Social Psychology and Everyday Life Darrin Hodgetts, Otilie Stolte, Christopher Sonn, Neil Drew, Stuart Carr, Linda Waimarie Nikora, 2020-02-04 This ground breaking and innovative textbook offers a uniquely global approach to the study of social psychology. Inclusive and outward looking the authors consciously re orientate the discipline of social psychology promoting a collectivist approach. Each chapter begins with an illustrative scenario based on everyday events from visiting a local health centre to shopping in a supermarket which challenges readers to confront the issues that arise in today's diverse multicultural society. This textbook also gives a voice to many indigenous psychologies that have been excluded from the mainstream discipline and provides crucial coverage of the colonization experience. By integrating core social psychology theories and concepts with critical perspectives *Social Psychology and Everyday Life* provides a thought provoking introduction suitable for both undergraduate and postgraduate students of social psychology and community psychology. It can also be used by students in related subjects such as sociology criminology and other social sciences. Accompanying online resources for this title can be found at bloomsburyonlineresources.com/socialpsychology. These resources are designed to support teaching and learning when using this textbook and are available at no extra cost. *The Textures of Time* Michael G. Flaherty, 2011 What do we mean when we say I made the time pass more quickly or I'm creating some me time? In *The Textures of Time* Michael Flaherty examines how we alter or customize our experience of time. His detailed analysis reveals different strategies we use to try to manipulate time further describing and defining those strategies within six discrete time categories: Duration, Frequency, Sequence, Timing, Allocation, and Taking Time. Using in depth interviews and analyzing responses through a sociological lens Flaherty unearths folk theories and practices which he calls time work that construct circumstances in order to provoke desired forms of temporal experience. As such time is not just inflicted on us rather its various textures result from our intervention and or from our efforts to create different forms of temporal experience. These first person accounts also highlight ongoing tensions between agency and determinism in social groups. Ultimately in keeping with his central thesis Flaherty's lucid prose make this book a quick read and the strategies he describes reveal the profound

and inventive ways we manage the clock *Domination and Subjugation in Everyday Life* Lonnie Athens, 2017-07-05

Reputable scholars have long charged that symbolic interactionism which is based on the principle of sociality discounts the importance that subordination plays in human groups Emphasizing dominance and power Athens explains how subordination operates in human group life from a new interactionist's perspective aptly dubbed by him radical interactionism Expanding on the work of sociologist Robert E Park Athens explains the nature and operation of super ordination and subordination which he believes affects all social interaction between human beings and groups He then develops a generic framework and a common terminology to help explain all forms of social conflicts Athens argues that a radical interactionism disentangles the nature of domination power and force as well as the relationship among them in a manner consistent with the basic premises of the Chicago school of pragmatism This book offers a provocative and intelligent outline of the development and evolution of radical interactionism a perspective interactionists can add to their toolbox with profit *Evolutionary and Interpretive Archaeologies* Ethan Cochrane, Andrew Gardner, 2016-09-16

This collection of original articles compares various key archaeological topics agency violence social groups diffusion from evolutionary and interpretive perspectives These two strands represent the major current theoretical poles in the discipline By comparing and contrasting the insights they provide into major archaeological themes this volume demonstrates the importance of theoretical frameworks in archaeological interpretations Chapter authors discuss relevant Darwinian or interpretive theory with short archaeological and anthropological case studies to illustrate the substantive conclusions produced The book will advance debate and contribute to a better understanding of the goals and research strategies that comprise these distinct research traditions

Social Work and Sociology: Historical and Contemporary Perspectives Irene Levin, Marit Haldar, Aurélie Picot, 2018-02-05 Discussing the relationship between social work and sociology this book explores how the two have become more and more divided moving from one single discipline to two separate but related fields Both sociology and social work focus on social problems social structure social integration and how individuals respond to and live within cultural and structural constraints Today both disciplines face the possibility of losing some of their most important characteristics to individualising trends the disappearance of the importance of the social and pressure towards solely evidence based knowledge In addition to casting light on areas that have been in the shadows of the mainstream narrative the contributions to this book will raise new questions contributing to continuing discussions between and within each discipline This book was originally published as a special issue of Nordic Social Work Research

Conversations on Irving Street: Josiah Royce's Contribution to Symbolic Interactionism Darrick Lee Brake, 2019-07-15 What influence did Josiah Royce's academic work 1913-1917 have on the development of classical Symbolic Interactionist thought And which philosophical influences shaped Royce's social and philosophical thought This book provides a holistic approach to Royce's academic work and the social philosophy that shaped Symbolic Interactionist theory By critically evaluating the works of Royce this book reveals how his ideas and social philosophy made significant contributions to both Symbolic Interactionist thought and sociological theory Situating his contributions within a socio-historical time frame Royce's social philosophy is compared and contrasted to the major concepts of George Herbert Mead *Mind Self and Society* and Herbert Blumer's core synthesized components of classical symbolic interactionist thought Symbolic Interactionism Perspective and Method Thus demonstrating that Royce's later academic works closely resemble not only the basic ideas of Mead but also have a strong correspondence with Blumer's synthesis of the three basic premises and eight root images that outline the theoretical core of Symbolic Interactionist thought For those looking to investigate or discover new aspects of symbolic interactionist theory from a classical viewpoint this book offers a unique insight into an American philosopher whose contribution to the development of Symbolic Interactionism has been largely unnoticed

Jewish Cultural Studies Simon J. Bronner, 2021-05-04 Defines the distinctive field of Jewish cultural studies and its basis in folkloristic psychological and ethnological approaches Jewish Cultural Studies charts the contours and boundaries of Jewish cultural studies and the issues of Jewish culture that make it so intriguing and necessary not only for Jews but also for students of identity ethnicity and diversity generally In addition to framing the distinguishing features of Jewish culture and

the ways it has been studied and often misrepresented and maligned Simon J Bronner presents several case studies using ethnography folkloristic interpretation and rhetorical analysis Bronner building on many years of global cultural exploration locates patterns processes frames and themes of events and actions identified as Jewish to discern what makes them appear Jewish and why Jewish Cultural Studies is divided into three parts Part 1 deals with the conceptualization of how Jews in complex heterogeneous societies identify themselves as a cultural group to non Jews and vice versa such as how the Jewish home is socially and materially constructed Part 2 delves into ritualization as a strategic Jewish practice for perpetuating peoplehood and the values that it suggests for example the rising popularity of naming ceremonies for newborn girls simhat bat or zeved habat in the twenty first century Part 3 explores narration including the global transformation of Jewish joking in online settings and the role of Jews in American political culture Bronner reflects that a reason to separate Jewish cultural studies from the fields of Jewish studies and cultural studies is the distinctiveness of Jewish culture among other ethnic experiences As a diasporic group with religious ties and varying local customs Jews present difficulties of categorization He encourages a multiperspectival approach that considers the Jewish double consciousness as being aware of both insider and outsider perspectives participation in ancient tradition and recent modernization and the great variety and stigmatization of Jewish experience and cultural expression Students and scholars in Jewish studies cultural studies ethnic religious studies folklore sociology psychology and ethnology are the intended audience for this book

The Interactionist Imagination

Michael Hviid Jacobsen, 2017-07-01 This book outlines the history and developments of interactionist social thought through a consideration of its key figures Arranged chronologically each chapter illustrates the impact that individual sociologists working within an interactionism framework have had on interactionism as perspective and on the discipline of sociology as such It presents analyses of interactionist theorists from Georg Simmel through to Herbert Bulmer and Erving Goffman and onto the more recent contributions of Arlie R Hochschild and Gary Alan Fine Through an engagement with the latest scholarship this work shows that in a discipline often focused on macrosocial developments and large scale structures the interactionist perspective which privileges the study of human interaction has continued relevance The broad scope of this book will make it an invaluable resource for scholars and students of sociology social theory cultural studies media studies social psychology criminology and anthropology

Handbook of Constructionist Research

James A. Holstein, Jaber F. Gubrium, 2013-10-21 Constructionism has become one of the most popular research approaches in the social sciences But until now little attention has been given to the conceptual and methodological underpinnings of the

constructionist stance and the remarkable diversity within the field This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research how it is put into practice in multiple disciplines and where it may be headed in the future The volume critically examines the analytic frameworks strategies of inquiry and methodological choices that together form the mosaic of contemporary constructionism making it an authoritative reference for anyone interested in conducting research in a constructionist vein *Oppression and Resistance* Gil Richard Musolf, 2017-09-07 Theoretical and ethnographical approaches examine symbolic interactionism s ability to deploy the concepts of structure and agency in sociological explanation It illuminates the dialectic of oppression and resistance in everyday life illustrating that actors make meaning through resistance *Studies in Symbolic Interaction* Norman K. Denzin, 2012-10-31 The essays in this bi annual series consist of original research and theory within the general sociological perspective known as symbolic interactionism Longer than conventional journal length articles the essays wed micro and macro concerns within a qualitative ethnographic autoethnographic and performance studies orientation *Rethinking the Individualism-Holism Debate* Julie Zahle, Finn Collin, 2014-06-05 This collection of papers investigates the most recent debates about individualism and holism in the philosophy of social science The debates revolve mainly around two issues firstly whether social phenomena exist sui generis and how they relate to individuals This is the focus of discussions between ontological individualists and ontological holists Secondly to what extent social scientific explanations may and should focus on individuals and social phenomena respectively This issue is debated amongst methodological holists and methodological individualists In social science and philosophy both issues have been intensively discussed and new versions of the dispute have appeared just as new arguments have been advanced At present the individualism holism debate is extremely lively and this book reflects the major positions and perspectives within the debate This volume is also relevant to debates about two closely related issues in social science the micro macro debate and the agency structure debate This book presents contributions from key figures in both social science and philosophy in the first such collection on this topic to be published since the 1970s **Framing Jewish Culture** Simon J. Bronner, 2014-01-01 Modernity offers people choices about who they want to be and how they want to appear to others The way in which Jews choose to frame their identity establishes the dynamic of their social relations with other Jews and non Jews a dynamic complicated by how non Jews position the boundaries around what and who they define as Jewish This book uncovers these processes historically as well as in contemporary behavior and finds explanations for the various manifestations in feeling and action of being Jewish Boundaries and borders raise fundamental questions about the difference between Jews and non Jews At root the question is how Jewish is understood in social situations where people recognize or construct boundaries between their own identity and those of others The question is important because this is by definition the point at which the lines of demarcation between Jews and non Jews and between different groupings of Jews are negotiated Collectively the contributors to the book expand our

understanding of the social dynamics of framing Jewish identity The book opens with an introduction that locates the issues raised by the contributors in terms of the scholarly traditions from which they have evolved Part I presents four essays dealing with the construction and maintenance of boundaries two by scholars showing how boundaries come to be etched on an ethnic landscape and two by activists who question and adjust distinctions among neighbors Part II focuses on expressive means of conveying identity and memory while in Part III the discussion turns to museum exhibitions and festive performances as locations for the negotiation of identity in the public sphere A lively discussion forum concludes the book with a consideration of the paradoxes of Jewish heritage revival in Poland and the perception of that revival by Jews and non Jews
