**Computer-Aided Design of User Interfaces VI** Victor Lopez Jaquero, Francisco Montero Simarro, Jose Pascual Molina Masso, Jean Vanderdonckt, 2010-03-10 Computer Aided Design of User Interfaces VI gathers the latest experience of experts research teams and leading organisations involved in computer aided design of user interactive applications This area investigates how it is desirable and possible to support to facilitate and to speed up the development life cycle of any interactive system requirements engineering early stage design detailed design development deployment evaluation and maintenance In particular it stresses how the design activity could be

better understood for different types of advanced interactive ubiquitous computing and multi device environments

Generalized Topology Optimization for Structural Design Yi Min Xie, 2025-06-21 This book challenges many assumptions commonly used in structural topology optimization These assumptions include 1 to find the unique and globally optimal solution the best design 2 under prescribed support conditions 3 for given loading conditions 4 within a predetermined design domain and 5 without considering the designer's aesthetic preferences Through a systematic discussion and numerous examples this book clearly shows that the traditional assumptions are not only unnecessary but also imposing severe limitations on design freedom and hindering creativity in structural design The generalized topology optimization framework presented in this book breaks the mold of many conventional thoughts in structural topology optimization The new framework will enable topology optimization techniques to solve a much wider range of practical problems This book appeals to researchers and graduate students working in structural design and optimization and is of interest to civil and structural engineers architects mechanical engineers and product designers involved in creating innovative and efficient structures This book is open access
