Defense Manpower Commission, 1976 **National Security Issues** , 1986 *Military Review* , 1985 The Tank Debate John Stone, 2018-12-07 In The Tank Debate John Stone highlights the equivocal position that armour has traditionally occupied in Anglo American thought and explains why despite frequent predictions to the contrary the tank has remained an important instrument of war This book provides a timely and provocative study of the tank s developmental history against the changing background of Anglo American military thought **Routledge Library Editions: The Labour Movement** Various, 2021-07-28 This set of 44 volumes originally published between 1924 and 1995 amalgamates a wide breadth of research on the Labour Movement including labour union history the early stages and development of the Labour Party and studies on the working classes This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time and will be of particular interest to students of political history **Neorealism Versus Strategic Culture** John Glenn, 2018-01-18 The debate between Neorealists and Strategic Culturalists centres on whether it is possible to explain predict state behaviour without taking into account the particular characteristics of the state such as its historical experiences geographical context and cultural constitution This informative debate is encapsulated in the first section of the book which considers the theoretical issues raised by both Neorealism and Strategic Culture These issues are then explored in the second section by assessing their relevance to six country case studies Australia Germany India Japan Nigeria and Russia **Understanding Soviet Military Developments** United States. Department of the Army. Office of the Assistant Chief of Staff for Intelligence, 1977 **World Communism at the Crossroads** S.S. Rosefielde, 2013-03-09 The collection of essays presented in this volume grew out of a series of lec tures given at the University of North Carolina during the

academic year 1976 1977 The series was sponsored by the Soviet and East European Studies Program which I chaired at the time and the Curriculum of Peace War and Defense headed by James Leutze In the ensuing years almost all the manuscripts have been redrafted at frequent intervals to reflect the changing state of knowledge in each respective discipline The final version of the text that appears here is therefore the outcome of a long developmental process It is up to date and embodies our individual views on world communism at the present juncture Although the recent Soviet invasion of Afghanistan occurred shortly after this volume was completed that event has not impaired the book's timeliness The findings of Rosefield Lee Valenta and Leutze all point toward a resurgence of Soviet expansionism and Parker explicitly predicted the Afghan invasion in the first draft of his essay June 1978 see p 32 *National Security Affairs Conference*, 1980 **Proceedings of the National Security Affairs Conference**, 1980 *International Security Yearbook 1984/85* Barry M. Posen, 2014-01-13 In this sobering book Barry R Posen demonstrates how the interplay between conventional military operations and nuclear forces could in conflicts among states armed with both conventional and nuclear weaponry inadvertently produce pressures for nuclear escalation Knowledge of these hidden pressures he believes may help some future decision maker avoid catastrophe Building a formidable argument that moves with cumulative force he details the way in which escalation could occur not by mindless accident or by deliberate preference for nuclear escalation but rather as a natural accompaniment of land naval or air warfare at the conventional level Posen bases his analysis on an empirical study of the east west military competition in Europe during the 1980s using a conceptual framework drawn from international relations theory organization theory and strategic theory The lessons of his book however go well beyond the east west competition Since his observations are relevant to all military competitions between states armed with both conventional and

nuclear weaponry his book speaks to some of the problems that attend the proliferation of nuclear weapons in longstanding regional conflicts Optimism that small and medium nuclear powers can easily achieve stable nuclear balances is he believes unwarranted
