Edward IV and the Wars of the Roses David Santiuste, 2019-02-20 This fascinating account of an unsung English monarch and military leader is a pleasing and well informed appraisal of the first Yorkist king Dr Michael Jones author of Bosworth 1485 Psychology of a Battle Indisputably the most effective general of the Wars of the Roses in fifteenth century England King Edward IV died in his bed undefeated in battle Yet he has never been accorded the martial reputation of other English warrior kings such as Henry V It has been suggested that perhaps he lacked the personal discipline expected of a truly great army commander But as the author shows in this perceptive and highly readable new study Edward was a formidable military leader whose strengths and subtleties have never been fully recognized perhaps because he fought most of his battles against his own people in a civil war This reassessment of Edward's military skill and of the Wars of the Roses in which he played such a vital part provides fascinating insight into Edward the man as well as the politician and battlefield commander Based on contemporary sources and the latest scholarly research Edward IV and the Wars of the Roses stands as a valuable and thought provoking addition to the canon which ought to become required reading for anyone interested in the reign of the first Yorkist monarch The Ricardian **Building Art** Paul Goldberger, 2015-09-15 From Pulitzer Prize winning architectural critic Paul Goldberger an engaging nuanced exploration of the life and work of Frank Gehry undoubtedly the most famous architect of our time This first full fledged critical biography presents and evaluates the work of a man who has almost single handedly transformed contemporary architecture in his innovative use of materials design and form and who is among the very few architects in history to be both respected by critics as a creative cutting edge force and embraced by the general public as a popular figure Building Art shows the full range of Gehry's work from early houses constructed of plywood and chain link fencing to lamps made in the shape of fish to the triumphant success of such late projects as the spectacular art museum of glass in Paris It tells the story behind Gehry's own house which upset his neighbors and excited the world with its mix of the traditional and the extraordinary and recounts how Gehry came to design the Guggenheim Museum in Bilbao Spain his remarkable structure of swirling titanium that changed a declining city into a destination spot Building Art also explains Gehry's sixteen year quest to complete Walt Disney Concert Hall the beautiful acoustically brilliant home of the Los Angeles Philharmonic Although Gehry's architecture has been written about widely the story of his life has never been told in full detail Here we come to know his Jewish immigrant family his working class Toronto childhood his

hours spent playing with blocks on his grandmother's kitchen floor his move to Los Angeles when he was still a teenager and how he came unexpectedly to end up in architecture school Most important Building Art presents and evaluates Gehry's lifetime of work in conjunction with his entire life story including his time in the army and at Harvard his long relationship with his psychiatrist and the impact it had on his work and his two marriages and four children It analyzes his carefully crafted persona in which a casual amiable aw shucks surface masks a driving and intense ambition And it explores his relationship to Los Angeles and how its position as home to outsider artists gave him the freedom in his formative years to make the innovations that characterize his genius Finally it discusses his interest in using technology not just to change the way a building looks but to change the way the whole profession of architecture is practiced At once a sweeping view of a great architect and an intimate look at creative genius Building Art is in many ways the saga of the architectural milieu of the twenty first century But most of all it is the compelling story of the man who first comes to mind when we think of the lasting possibilities of buildings as art
