Structural Semantics An Attempt At A Method:

Structural Semantics Algirdas Julien Greimas, 1983 *Structural Semantics: an Attempt at a Method; Translated by Daniele McDowell and Others* A.J. Greimas, 1983 **Methods of Text and Discourse Analysis** Stefan Titscher, 2000-09-22

This volume is the most comprehensive overview to date of sociologically orientated approaches to text and discourse analysis and is worth reading even for those who are interested only in purely linguistic approaches to text and discourse. Its main merit I think is that it introduces approaches which up to now have hardly been admitted into the universe of scientific discourse. *Discourse Studies: Methods of Text and Discourse Analysis* provides the most comprehensive overview currently available of linguistic and sociological approaches to text and discourse analysis. Among the 10 linguistic and sociological models surveyed in this book, some of the more important are Grounded Theory, Content Analysis, Conversation Analysis, and Critical Discourse Analysis. The book presents each approach according to a standardised format which allows for direct systematic comparisons. The fully annotated lists of sources provide readers with an additional means of evaluation of the competing analytical methods. Interdisciplinary and international in its aims, *Methods of Text and Discourse Analysis* suggests the benefits both linguists and sociologists will derive from a more intimate knowledge of each other's methods and procedures.

Discourse and Psychology Saumya Sharma, 2019-09-06 This book presents a unique understanding of the interdependence between language and psychology and how one's speech is shaped by and in turn shapes one's thoughts, beliefs, and emotions. Drawing on the tenets of discourse analysis and psychology, it presents a comprehensive guide to a new and burgeoning area in linguistics and critical theory. The volume focusses on individual and group behaviour to show how identity formation is as much dependent on the psychological state as on social surroundings and context. It introduces various concepts from the sociocognitive framework, discursive and critical psychology, highlighting the myriad ways of approaching the complex interface between text, sociocultural factors, and cognitive processes. An indispensable guide to the complex world of language and the unconscious, the volume will be of interest to students and scholars of linguistics, applied linguistics, sociolinguistics, psychology, and behavioural science, language and critical theory. It is also a must-read for the general reader interested in language communication and social intelligence.

Interpretive Approaches to Policy Analysis Raul P. Lejano, Wing Shan Kan, 2025-03-19 This Brief provides researchers with an introduction to interpretive approaches for analyzing public policies. It introduces several real-world policy situations where the lack of an interpretive focus limits the analysis and precludes better policy responses. It takes an integrative point of view with an openness to combining the insights from interpretive and positivist approaches in policy analysis, noting the ability of the interpretive approach to make sense of data while uncovering the otherwise hidden ideological and normative bases of other types of analyses. While not a how-to methods book, this Brief provides sufficient discussion of different ways to find meaning in texts such as narrative and discourse analysis or cultural ethnographic readings of the social and material artifacts found in a place as well as

uncovering meaning from direct engagement with subjects through interviews action research and other strategies The main intent of the book is to convince policy scholars of the usefulness of interpretive thinking which entails answering the questions what does it mean to interpret and what do we gain from interpreting As such this Brief will be of interest to scholars in public policy public administration and political science as well as researchers in applied fields e g environmental studies race and gender studies urban planning sociology engaged in policy analysis **Reading Second Peter with New Eyes**

Eavesdropping in the Novel from Austen to

Proust Ann Gaylin, 2003-01-16 Eavesdropping in the Novel from Austen to Proust investigates human curiosity and its representation in eavesdropping scenes in nineteenth century English and French novels Ann Gaylin argues that eavesdropping dramatizes a primal human urge to know and offers a paradigm of narrative transmission and reception of information among characters narrators and readers Gaylin sheds light on the social and psychological effects of the nineteenth century rise of information technology and accelerated flow of information as manifested in the anxieties about and delight in displays of private life and its secrets Analysing eavesdropping in Austen Balzac Collins Dickens and Proust Gaylin demonstrates the flexibility of the scene to produce narrative complication or resolution to foreground questions of gender and narrative agency to place the debates of privacy and publicity within the literal and metaphoric spaces of the nineteenth century novel This 2003 study will be of interest to scholars of nineteenth century English and European literature

The Uncertainty of Analysis Timothy J. Reiss, 2018-10-18 The Uncertainty of Analysis pursues key issues raised in the author's earlier Discourse of Modernism a ground breaking work which focused attention on the nature of discourse and the ways in which one culturally dominant discursive class may be replaced by another In this timely and provocative collection of his essays Timothy J Reiss shows how efforts to reconfirm the force and

power of modernist analytico referential discourse in the late nineteenth and the twentieth centuries have actually brought to the fore internal contradictions have made clear the problematic nature of the dominant discourse and have precipitated the emergence of competing discourses Reiss considers the explorations in foundational logic by Frege and Peirce examinations of language and its relations to mind by Saussure Greimas and Chomsky work in linguistic and scientific epistemology by Wittgenstein and Heisenberg and the attempts to analyze the nature of society by Sartre and other Western Marxists Reiss turns to some practitioners of literary criticism and theory who have sought to escape past constraints and he points to what appear to be erroneous routes away from the dilemmas raised by these philosophers and critics

Interpreting Networks

David J. Krieger, Andréa Belliger, 2014-06-15 After postmodern critique has deconstructed decentered and displaced order and identity on all levels we are faced with the Humpty Dumpty question of how to put the pieces back together again This book brings together the seldom associated discourses of hermeneutics actor network theory and new media in order to formulate a theory of a global network society Hermeneutics re opens the question of unity in a fragmented world Actor network theory reinterprets the construction of meaning as networking New media studies show how networking is done Networks arise are maintained and are transformed by communicative actions that are governed by network norms that make up a social operating system The social operating system offers an alternative to the imperatives of algorithmic logic functionality and systemic closure that dominate present day solutions to problems of over complexity in all areas The world of meaning constructed by the social operating system is a mixed reality in which filters and layers replace the physical restraints of space and time as parameters of knowing and acting Society and nature humans and non humans come together in a socio sphere consisting of hybrid heterogeneous actor networks This book proposes reinterpreting hermeneutics as networking and networking as guided by a social operating system whose norms are based on new media There emerges a theory for a global network society described by different concepts than those typical of Western modernity
