Structure And Agency In International Capital Mobility:

Structure and Agency in International Capital Mobility Kenneth P. Thomas, Timothy Sinclair, 2001-08-08 Structure and Agency in International Capital Mobility highlights the importance of mobile resources as a feature of globalization and challenges the received wisdom about the causes and effects of international capital mobility There seems little doubt that a sea change is taking place as a result of globalization From a world concerned with strategic weapons and the risks of mutual annihilation a new world order is emerging in which quite different forces loom large in the communal consciousness In this order resources and the jobs and prosperity they produce have at least in the West pushed security matters firmly into second place Competing for Capital Kenneth P. Thomas, 2000-10-19 As corporations search for new production sites governments compete furiously using location subsidies and tax incentives to lure them Yet underwriting big business can have its costs reduction in economic efficiency shifting of tax burdens worsening of economic inequalities or environmental degradation Competing for Capital is one of the first books to analyze competition for investment in order to suggest ways of controlling the effects of capital mobility Comparing the European Union's strict regulation of state aid to business with the virtually unregulated investment competition in the United States and Canada Kenneth P Thomas documents Europe's relative success in controlling and decreasing subsidies to business even while they rise in the United States Thomas provides an extensive history of the powers granted to the EU's governing European Commission for controlling subsidies and draws on data to show that those efforts are paying off In reviewing trends in North America he offers the first comprehensive estimate of U S subsidies to business at all levels to show that the United States is a much higher subsidizer than it portrays itself as being Thomas then suggests what we might learn from the European experience to control the effects of capital mobility not only within or between states but also globally within NAFTA and the World Trade Organization as well He concludes with policy recommendations to help promote international cooperation and cross fertilization of ways to control competition for investment

Understanding World Order and Structural Change H.

Abrahamsson, 2015-12-22 Hans Abrahamsson assesses the current world order and structural change within an historical framework He analyzes the interaction of Pax American and the Bretton Woods system in the postwar period and its impact specifically on the development of Southern Africa The author also proposed an analytical model and a methodological framework for the study of the international political economy and its global and local implications Finally he addresses the circumstances behind the current opportunity for global change and the social forces and political action required in order to seize it **International Political Economy and Poststructural Politics** Marieke De Goede, 2006-03-14 This edited volume brings together leading scholars to debate the promises of poststructural politics within the study of the International Political Economy IPE The volume offers a sustained theoretical dialogue on the meaning of discourse identity and representation for practices of political economy *Global Capital and National Governments* Layna Mosley, 2003-02-03

Global Capital and National Governments suggests that international financial integration does not mean the end of social democratic welfare policies Capital market openness allows participants to react swiftly and severely to government policy but in the developed world capital market participants consider only a few government policies when making decisions Governments that conform to capital market pressures in macroeconomic areas remain relatively unconstrained in supply side and micro economic policy areas Therefore despite financial globalization cross national policy divergence among advanced democracies remains likely Still in the developing world the influence of financial markets on government policy autonomy is more pronounced The risk of default renders market participants willing to consider a range of government policies in investment decisions This inference however must be tempered with awareness that governments retain choice As evidence for its conclusions Global Capital and National Governments draws on interviews with fund managers quantitative analyses and archival investment banking materials

Partnerships and Foundations in Global Health Governance S.

Rushton,O. Williams,2011-02-01 This book argues that the new actors in global health constitute a private turn in global health governance and provides theoretical and practical grounds for viewing global health partnerships and philanthropic foundations as closely aligned in their ideational and material approaches to a range of important issues and crises

The Political Economy of International Tax Governance T. Rixen,2008-11-03 Covering the period from the 1920s when international tax policy was solely about avoiding double taxation to the present era of international tax competition Rixen investigates the fate of the power to tax in an era of globalization illustrating that tax sovereignty is both shaped and constrained by an international tax regime

Critical International Political Economy Stuart Shields,Ian Bruff,Huw Macartney,2011-02-01 Amidst the continued debate surrounding the foundations of IPE coupled with recent methodological and theoretical divides this book argues that an attempt should be made to re visit the notion of the critical The challenge posed by contributors to this volume is to assess the development of so called critical IPE and interrogate whether the theoretical foundations it was built upon have reached their potential The essays in this volume take up this challenge in a number of different ways but all share a common concern to re assess the purpose of critical approaches reflect on why certain social theorists have been favoured as a point of departure yet others have largely been ignored In light of recent debates on the notion of a trans Atlantic divide within IPE the collection the contributors aim demonstrates how the distinction between the critical and the orthodox or empirical is only significant if the critical is geared towards a larger more substantial body of critical social enquiry and engages with what it means to conduct such enquiry

Performing Capital R. Aitken,2007-10-01 This books reviews forms of capital popular finance and argues that it is important as a site at which capital is visible not as a macro structural reality but as a category itself which needs to be made and performed in the spaces where is does not already exist Culture is used to intervene into everyday spaces to develop capital there

Financialisation and Development in Asia Toby Carroll,Darryl Jarvis,2018-11-07 Multilateral development agencies

have increasingly focused on underdeveloped Asian countries as potential new sites for financial capital. Often referred to as emerging markets, these economies are seen as ripe for private sector investment and at the same time in need of foreign capital to support rapid industrialisation, modernisation and poverty reduction. This confluence of interests suggests a means for quickly closing the development gap primarily through mobilising regulatory, institutional and governance reforms designed to reduce barriers to foreign capital, institutional inefficiencies and risks to investment capital repatriation and market operation. Therefore, development agencies now encourage the construction of enabling environments to support market driven development through processes variously identified as financialisation, centring on the role of the market and private capital. While the state itself has historically occupied a central place in economic development, new financialised modes of development are increasingly marginalising the state, its influence in the economy and thus its ability to manage developmental outcomes. In this volume, a collection of leading authors critically assess these developments, highlighting the emergence of financialised modes of development and their contested and often problematic nature. Drawing upon a series of case studies, the contributors explore not just the increasing use of financialised development initiatives but assess critically their implications in terms of the emergent risks, costs and inequalities that often accompany them. This book was originally published as a special issue of the *Asian Studies Review*.

Research Handbook on International Taxation Yariv Brauner, 2020-12-25. Capturing the core challenges faced by the international tax regime, this timely Research Handbook assesses the impacts of these challenges on a range of stakeholders, evaluating various paths to reform at a time when international tax policy is a topic high on politicians' agendas.

Sugar: Refined Power in a Global Regime B. Richardson, 2009-09-23. Sugar is a commonplace product with a complex background, mainly because of the high degree of protectionism given to the industry and the benefits of ensuring domestic producers stay in business. This book asks why there are such disagreements over trade policy, who profits within the current regime and where power ultimately lies.

China and the Mortgaging of America H. Thompson, 2010-08-04. In 2008, the economic relationship between the United States and China almost collapsed due to a crisis at two American mortgage corporations, Fannie Mae and Freddie Mac. This book explains how that crisis came about and analyzes the consequences and implications.

Hegemony, International Political Economy and Post-Communist Russia Owen Worth, 2017-07-05. This illuminating book explores the neo Gramscian school of international political economy and their conceptualization of global hegemony and furthers these by looking at how the often fragmented society of post Communist Russia can provide insight into the nature and workings of neo liberal global hegemony. The volume illustrates how historically Russia has been a unique case in rejecting Western inspired hegemonic projects. It outlines how successive governments since the fall of the Soviet Union have attempted, often unsuccessfully, to integrate Russia into the global economy and identifies the multitude of ideological contestation within Russia. It will prove a useful addition to the literature on both post Communist Russian studies and international political

economy **Global Restructuring, State, Capital and Labour** A. Bieler, W. Bonefeld, P. Burnham, A. Morton, 2006-04-26 This book provides a critical engagement between contending historical materialist approaches that have played a crucial role in shaping post positivist International Relations theory It analyzes globalization as a process of state formation and argues that its fate depends on the neo liberal recomposition of labour relations **International Cultural Policies and Power** J. Singh, 2010-01-20 Political scientists by and large ignore cultural industries and technologies whereas they are prominent in other disciplines This book provides insights from local societal national and international levels in understanding cultural industries technologies and policies and integrates these perspectives into the study of political science *Rethinking Global Political Economy* Kurt Burch, Robert A. Denemark, Kenneth P. Thomas, Mary Ann Tétreault, 2004-02-24 Rethinking Global Political Economy contains incisive analysis of history linguistics class culture empirical data and normative concerns This important volume presents innovative approaches to fundamental issues in global political economy Together they provide multiple arguments and avenues for rethinking global political economy in a time of turmoil and system transformation It will appeal to those interested in seeing new perspectives and healthy heterodoxy in the study of political economy European Studies Newsletter , 1995 **Private Authority and International Affairs** A. Claire Cutler, Virginia Haufler, Tony Porter, 1999-04-01 Governments today are too often unwilling to intervene in global commerce and international organizations are too often unable to govern effectively In their place firms increasingly cooperate internationally to establish the rules and standards of behavior for themselves and for others taking on the mantle of authority to govern specific issue areas Are they stepping into the breach to supply needed collective goods Or are they organizing themselves in order to prevent governments from interfering in their business This book explores the meaning of this private international authority both for theory and policy through case studies of specific industries associations and issue areas in both contemporary and historical perspective Contributors include Pamela Burke Lynn Mytelka and Michel Delapierre Liora Salter Susan Sell Timothy Sinclair Deborah Spar and Michael Webb Financial Crisis Management and the Pursuit of Power Asst Prof Mine Aysen Doyran, 2013-03-28 How does America manage crisis on behalf of international finance in the absence of a global state Doyran explores the relationship between state power and global finance and in particular examines the various attempts by the US state at financial crisis management The case studies highlight the dramatic consequences of the rise of financial capitalism in the US economy and also explore regulatory sources of market failures systemic risk and moral hazard This book focuses on this primary issue facing scholars of American power in various social science disciplines including political science finance and international relations professional financial analysts and Government officials This book is for the critical reader who is interested in financial policy and wants to learn more about the causes and consequences of the rise of financial markets
