The Structure of Religious Knowing John D. Dadosky,2004 The Structure of Religious Knowing, a Dialectical Reading of Eliade's Notion of the Sacred Through Lonergan's Theory of Consciousness ,2001 Gnosticism and the History of Religions David G. Robertson,2021-08-12 Building on critical work in biblical studies which shows how a historically bounded heretical tradition called Gnosticism was invented this work focuses on the following stage in which it was essentialised into a sui generis universal category of religion At the same time it shows how Gnosticism became a religious self identifier with a number of sizable contemporary groups identifying as Gnostics today drawing on the same discourses This book provides a history of this problematic category and its relationship with scholarly and popular discourse on religion in the twentieth century It uses a critical historical method to show how and why Gnosis Gnostic and Gnosticism were taken up by specific groups and individuals practitioners and scholars at different times It shows how ideas about Gnosticism developed in late nineteenth and twentieth century scholarship drawing from continental phenomenology Jungian psychology and post Holocaust theology to be constructed as a perennial religious current based on special knowledge of the divine in a corrupt world David G Robertson challenges how scholars interact with the category Gnosticism and contributes to our understanding of the complex relationship between primary sources academics and practitioners in category formation

On Faith, Rationality, and the Other in the Late Middle Ages Gergely Tibor Bakos, 2011-01-01 On Faith Rationality and the Other in the Late Middle Ages is an investigation of Nicholas of Cusa that seeks a deeper understanding of this important medieval intellectual and his importance for us today One of Gergely Bakos s primary aims in this study is to understand Nicholas of Cusa's important and underexamined dimensions of his approach to dialogue with Islam The framework and the methodology that informs this investigation was inspired by the late Professor Jos Decorte 1954 2001 a Flemish philosopher and mediaevalist at the Catholic University of Leuven in Belgium Bakos carefully exposits his method of approaching medieval thought Part One and then applies and tests this method in practice Part Two The most extensive part of this study offers a sketch of the historical background of Nicholas's dialogue with Islam and investigates what possibilities this approach offers All of this is placed in dialogue with two other mediaeval approaches to Islam Thomas Aguinas and Ramon Lull The final chapters discuss Nicholas of Cusa's project from a perspective offered by his mystical theology The book culminates in an exploration of the possibilities of Nicholas of Cusa's approach by testing the framework of the study Finally the author evaluates the application of his own approach Part Three The study ultimately has two purposes to contribute to a better understanding of Nicholas of Cusa's thought on the one hand and on the other to test a particular methodology and interpretative framework for the understanding of mediaeval culture Experiencing the Knowing of Faith Sharon Warner, 2000 What is religious faith And how does modern society view truth Sharon Warner in Experiencing the Knowing of Faith discusses the understanding formed by deep truth or knowledge intrinsic to a person s self identity She

critiques today s susceptibility to the paradigm of Cartesian dualities such as mind body and subject object and in doing so utilizes the philosophy of Alfred North Whitehead and Michael Polanyi Concluding with an exploration of the relevance of this theory for teaching faith the work will be of great use to religious scholars and to philosophers **Between Psychology** and Psychotherapy (Psychology Revivals) Miller Mair, 2013-10-31 In this highly original and thought provoking work the late Miller Mair puts forward his ideas for a new psychology First published in 1989 he deals with issues of fundamental importance to the future of a psychology guided by genuine enquiry and concern rather than mere professional self interest Crossing and re crossing boundaries between psychology psychotherapy and philosophy and between science and art he demonstrates the linkages between the personal and the impersonal subject and object inside and outside with a daring not previously risked by anyone working in the area Dr Mair stresses the importance of a poetic approach in psychology and psychotherapy and the need to explore and understand the nature of psychology through an imaginative freedom of language He emphasizes that a poetic awareness and attentiveness is fundamental to any pursuit of understanding of ourselves or others This is a very personal book concerned with personal knowledge but it is meant for anyone who seeks to understand themselves and others and what is involved in coming to such understanding Focusing on ordinary human experience and moving towards literary and artistic modes of expression the author invites you to enter in follow what you think and feel as he proposes a radical revision of much that is accepted in psychology and in psychotherapy The "Language game" of confessing one's belief Mary-John Mananzan, 2012-05-10 Over the past few decades the book series Linguistische Arbeiten Linguistic Studies comprising over 500 volumes has made a significant contribution to the development of linguistic theory both in Germany and internationally The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses To this end we invite submission of high quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions discuss new data and advance the development of linguistic theory Anarcho-primitivism, Theology of Louis Massignon Christian S. Krokus, 2017 In The Theology of Louis Massignon author Christian Krokus argues that Louis Massignon's achievements in Christian Muslim understanding his activism on behalf of Muslim immigrants refugees and Middle Eastern Christians as well as his developing understanding of Islam must be understood in the light of his Catholic convictions in relation to God Christ and the Church With ample references to primary works many translated into English for the first time Krokus offers a comprehensive account of the main points of Massignon's religious thought that will prove essential to theologians and historians working on questions of Christian Muslim dialogue comparative theology and religious pluralism The Eclipse and Recovery of Beauty John D. Dadosky, 2014-01-01 Inspired by Bernard Lonergan's philosophy of consciousness Dadosky presents a philosophy of beauty that is grounded in contemporary Thomistic thought Responding to Balthasar he argues for a concept of beauty that can be experienced understood judged created contemplated and even loved **Shattering Silos** Lambert Zuidervaart, 2022-08-15 Questions first raised by Hannah Arendt in the 1960s take on new urgency in the post truth era as political leaders blithely reject facts in the public domain Is truth politically impotent Are politics inherently false Is the search for truth still relevant Shattering Silos a companion volume to Religion Truth and Social Transformation and Art Education and Cultural Renewal provides a path breaking response As in his two previous books Lambert Zuidervaart challenges the boundaries philosophers set up between epistemology ethics and political philosophy Knowledge he argues takes different forms in various social domains and all are subject to political struggle A critique of contemporary society must draw on many social domains of knowledge including the arts and religion and should recast politics as a striving for truth in the broadest sense Proposing a new conception of truth one that emphasizes the unity of knowledge and truth as well as their diversity among different social domains Zuidervaart asks what such holism and pluralism suggest about how we understand politics and society This book proposes a new understanding of large scale social change challenging how most people think about knowledge and truth Interweaving epistemology social criticism and political thought Shattering Silos aims to help redirect an allegedly post truth society The Psychological, Religious and Other Imperatives Mary Sharpe, 2008-07-15 Suicide Bombers The Psychological Religious and Other Imperatives provides wisdom and insight in an intergroup situation characterized by huge gulfs and misperceptions The Western media has focused on fundamentalists as the voice of Islam and helped to shape a warped stereotype of the vast majority of Muslims who are actually moderate in attitudes This volume provides a corrective by explaining how de radicalization programs are being spearheaded by Muslims themselves and also by exploring the best strategies for understanding and dealing with Islamic fundamentalism and suicide terrorism. The chapters reflect the international interdisciplinary nature of the workshops that served as the launching pad from the project This volume reflects a positive trend it is an indication that researchers can lead societies to accurately pinpoint the nature and role of fundamentalists and that they can differentiate between destructive elements on the one hand and the majority of moderates seeking to achieve constructive peaceful inter group relations on the other hand Although there is considerable diversity among the chapters a shared theme is the contextual approach to understanding extremism and suicide terrorism Rather than become seduced by reductionist explanations to do with assumed intra personal characteristics of suicide terrorists the authors focus on the characteristics of groups and contexts Mircea Eliade Nicolae Babuts, 2017-07-28 Mircea Eliade 1907 1986 was one of the twentieth century s foremost students of religion and cultural environments. This book examines the emergence function and value of religion and myth in his work Nicolae Babuts Robert Ellwood Eric Ziolkowski John Dadosky Robert Segal Mac Linscott Ricketts Douglas Allen and Liviu Borda examine Eliade s views on the interaction between the sacred and the profane Each explores Eliade's phenomenological approach to the study of religion and myth They show that

modern rites of initiation cultural activities and spectacles like bullfighting film and perhaps surprisingly reading and writing all harken back to the archetypal structures of the mythical imagination Perhaps the greatest achievement of Eliade s phenomenological approach is that it reveals what we have in common with pre Socratic man the mind's structural capacity to endow objects and events with spiritual values and meanings As a study of Eliade's concept of the mythic imagination the book posits an analogy between the myths of the past and modern imitations. The authors suggest that in spite of their differences and their separate historical sources myths represent basic structures of human consciousness This book is essential reading for all students of religion philosophy and literature Personal Catholicism Martin X. Moleski, Avery Dulles, 2020-10-01 Both Newman and Polanyi rank high among the pioneers in the history of the post critical movement in epistemology They pointed out the limitations of the methods that had become current since the time of Descartes and Spinoza The systems of these two authors are exceptionally useful for dealing with the major issues that trouble the theological climate today From the Foreword by Avery Dulles S I This engaging and lucid study brings into dialogue two thinkers whose methods share much in common despite their different purposes A principal contribution of Moleski s study is its cultivation of the common ground that religion shares with science Theological Studies An important and utterly engaging study Those familiar with Newman's Grammar of Assent and Polanyi's Personal Knowledge will appreciate the ways in which Moleski makes sometimes unexpected connections between the two thinkers despite Polanyi's critical disposition toward Catholicism Personal Catholicism is a most welcome contribution to today s rethinking of the relationship between faith and reason First Things There is a wealth of material here that could be applied to issues of faith and reason science and faith faith and the nature of reality as they are raised in contemporary society The Gospel and Our Culture **Annual Review of** the Sociology of Religion. Volume 10 (2019) Giuseppe Giordan, Andrew P. Lynch, 2019-07-15 Interreligious Dialogue From Religion to Geopolitics discusses how interreligious dialogue takes place within and is influenced by important sociological categories and theories such as modernity secularization deprivatization social movements and pluralism Starting from the study of interreligious coexistence sacred spaces and multi religious rituals the book explores the patterns of interreligious governance and politics and forms of interreligious social action in European North American and West and South Asian contexts The contributors to this volume apply broader theories of organizational change and planning communication urban neighborhood and community studies functionalist perspectives and symbolic interactionism thus presenting a wide range of possibilities for sociological engagement with studies on interreligious dialogue Tacit Knowing, Musical Experience, and Music Instruction Wayne Devere Bowman, 1980 **Theology from the Great Tradition** Steven D. Cone, 2018-02-22 This textbook provides complete and comprehensive coverage of the theological tradition of Aquinas Maximus Luther Irenaeus Lonergan von Balthasar Schmemann Meyendorf and Barth Each section of this textbook explores a wide variety of questions who are we Is there a God and if so what is his nature Who is Jesus What does it mean that we live both in sin and righteousness It consists of 15 modules that are comprised of 46 chapters Each module has two parts there are systematic chapters that discuss and explain each module s topic and the final chapter of each module examines 4 to 6 primary sources that are important for each topic This textbook includes an extensive range of pedagogical features Sample tests in which each objective question has been quality tested by classroom use with a discrimination index A discussion guide for each chapter Learning objectives linked to each chapter The text includes bold faced terms boxed text sections that identify central figures and points of debate study question chapter summaries glossary Transformation, and Sustainable Human Development Joseph Ogbonnaya, 2013-01-29 Secular contemporary development discourse deals with the problems of societal development and transformation by prioritizing the human good in terms of vital and social values with the aim of providing the basic necessities of life through social institutions that work While such an approach is profitable by promoting economic growth it does not take note of other dynamics of social progress and development Also it fails to notice the consequences of development strategies on human flourishing well being and happiness Ogbonnayu argues for an integral approach to development by engaging in a fruitful dialogue between Bernard Lonergan's philosophical anthropology with contemporary development discourse as represented in select theories of development and in select principles of Catholic social teaching It makes a case for social progress and transformation as emanating from human understanding Also it highlights the parts of Lonergan's theory that contribute to an understanding specifically of his treatment of bias and of the shorter and longer cycles of societal decline In view of the reality of moral impotence and limitations it considers the reversal of societal decline as possible through the supernatural solution of God s Truth and Belief H.E. Hofmeister, 2012-12-06 The task of the following considerations is the elucidation of the grace relationship of religion to thought Every philosophical investigation with this task proceeds under the expectation that it will take into account religious self understanding Herein lies the special difficulty of a philosophical theory of religion On the one hand the philosopher of religion may not assume this self understanding in order to avoid offering a religious theory a theology instead of the philosophical theory expected from him On the other hand he cannot by pass religious self understanding because this is the key to insight into the uniqueness of religious discourse Without knowledge of this uniqueness it is impossible to indicate the conditions under which religious statements lead to the question of truth Even if religion cannot prescribe to philosophical investigation whose methods the latter must apply to examine its object it may in addition require that the standard by which it is measured be suited to grasp those special characteristics which mark it as different from other realms of life Therefore it may be required of the philosophical interpretation that the question of the legitimacy and validity of religious self understanding be treated from the very beginning as an open one and not as one already decided If this question is rashly decided in the negative then all analysis of religious propositions is necessarily done along the guidelines of a method that in its foundation masks of the religious thematic African Perspectives on Culture
