some texts produced in Egypt in 1550 B C is among the evidences that the most ancient peoples already used hypnosis practices Hypnosis is the set of specific and natural phenomena of the mind which can produce different impacts Its use must be done by specialized professionals its practice by any person who has no technical knowledge of the use of hypnosis can cause great harm because hypnosis is not restricted only to the return of time but the treatment of certain psychological problems which can be aggravated if not treated by a specialized professional In a hypnosis session the patient can return to a certain age for example at the age of 7 when he has some kind of trauma The patient being in a room hypnotized the doctor passing the hand on the patient s arm and warning him that he is passing some kind of ointment the patient will have the sensation that really the doctor is passing an ointment and smell the ointment positive olfactory hallucination on his arm this all owes to the main point of hypnosis The patient the hypnotized one really believes in the words of the doctor the hypnotist Another example when he smells gunpowder and this smell is marked his 10 years old then the patient can go back to 10 years old even without the professional s indication Hypnosis is widely used today to combat phobias depression reduce suffering of terminal patients amnesia problems correction of addictions mental preparation for vestibular treatment of obesity sports practices help players to have positive practices in sports i e not to practice unsportsmanlike things like violence cursing etc surgical procedures insomnia personal involvement and various other uses For someone to be hypnotized it is not enough just to arrive and hypnotize him the patient must believe in this process of hypnosis and want to be hypnotized remembering that only specialized professionals are recommended to act in this process Good Study
