Department of Labor, 1962 **The Commercialisation of English Society, 1000-1500** R. H. Britnell, 1996 The commercialisation of English society offers a major new interpretation of social and economic change in England over five centuries By 1500 English livelihoods depended more upon money and commercial transactions than ever before the institutional framework of markets had been transformed and urban development was more pronounced These changes were not however caused by any unilinear development of population output or money supply This pioneering study examines both institutional and economic transformation and the social changes that resulted and stresses the limited importance of formal trading institutions for the development of local trade Commercial transition is throughout analysed from a broader perspective that looks at the changing power relations within medieval society which might loosely be described as feudal and considers how these relations were affected by such commercial development *Belated Feudalism* Karen Orren, 1991 Traditional theories of American political development depict the American state as a thoroughly liberal state from its very inception In this book first published in 1992 Karen Orren challenges that account by arguing that a remnant of ancient feudalism was in fact embedded in the American governmental system in the form of the law of master and servant and persisted until well into the twentieth century The law of master and servant was she reveals incorporated in the US Constitution and administered from democratic politics The fully legislative polity that defines the modern liberal state was achieved in America Orren argues only through the initiatives of the labor movement in the late nineteenth and early twentieth centuries and was finally ushered in as part of the processes of collective bargaining instituted by the New Deal This book represents a fundamental reinterpretation of constitutional change in the United States and of the role of American organized labor which is shown to be a creator of liberalism rather than a spoiler of socialism **A Catalogue of the Law Collection at New York University** Julius J.
