The Ecological Self Freya Mathews, 2021-05-16 Environmental disasters from wildfires and vanishing species to flooding and drought have increased dramatically in recent years and debates about the environment are rarely far from the headlines There is growing awareness that these disasters are connected indeed that in the fabric of nature everything is interconnected However until the publication of Freya Mathews *The Ecological Self* there had been remarkably few attempts to provide a conceptual foundation for such interconnectedness that brought together philosophy and science In this acclaimed book Mathews skilfully weaves together a thought provoking metaphysics of the environment She connects the ideas of the seventeenth century philosopher Spinoza with twentieth century systems theory and Einstein's physics to argue that the atomistic cosmology inherited from Newton gave credence to a picture of the universe as fragmented rather than as whole Furthermore it is such faulty thinking that presents human beings as similarly disconnected and individualistic with the dire consequence that they regard nature as of purely instrumental rather than intrinsic value She concludes by arguing for an ethics of ecological interdependence and for a basic egalitarianism among living species A compelling and fascinating account of how we must change our thinking about the environment *The Ecological Self* is a classic of ecological and environmental thinking This Routledge Classics edition includes a substantial new Introduction by the author

Returning the Self to Nature Jeanine M. Canty, 2022-11-01 Nautilus Book Award Winner Using the lens of ecopsychology *Returning the Self to Nature* shows that the pervasive and extreme forms of narcissism we find in many modern societies are fundamentally the result of alienation from the natural world But it doesn't have to be that way *Returning the Self to Nature* is written for the person who no longer wishes to function in a world that revolves around selfish disconnected identity models and yearns to step into healthy relationships with one's self one's community and our planet Seeing the suffering of the planet and that of humans as inseparably linked the ecological crisis as psychological crisis and vice versa opens the door to a mutuality of healing between people and nature At the heart of both chronic and acute forms of narcissism is a socially constructed false self an isolated damaged ego in a delusional cycle of selfishness Through unflinching analysis and meditation practices that encourage visualizing and embodying the wild naturalness of being human the reader will gain skills to begin experiencing a courageous pluralistic and ecological self This book is an invitation to wake up from the dream of the false self and join the movement toward social and planetary healing
