**Structural Traps: Tectonic and nontectonic fold traps** Edward A. Beaumont, Norman H. Foster, 1990      Structural Traps IV,      The Biomarker Guide K. E. Peters, C. C. Walters, J. M. Moldowan, 2005 The second edition of The Biomarker Guide is a fully updated and expanded version of this essential reference      **The Biomarker Guide: Volume 2, Biomarkers and Isotopes in Petroleum Systems and Earth History** K. E. Peters, C. C. Walters, J. M. Moldowan, 2007-08-16 The second edition of The Biomarker Guide is a fully updated and expanded version of this essential reference Now in two volumes it provides a comprehensive account of the role that biomarker technology plays both in petroleum exploration and in understanding Earth history and processes Biomarkers and Isotopes in Petroleum Exploration and Earth History itemizes parameters used to genetically correlate petroleum and interpret thermal maturity and extent of biodegradation It documents most known petroleum systems by geologic age throughout Earth history The Biomarker Guide is an invaluable resource for geologists petroleum geochemists biogeochemists and environmental scientists

Evaporites: Sediments, Resources and Hydrocarbons John K. Warren, 2006-06-12 Comprehensive discussion of the role of evaporites in hydrocarbon generation and trapping Excellent introduction in the field      *Evaporites* John K. Warren, 2016-05-18 The monograph offers a comprehensive discussion of the role of evaporites in hydrocarbon generation and trapping and new information on low temperature and high temperature ores It also provides a wealth of information on exploitable salts in a comprehensive volume has been assembled and organized to provide quick access to relevant information on all matters related to evaporites and associated brines In addition there are summaries of evaporite karst hazards exploitative methods and problems that can arise in dealing with evaporites in conventional and solution mining This second edition has been revised and extended with three new chapters focusing on ore minerals in different temperature settings and a chapter on meta evaporites Written by a field specialist in research and exploration the book presents a comprehensive overview of the realms of low and high temperature evaporite evolution It is aimed at earth science professionals sedimentologists oil and gas explorers mining geologists as well as environmental geologists      **Geophysics, the Leading Edge of Exploration**, 1992-07      *Sedimentary Environments Offshore Norway-Palaeozoic to Recent* O.J. Martinsen, T. Dreyer, 2001-06-06 Required reading for geologists working in the offshore areas Volume 10 continues the series from the Norwegian Petroleum Society This work provides an up to date review of the late Palaeozoic to present sedimentary history of the Norwegian offshore areas in the North Sea and Mid Norway basins Case studies overview articles and analogue examples from adjacent areas such as Greenland and Denmark present new ideas on the development of the Norwegian margin from the Carboniferous through the Mesozoic and Cenozoic In particular new evidence and interpretations are presented on well known major reservoir bearing successions such as the Statfjord Formation and Dunlin Group in the Northern North Sea and the re and the Tilje Formations in the Mid Norway area Furthermore the Upper

Jurassic succession in the Haltenbanken area is described giving new evidence on the interplay between extensional tectonics and sedimentation during the second major rift phase in the area The Cretaceous and Cenozoic periods are treated extensively showing their importance as overall deep water sedimentary systems with proven and potential reservoir rocks such as in the Ormen Lange Field and for causing burial of Jurassic rocks to advantageous depths for hydrocarbon generation The Recent sedimentary history of the Norwegian margin is treated with examples of the glacial history and giant submarine slides which understanding is vital for the placement of offshore installations The book is organised based on geologic time from Palaeozoic through Mesozoic to Cenozoic examples It includes a set of palaeogeographic maps from the Carboniferous through to the Cenozoic In addition there are numerous examples of core photographs well log data correlation panels and seismic as well as outcrop photographs and logs from the analogue examples Comprehensive reference and keyword lists are also included

**Controls on Carbonate Platform and Reef Development** Jeff Lukasik, Juan Antonio Simo, 2008 Carbonate platforms and reefs emerge grow and die in response to intrinsic and extrinsic mechanisms forced primarily by tectonics oceanography climate ecology and eustasy These mechanisms or controls create the physical biological and chemical signals accountable for the myriad of carbonate depositional responses that together form the complex depositional systems present in the modern and ancient settings If we are to fully comprehend these systems it is critical to ascertain which controls ultimately govern the life cycle of carbonate platforms and reefs and understand how these signals are recorded and preserved Deciphering which signals produce a dominant sedimentological response from the plethora of physical and biological information generated from superimposed regional to global scale controls is critical to achieving this goal With this understanding it may be possible to extract common time and space independent depositional responses to specific mechanisms that may ultimately be used in a productive sense Extensive research on a wide variety of carbonate platform and reefal systems in the past few decades has provided the foundation and understanding necessary to take carbonate research to a new level With assistance from rapidly advancing computer software and an increasing use of cross disciplinary integration carbonate research is shifting from description and morphological analysis towards a science that is more focused on the assessment of process and genetic relationships The aim of this special publication is to present a cross section of recent research that shows this evolution from a variety of perspectives and scales using examples distributed throughout the Phanerozoic
