Hearings United States. Congress. House. Committee on the District of Columbia,1926 *Virtue Is Knowledge* Lorraine Smith Pangle,2014-05-23 The relation between virtue and knowledge is at the heart of the Socratic view of human excellence but it also points to a central puzzle of the Platonic dialogues Can Socrates be serious in his claims that human excellence is constituted by one virtue that vice is merely the result of ignorance and that the correct response to crime is therefore not punishment but education Or are these assertions mere rhetorical ploys by a notoriously complex thinker Lorraine Smith Pangle traces the argument for the primacy of virtue and the power of knowledge throughout the five dialogues that feature

them most prominently the Apology Gorgias Protagoras Meno and Laws and reveals the truth at the core of these seemingly strange claims She argues that Socrates was more aware of the complex causes of human action and of the power of irrational passions than a cursory reading might suggest Pangle's perceptive analyses reveal that many of Socrates's teachings in fact explore the factors that make it difficult for humans to be the rational creatures that he at first seems to claim Also critical to Pangle's reading is her emphasis on the political dimensions of the dialogues Underlying many of the paradoxes she shows is a distinction between philosophic and civic virtue that is critical to understanding them Ultimately Pangle offers a radically unconventional way of reading Socrates's views of human excellence Virtue is not knowledge in any ordinary sense but true virtue is nothing other than wisdom
