glass of the Crystal Palace There follows the creation of the modern styles of the era based on traditions of the past and finally in the 20th century Art Nouveau and the modern architects in their generations Perret Wright Gropius Corbusier Mies van der Rohe and others in many parts of the world Source Book of American Architecture George Everard Kidder Smith, 1996 *Scorched Earth* is the first book to chronicle the effects of chemical warfare on the Vietnamese

people and their environment where even today more than 3 million people including 500 000 children are sick and dying from birth defects cancer and other illnesses that can be directly traced to Agent Orange dioxin exposure Weaving first person accounts with original research Vietnam War scholar Fred A Wilcox examines long term consequences for future generations laying bare the ongoing monumental tragedy in Vietnam and calls for the United States government to finally admit its role in chemical warfare in Vietnam Wilcox also warns readers that unless we stop poisoning our air food and water supplies the cancer epidemic in the United States and other countries will only worsen and he urgently demands the chemical manufacturers of Agent Orange to compensate the victims of their greed and to stop using the Earth s rivers lakes and oceans as toxic waste dumps Vietnam has chosen August 10 the day that the US began spraying Agent Orange on Vietnam as Agent Orange Day to commemorate all its citizens who were affected by the deadly chemical Scorched Earth will be released upon the third anniversary of this day in honor of all those whose families have suffered and continue to suffer from this tragedy

The Top Books of the Year The Architecture Of John Wellborn Root The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. The Architecture Of John Wellborn Root : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
