Maharramov,Kamran T. Mahmudov,Maximilian N. Kopylovich,Armando J. L. Pombeiro,2016-05-03 This book aims to overview the role of non covalent interactions such as hydrogen and halogen bonding anion and electrostatic interactions hydrophobic effects and van der Waals forces in the synthesis of organic and inorganic compounds as well as in design of new crystals and function materials The proposed book should allow to combine in a systematic way recent advances on the application of non covalent interactions in synthesis and design of new compounds and functional materials with significance in Inorganic Organic Coordination Organometallic Pharmaceutical Biological and Material Chemistries Therefore it should present a multi and interdisciplinary character assuring a rather broad scope We believe it will be of interest to a wide range of academic and research staff concerning the synthesis of new compounds catalysis and materials Each chapter will be written by authors who are well known experts in their respective fields Stability and Applications of Coordination Compounds Abhay Nanda Srivastva,2020-07-08 In the current era of incessant developing needs for the betterment and ease in living style for humans technology is seeking upgraded well structured materials for utilization in various fields of human wellness such as medication energy environment protection and cleaning food security etc In the same direction chemists are doing very well at synthesizing compounds and materials from different groups of chemicals Among them coordination compounds also play a key role in serving humanity as these compounds have a wide range of applications in health care from antimicrobial to anticancer bioengineering bio mimetic models catalysis photosensitized materials etc Along with development of stable coordination compounds their extensive structural studies are also in the main line of work for researchers Twenty nine authors from different countries have contributed their scientific views and work in magnifying the importance and scope of coordination compounds in the present book entitled Stability and Applications of Coordination Compounds I hope that the book will achieve its target of supplementing the community of researchers and readers working in the field of coordination chemistry **Specific Intermolecular Interactions of Organic Compounds** Alexei K. Baev,2012-01-11 Prof Baev presents in his book the development of the thermodynamic theory of specific intermolecular

interactions for a wide spectrum of organic compounds ethers ketones alcohols carboxylic acids and hydrocarbons The fundamentals of an unconventional approach to the theory of H bonding and specific interactions are formulated based on a concept of pentacoordinate carbon atoms New types of hydrogen bonds and specific interactions are substantiated and on the basis of the developed methodology their energies are determined The system of interconnected quantitative characteristics of the stability of specific intermolecular interactions is presented The laws of their transformations are discussed and summarized The new concept of the extra stabilizing effect of isomeric methyl groups on the structure and stability of organic molecules is introduced and the destabilization action on specific interactions is outlined **The**
