Structural Adjustment in Developed Open Economies Douglas Hague, Karl Jungenfeldt, 1985-08-12 **Structural Adjustment in Developed Open Economies** Karl Jungenfeldt, 1985-01-01 **Structural adjustment in developed open economies** Douglas Hague, 1985 *Innovation Capabilities and Economic Development in Open Economies* Vanessa Casadella, Zeting Liu, Dimitri Uzunidis, 2015-10-19 The innovation capacity building can contribute to improve the integration of developing countries in the world economy The economic development has been a much discussed subject of the period after the Second World War until the 1990s After the implementation of a global regulation system for trade and capital flows in the 1990s the development economics has almost disappeared in favor of different theories on globalization on finance and on international trade The purpose of this book is to show that the innovation capacity building in developing countries is necessary to improve their weight in the world economy and to facilitate their economic ties with northern countries However there are important difficulties due to the lack of proactive economic policies Our aim is to contribute to the revival of the development economics The issue of improving the well being of the world population as a whole is highly topical However studies neglect the need to give economic financial technological and political resources to developing countries to promote their own development One of the most important means is to strengthen their innovation capabilities that allow them to better integrate into the world economy *Controlled Open Economies* David Bevan, Paul Collier, Jan Willem Gunning, 1990 This book develops macroeconomic theory for small open economies characterized by the sort of controls which make much of existing neoclassical economics inapplicable to developing countries The applicability of this theory is demonstrated in an analysis of two temporary trade shocks in Africa *International Handbook of Development Economics* Amitava Krishna Dutt, Jaime Ros, 2008-01-01 The essays are concise yet comprehensive and each essay contains a substantial set of references which an interested researcher or student could follow up In addition to representing multidisciplinary interactions this collection encompasses several different perspectives within development economics so the reader can learn for example both about neoclassical approaches and dependency theories in the same volume This makes the collection unique and all the more valuable This is a very good reference collection as the individual essays are informative and provide a good overall perspective on the topic that they set out to address The extensive bibliography at the end of each essay adds further value to this collection Ashwini Deshpande Economic and Political Weekly These new volumes impress along two dimensions First they highlight important connections between economic development and variables such as culture warfare and ethnicity which are sometimes ignored by mainstream economists Second they analyze the economic development experience of different regions such as Africa Latin America and East Asia a valuable reference for scholars and practitioners in the field Highly recommended H A Faruq Choice This two volume original reference work provides a comprehensive overview of development economics and comprises contributions by some of the leading scholars working in the field Authors

are drawn from around the world and write on a wide range of topics After providing an introduction to the subject by examining issues like the meaning and measurement of development historical and interdisciplinary approaches empirical regularities and data problems the contributors provide a wealth of perspectives on and analyses of development economics They discuss alternative approaches to development the macroeconomics of growth factors and sources of economic development such as capital labor entrepreneurship resources and technology major sectors of concern such as agriculture industry services and the informal sector and international issues such as trade capital and labor flows and technology transfers Income distribution and poverty the state and other institutions and actual development experiences are explored The contributors provide analytical contributions as well as the relation between these contributions and real world and policy issues from a variety of alternative perspectives Scholars students policymakers and other development practitioners will all find this comprehensive reference invaluable
