Structural and Palaeogeographical Development of the German North Sea Sector F. Kockel, Reinhard Baldschuhn, 1995

Petroleum Geology of the North Sea K. W. Glennie, 2009-06-29 Since the 3rd edition of this publication emphasis within the petroleum industry has shifted from exploration to appraisal and development of existing hydrocarbon resources This change is reflected in this new 4th edition which has been significantly expanded to accomodate additional material The centrepiece of the book however remains a series of descriptions in stratigraphic order of the depositional history and hydrocarbon related rock units of the North Sea

The Geology of Central Europe: Mesozoic and Cenozoic Tom McCann, 2008 Volume 2 provides an overview of the Mesozoic and Cenozoic evolution of Central Europe This period commenced with the destruction of Pangaea and ended with the formation of the Alps and Carpathians and the subsequent Ice Ages Separate summary chapters on the Permian to Cretaceous tectonics and the Alpine evolution are also included The final chapter provides an overview of the fossils fuels ore and industrial minerals in the region

Permo-carboniferous Magmatism and Rifting in Europe B. Marjorie Wilson, 2004

Carboniferous Hydrocarbon Geology, 2005

Reactive Flow Modeling of Hydrothermal Systems Michael Kühn, 2004-03-24 The book introduces the topic of geochemical modeling of fluids in subsurface and hydrothermal systems The intention is to serve as a textbook for graduate students in aqueous environmental and groundwater geochemistry despite the fact that its focus is on the special topic of geochemistry in hydrothermal systems it also provides new insights for experienced researchers with respect to the topic of reactive transport The overall purpose is to give the reader an understanding of the processes that control the chemical composition of waters in hydrothermal systems and to highlight the interfaces between chemistry geothermics and hydrogeology From the reviews is a nice compact introduction to the principles of modeling coupled fluid flow and fluid mineral reactions in active geothermal systems as used for heating and electricity generation Christoph A Heinrich

ECONOMIC GEOLOGY June 2004

Dynamics of Complex Intracontinental Basins Ralf Littke, Ulf Bayer, Dirk Gajewski, Susanne Nelskamp, 2008-08-11 Sedimentary basins host among others most of our energy and fresh water resources they can be regarded as large geo reactors in which many physical and chemical processes interact Their complexity can only be well understood in well organized interdisciplinary co operations This book documents how researchers from different geo scientific disciplines have jointly analysed the structural thermal and sedimentary evolution as well as fluid dynamics of a complex sedimentary basin system which has experienced a variety of activation and reactivation impulses as well as intense salt tectonics In this book we have summarized our geological geophysical and geochemical understanding of some of the most important processes affecting sedimentary basins in general and our view on the evolution of one of the largest best explored and most complex continental sedimentary basins on Earth The Central European Basin System

Geology of the Netherlands Theo Edward Wong, D. A. J. Batjes, Jan de Jager, 2007 The

Petroleum Geology of the Southern North Sea Karen Ziegler,Stephen R. Daines,P. Turner,Peter Turner,1997 Journal of Seismic Exploration ,1998 **International Books in Print** ,1997 **The Cumulative Book Index** ,1996 A world list

of books in the English language **Sedimentary Facies Reconstruction and Kinematic Restoration of Tight Gas Fields** Anna Alexandra Vackiner,2013-03-20 The thesis of Anna Alexandra Vackiner focuses on the geometric architecture and tectonic evolution of the Permian series combining seismic interpretation 3D block field studies in an analogue basin Panamint Valley in California as well as 2D restoration of representative cross sections through time in order to illustrate the complex interaction between multiphase extension inversion and salt diapirism It will be of major interest for exploration geologists involved in tectonically complex areas Fran ois Roure August 2012 This thesis improves the understanding and localization of the Upper Rotliegend II tight gas reservoir rock facies It provides insights into the detailed Upper Rotliegend II palaeo topography and local tectonically induced sediment thickness changes prior to a multi phase tectonic overprinting The research presented in this study further focuses on the tectonically induced synsedimentary facies distribution in transtensional continental settings on the basis of a comparison with a modern field analogue which enables a detailed analysis of the reservoir rock s distribution and its properties The study is rounded off with an analysis of the influence of the multiphase tectonic overprinting on the mature Upper Rotliegend II reservoir rocks **Mesozoic Resource Potential in**

the Southern Permian Basin B. Kilhams,P.A. Kukla,S. Mazur,T. McKie,H.F. Mijnlief,K. van Ojik,2018-08-31 The Southern Permian Basin as its name suggests is a historical heartland for hydrocarbon production from the Palaeozoic Rotliegend interval However in this mature basin the Mesozoic presents further possibilities to offer resource security to NW Europe Such opportunities include increasing efficiency in the production of discovered hydrocarbons exploration for further hydrocarbons both conventional and unconventional and efficient exploration for and production of geothermal energy All these potential resources require a grounding in technically sound geoscience via traditional scientific observation and the application of new technologies to unlock their value The main aim of this volume is to bring together the work of academics and industry workers to consider cross border geoscience including contributions on Poland Germany The Netherlands the United Kingdom and adjacent areas The work presented intends to contribute to the development and discovery of further Mesozoic energy resources across the basin *Bulletin of the Geological Society of Denmark* Dansk geologisk forening,2001

The Ice Age Jürgen Ehlers,Dr. Philip Hughes,Professor Philip L. Gibbard,2016-01-19 This book provides a new look at

the climatic history of the last 2.6 million years during the ice age a time of extreme climatic fluctuations that have not yet ended This period also coincides with important phases of human development from Neanderthals to modern humans both of whom existed side by side during the last cold stage of the ice age The ice age has seen dramatic expansions of glaciers and ice sheets although this has been interspersed with relatively short warmer intervals like the one we live in today The book focuses on the changing state of these glaciers and the effects of associated climate changes on a wide variety of environments including mountains rivers deserts oceans and seas and also plants and animals For example at times the Sahara was green and colonized by humans and Lake Chad covered 350 000 km² larger than the United Kingdom What happened during the ice age can only be reconstructed from the traces that are left in the ground The work of the geoscientist is similar to that of a detective who has to reconstruct the sequence of events from circumstantial evidence The book draws on the specialisms and experience of the authors who are experts on the glacial history of the Earth Readership Undergraduate and postgraduate students studying the Quaternary researchers and anyone interested in climate change environmental change and geology The book provides a rich collection of illustrations and photographs to help the readers at all levels visualise the dramatic consequences of glacier expansions during the Ice Age **Geologica Belgica**, 2000

Paleozoic Plays of NW Europe A. A. Monaghan, J. R. Underhill, A. J. Hewett, J. A. E. Marshall, 2019-03-06 North Sea and onshore Netherlands and Germany Paleozoic hydrocarbon plays across parts of NW Europe remain relatively under explored both onshore and offshore This volume brings together new and previously unpublished knowledge about the Paleozoic plays of NW Europe to describe significant additional exploration opportunities outside and below existing plays The volume contains papers on Paleozoic plays in the North Sea Irish Sea onshore UK France and Switzerland They highlight how improvements in seismic data quality and the availability of previously unpublished well datasets form the basis for improved understanding of local to regional interpretations that move forward from generalized basin development models The improved structural trap and source rock basin definition feeds to better constrained locally variable burial uplift maturation and migration models Particularly notable are the significant mapped extents and thickness of Paleozoic source reservoir and seal rocks in areas previously dismissed as regional highs and platforms **Geology of the USSR** Viktor Efimovich Khain, 1985 Part 2
