Secret Cures of Slaves Londa Schiebinger,2023-05-25 Engaging unique sources Londa Schiebinger untangles the complex relationships between European and local physicians, healers, plants, and slavery. François Regourd, Université Paris Nanterre. In the natural course of events humans fall sick and die. The history of medicine bristles with attempts to find new and miraculous remedies to work with and against nature to restore humans to health and well-being. In this book Londa Schiebinger examines medicine and human experimentation in the Atlantic World, exploring the circulation of people, disease, plants, and knowledge between Europe, Africa, and the Americas. She traces the development of a colonial medical complex from the 1760s, when a robust experimental culture emerged in the British and French West Indies, to the early 1800s, when debates raged about banning the slave trade and eventually slavery itself. Massive mortality among enslaved Africans and European planters, soldiers, and sailors fueled the search for new healing techniques. Amerindian, African, and European knowledges competed to cure diseases emerging from the collision of peoples on newly established, often poorly supplied plantations. But not all knowledge was equal. Highlighting the violence and fear endemic to colonial struggles, Schiebinger explores aspects of African medicine that were not put to the test, such as Obeah and Vodou. This book analyzes how and why specific knowledges were blocked, discredited, or held secret. In this urgent, probing, and visually striking volume, Londa Schiebinger, one of the pioneers of feminist and colonial science studies, shifts our understanding of Enlightenment racial attitudes to the domain of the medical, making a vital contribution to the dynamic new wave of research on science and slavery in the Atlantic world. James Delbourgo, Rutgers University.

The Politics of Reproduction Katherine Paugh, 2017-04-21 Many British politicians planters and doctors attempted to exploit the fertility of Afro Caribbean women's bodies in order to ensure the economic success of the British Empire during the age of abolition Abolitionist reformers hoped that a homegrown labor force would end the need for the Atlantic slave trade By establishing the ubiquity of visions of fertility and subsequent economic growth during this time *The Politics of Reproduction* sheds fresh light on the oft-debated question of whether abolitionism was understood by contemporaries as economically beneficial to the plantation colonies At the same time Katherine Paugh makes novel assertions about the importance of Britain's Caribbean colonies in the emergence of population as a political problem The need to manipulate the labor market on Caribbean plantations led to the creation of new governmental strategies for managing sex and childbearing such as centralized nurseries discouragement of extended breastfeeding and financial incentives for childbearing that have become commonplace in our modern world While assessing the politics of reproduction in the British Empire and its Caribbean colonies in relationship to major political events

such as the Haitian Revolution the study also focuses in on the island of Barbados The remarkable story of an enslaved midwife and her family illustrates how plantation management policies designed to promote fertility affected Afro Caribbean women during the late eighteenth and early nineteenth centuries The Politics of Reproduction draws on a wide variety of sources including debates in the British Parliament and the Barbados House of Assembly the records of Barbadian plantations tracts about plantation management published by doctors and plantation owners and missionary records related to the island of Barbados
