*Stronghold Britain* Geoffrey Williams, 1999 From prehistoric hill forts to grand medieval castles and from gentlemen's fortified country homes and Victorian follies to the defensive installations of World War II the whole range of fortifications built in Britain is examined through the remains that can be found in every corner of the island

**Great Walls & Linear Barriers** Peter Spring, 2015-02-28 Everyone has heard of the Great Wall of China and knows of Hadrian's Wall and the other barriers lining stretches of Rome's imperial frontiers But Peter Spring's original new study demonstrates that far from being exceptional the building of walls and other linear defences was commonplace among the peoples and states of pre modern era He finds examples virtually all across the globe and analyses their forms and strategic functions He finds patterns for their distribution an important recurrent theme being the divide between settled agriculture and nomads The author argues that it is mistaken to view such undertakings as necessarily purely defensive measures that might be evidence of insecurity or a *maginot line* mentality as they were in fact often about aggressive assertion of control over a region or strategic routes This original and thought provoking study brings new light and insight to a fascinating and neglected aspect of human political and military history It The clear text is supported by numerous specially drawn maps and photographs

*Military Aspects of Geology* E. P. F. Rose, J. Ehlen, U. L. Lawrence, 2019-01-31 This book complements the Geological Society's Special Publication 362 *Military Aspects of Hydrogeology* Generated under the auspices of the Society's History of Geology and Engineering Groups it contains papers from authors in the UK USA Germany and Austria Substantial papers describe some innovative engineering activities influenced by geology undertaken by the armed forces of the opposing nations in World War I These activities were reactivated and developed in World War II Examples include trenching from World War I tunnelling and quarrying from both wars and the use of geologists to aid German coastal fortification and Allied aerial photographic interpretation in World War II The extensive introduction and other chapters reveal that military geology has a longer history These chapters relate to pre twentieth century coastal fortification in the UK and the USA conflict in the American Civil War long term going assessments for German forces tunnel repair after wartime route denial in Hong Kong and tunnel detection after recent insurgent improvisation in Iraq

**Landscapes of War** Paul Hill, Julie Wileman, 2002 From the earliest evidence of human aggression to the modern era of sophisticated warfare this book covers the archaeological aspects of war in the landscape using a multi period thematic approach incorporating worldwide material The book discusses the evidence for warfare from Ancient Sumeria to the fall of the Roman Empire in the west and then concentrates on the form and types of defences adopted by different cultures and communities from the level of family protection up to that of national defence using the archaeology of Britain as a major source of evidence Drawing on a wide variety of research including excavated evidence historical sources and in some cases oral testimony the authors analyse the importance of archaeology as a tool for interpretation and take a close look at the influence of terrain in some specially chosen military campaigns across the globe

The patterns of warfare which repeat themselves in the forms of arms races and technological advances from prehistory to the present are examined in terms of the cycles of aggressive and defensive measures and case studies are used to exemplify how and why territorial frontiers were held or lost in different eras. Both authors have been involved in teaching historical and archaeological material at the University of Surrey on a Continuing Education degree course as well as undertaking their own research in the field. Paul Hill, formerly curator at Kingston Museum in Surrey, has a background of Anglo-Saxon weapons and warfare, and Julie Wileman has been researching into prehistoric warfare at UCL and has worked as Assistant Director and Finds Officer at a number of archaeological sites in Surrey.

*Royal Historical Society Annual Bibliography of British and Irish History* Austin Gee, 2001-10-18

The Royal Historical Society's Annual Bibliography of British and Irish History provides a comprehensive and authoritative survey of books and articles published in a single calendar year. It covers all periods of British and Irish history from Roman Britain to the end of the twentieth century and also includes a section on imperial and Commonwealth history. It is the most complete and up-to-date bibliography of its type and an indispensable tool for historians.

Arthur Daniel Mersey, 2004

King Arthur, probably the most popular of British kings and one whose name is synonymous with courage, chivalry and romanticism. Arthur, King of the Britons, Arthur the medieval legend, Arthur the Celtic warlord, Arthur of the Pre-Raphaelites and Arthur of the movies.

*Humans as Geologic Agents* Judy Ehlen, William C. Haneberg, Robert A. Larson, 2005-01-01

The Iron Age in Northern Britain Dennis W. Harding, 2017-02-24

The Iron Age in Northern Britain examines the archaeological evidence for earlier Iron Age communities from the southern Pennines to the Northern and Western Isles and the impact of Roman expansion on local populations through to the emergence of historically recorded communities in the post-Roman period. The text has been comprehensively revised and expanded to include new discoveries and to take account of advanced techniques with many new and updated illustrations. The volume presents a comprehensive picture of the long Iron Age, allowing readers to appreciate how perceptions of Iron Age societies have changed significantly in recent years. New material in this second edition also addresses the key issues of social reconstruction, gender and identity as well as assessing the impact of developer-funded archaeology on the discipline. Drawing on recent excavation and research and interpreting evidence from key studies across Scotland and northern England, *The Iron Age in Northern Britain* continues to be an accessible and authoritative study of later prehistory in the region.
