**Structural Adjustment, Global Trade, and the New Political Economy of Development** Biplab Dasgupta, 1998 The changes in the global economy are so profound this book argues that the world is now confronted with nothing less in both institutional and policy terms than a new political economy of development The author provides an intellectually commanding survey of this new terrain He subjects its economic and ideological assumptions to trenchant critique and shows how the rules of the game primarily reflect the interests of the rich and powerful countries of the North He also surveys the economic performance of the various regions of the South and explores the real reasons for the success of certain Asian economies reasons which run counter to so many of the policy prescriptions laid down by the West for the rest of the South

**The Political Economy of Imperialism** Ronald M. Chilcote, 2012-12-06 This book brings together important essays by distinguished scholars who have devoted past attention to the study of imperialism and development It complements an anthology of previously published essays that brings together important theoretical perspectives around the issues and debates on these themes this volume will be published by Humanity Press forthcoming Both projects relate to a lengthy chapter Theories of Imperialism which will be published in my book Theories of Comparative Political Economy Forthcoming These projects represent a culmination of many years of teaching in both economics and political science During that time I taught two political science courses on development and under development but I was unable to convince my colleagues of the usefulness of a course on imperialism that linked historical issues and debates with the more recent developmental literature When in 1990 I was welcomed into economics my colleagues endorsed a graduate seminar on the political economy of imperialism Thus this volume evolved out of that experience in an effort to encourage new analysis that reflects retrospectively on past contributions as well as the prospects for imperialism and development in the contemporary world

**Marxist Perspectives on South Korea in the Global Economy** Martin Hart-Landsberg, Seongjin Jeong, Westra Richard, 2017-03-02 This volume brings together work by international scholars to provide a unique analysis of the past present and possible future trajectory of Korea's political economy from a distinctly Marxist perspective The volume differentiates the Marxian approach to the political economy of Korean development from the Keynesian social democratic

approach that currently dominates the critical literature In doing so the volume provides a unique view of the development of the South Korean Economy      **Oxford Handbook of the International Monetary Fund** ,2024-10-07 The International Monetary Fund IMF is a pivotal institution in global economic governance tasked with ensuring monetary stability and preventing financial crises through promoting balanced trade economic growth and poverty reduction It also plays a powerful normative role by shaping economic policies worldwide through its research and expertise The IMF played a crucial role in managing crises like the 2008 financial crisis and the COVID 19 pandemic providing significant financial aid and advocating for stimulus measures However the IMF faces both internal and external challenges from reforming its governance structure to better represent emerging economies to finding its place in a world increasingly defying liberal internationalism and multilateralism Despite reforms power remains concentrated among advanced economies hindering inclusivity and trust particularly in regions like sub Saharan Africa Geopolitical tensions populist nationalism and economic imbalances further strain the IMF s effectiveness This handbook aims to uncover these challenges by providing diverse perspectives and proposing policy recommendations that the Fund could undertake to better navigate the complex landscape of 21st century global governance Part I delves into its historical origins and key debates of the IMF Part II focuses on formal operations such as lending surveillance and capacity development Part III explores the involvement of different actors including states markets and civil society Part IV discusses partnerships with other international organizations and collaboration in financial regulation Part V analyzes shifts in policy instruments and ideological frameworks Part VI broadens concerns to include gender mainstreaming labor markets climate policy and inclusive growth Part VII addresses internal challenges including cultural diversity concerns and uniformity of treatment Part VIII evaluates external challenges such as populist movements China s influence global inequality and unresolved issues in Europe Part IX explores how the IMF can meet the multiple challenges identified in this volume and positively impact 21st century global governance      **New Perspectives on Globalization and Antiglobalization** Henry Veltmeyer,2016-12-05 This completely revised and updated sequel to Globalization and Antiglobalization advances our understanding of the dynamics of neoliberal globalization and draws our attention towards efforts to construct another world beyond neoliberalism To advance our understanding of these forces and associated processes the collection brings together eleven specialists in the political economy of international relations and globalization to reflect on and analyze the diverse dimensions of the globalization process Taking into account significant developments in the dynamics of globalization and antiglobalization over the past years it includes a new introduction and a new conclusion as well as eight entirely new chapters contributed by authors as diverse and different in their perspectives as James Petras Walden Bello Norman Girvan Paul Bowles Terry Gibbs Lisa Thompson and Teivo Teivainen These dynamics are contextualized with essays on the Caribbean Latin America East Asia and Southern Africa This is an invaluable volume for students academics and activists concerned with creating a truly new world order      Political

Economy and Globalization Richard Westra, 2009-09-30 Based upon distinguishing capitalism from other economic systems as well as analysis of capitalist change across its stages of development Richard Westra argues that the economic tendencies we refer to as globalization constitute a world historic transition away from capitalism Westra forcefully rejects claims from both Right and Left sides of economic debate that globalization embodies the ultimate world diffusion of capitalism He concludes that the choice facing humanity is no longer between capitalism and socialism but between socialism and global barbarism The argument is meticulously interwoven through four key foci of political economy The role of Marx's Capital in producing knowledge of capitalism The periodizing of capitalism and study of its historical models The altering trajectories of production and finance under current globalization The place of socialism in a progressive future A central point of the book is that determinations over the capitalist substance of existing economies demand precise understanding of how in its basic operation capitalism manages to secure the economic reproducibility of human society in the first place To make the case for the passing of capitalism from history the volume draws upon the novel Japanese Uno approach to Marxian political economy From the pages of Political Economy and Globalization emerges a grim picture of our human future should current economic trends persist It also offers a positive vision for socio material betterment in redistributive eco sensitive socialist societies of tomorrow This is a must read book for scholars students progressive policy makers and activists **QUALITY OF HUMAN**

Telfer, 2002-04-30 The development of tourism is frequently justified on the basis of its potential contribution to the broader socio economic development of destination areas Indeed tourism is generally considered an effective vehicle of development yet the meaning and objectives of development and the extent to which it can be achieved through tourism is rarely questioned Moreover the relationship between tourism and

development remains an under represented area of study and research This book addresses this gap in the literature by challenging many of the widelyheld assumptions about tourism s developmental contribution In the first part a theoretical link is established between the discrete yet interconnected disciplines of tourism studies and development studies More specifically the meaning of development and successive development paradigms are considered within the context of tourism This provides a conceptual foundation for the second part of the book which addresses a number of fundamental issues related to tourism s potential contribution to development These include issues of economic development regional development socio cultural development and environmental development Finally the third part focuses upon barriers to tourism induced development arguing that a new political economy of tourism the consumption of tourism and the dominance of the sustainable development paradigm represent significant counterpoints to overly simplistic models of tourism s potential contribution to development
