*Structure, Culture and Agency* Tom Brock, Mark Carrigan, Graham Scambler, 2016-11-10 Professor Margaret Archer is a leading critical realist and major contemporary social theorist This edited collection seeks to celebrate the scope and accomplishments of her work distilling her theoretical and empirical contributions into four sections which capture the essence and trajectory of her research over almost four decades Long fascinated with the problem of structure and agency Archer's work has constituted a decade-long engagement with this perennial issue of social thought However in spite of the deep interconnections that unify her body of work it is rarely treated as a coherent whole This is doubtless in part due to the

unforgiving rigour of her arguments and prose but also a byproduct of sociology's ongoing compartmentalisation. This edited collection seeks to address this relative neglect by collating a selection of papers spanning Archer's career which collectively elucidate both the development of her thought and the value that can be found in it as a systematic whole. This book illustrates the empirical origins of her social ontology in her early work on the sociology of education as well as foregrounding the diverse range of influences that have conditioned her intellectual trajectory: the systems theory of Walter Buckley, the neo-Weberian analysis of Lockwood, the critical realist philosophy of Roy Bhaskar and more recently her engagement with American pragmatism and the Italian school of relational sociology. What emerges is a series of important contributions to our understanding of the relationship between structure, culture and agency. Acting to introduce and guide readers through these contributions, this book carries the potential to inform exciting and innovative sociological research.

**Shattering Silos** Lambert Zuidervart, 2022-08-15 Questions first raised by Hannah Arendt in the 1960s take on new urgency in the post truth era as political leaders blithely reject facts in the public domain Is truth politically impotent Are politics inherently false Is the search for truth still relevant Shattering Silos a companion volume to Religion Truth and Social Transformation and Art Education and Cultural Renewal provides a path breaking response As in his two previous books Lambert Zuidervart challenges the boundaries philosophers set up between epistemology ethics and political philosophy Knowledge he argues takes different forms in various social domains and all are subject to political struggle A critique of contemporary society

must draw on many social domains of knowledge including the arts and religion and should recast politics as a striving for truth in the broadest sense Proposing a new conception of truth one that emphasizes the unity of knowledge and truth as well as their diversity among different social domains Zuidervaart asks what such holism and pluralism suggest about how we understand politics and society This book proposes a new understanding of large scale social change challenging how most people think about knowledge and truth Interweaving epistemology social criticism and political thought Shattering Silos aims to help redirect an allegedly post truth society      *On Transforming Philosophy* Kai Nielsen,2019-06-04 When I first conceived of this book I intended to write a short book and one the great philosophical figures of the past and a few very eminent contemporaries aside which made no reference to other philosophers and contained no quotations footnotes and the like I ended up doing neither Indeed I went nearly to the exact opposite I wrote a rather long book with among other things extensive discussions of my contemporaries and near contemporaries      The Law of Development Cooperation Philipp Dann,2013-11-07 This comparative study of rules governing development assistance asks how accountability human rights and sovereignty are preserved while combating poverty      Social Theory of Modern Societies David Held,John Brookshire Thompson,John B. Thompson,1989-12-07 This book offers a comprehensive appraisal of the work of Anthony Giddens who is known worldwide as one of the leading figures in social theory and the social sciences During the last decade Giddens has published a series of substantial volumes which have defined a distinctive and original theoretical approach The twin focal points of his approach are the theory of structuration and the analysis of modernity Giddens s writings on these and related themes are widely recognized as among the most important contributions to theoretical debate in the social sciences Social Theory of Modern Societies is the first volume to provide a systematic and critical assessment of Giddens s contributions The volume includes eleven critical essays all of which were specially commissioned for this volume by authors who are well known in their own fields Zygmunt Bauman Richard J Bernstein Derek Gregory Nicky Gregson David Held Bob Jessop Linda Murgatroyd Peter Saunders Martin Shaw John B Thompson and Erik Olin Wright In a long concluding chapter Anthony Giddens responds to the criticisms raised by these and other authors clarifying and elaborating his current views The result is a unique and engaging book which gives both a critical evaluation of Giddens s work and a guide to some of the theoretical issues which are at the forefront of the social sciences today It will be of interest to students and academics in sociology politics and geography and to students in the social sciences and humanities generally      **The Baroque in Architectural Culture, 1880-1980** Andrew Leach,John Macarthur,2016-03-09 In his landmark volume Space Time and Architecture Sigfried Giedion paired images of two iconic spirals Tatlin s Monument to the Third International and Borromini s dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in

modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture

**The Face of the Nation** Keith Fitzgerald, 1996-04-01 This innovative work provides both a historical account of the crazy quilt of legislation dealing with immigration that Congress has passed over the years and a theoretical explanation building on the new institutionalism of how these laws came to be passed The author shows why immigration is a uniquely revealing policy arena in which a polity chooses what it will be a collective decision that shapes a nation's identity and defines itself The book focuses on three aspects of immigration policy the regulation of admission to the United States for permanent residency the regulation of admission of people fleeing political repression and the efforts to cope with the flow of unsanctioned migrants across the U S Mexico border It identifies the most puzzling features of contemporary immigration policy asking Where do these policies come from Why do they have their special characteristics The author seeks the answers in modern theories of public policy formation especially the currently popular new institutionalism He offers an enhanced version of this approach which he calls improvisational institutionalism and applies it to the paradoxes of immigration policy
