Mayas in the Marketplace Walter E. Little, 2010-07-05 2005 Best Book Award New England Council of Latin American Studies. Selling handicrafts to tourists has brought the Maya peoples of Guatemala into the world market. Vendors from rural communities now offer their wares to more than 500,000 international tourists annually in the marketplaces of larger cities such as Antigua, Guatemala City, Panajachel, and Chichicastenango. Like businesspeople anywhere, Maya artisans analyze the desires and needs of their customers and shape their products to meet the demands of the market. But how has adapting to the global marketplace reciprocally shaped the identity and cultural practices of the Maya peoples? Drawing on over a decade of fieldwork, Walter Little presents the first ethnographic study of Maya handicraft vendors in the international marketplace. Focusing on Kaqchikel Mayas who commute to Antigua to sell their goods, he explores three significant issues: how the tourist marketplace conflates global and local distinctions; how the marketplace becomes a border zone where national and international, developed and underdeveloped, and indigenous and non-indigenous come together; how marketing to tourists changes social roles, gender relationships, and ethnic identity in the vendors' home communities. Little's wide-ranging research challenges our current understanding of tourism's negative impact on indigenous communities. He demonstrates that the Maya are maintaining a specific community-based sense of Maya identity even as they commodify their culture for tourist consumption in the world market.

Not Just Black and White Nancy Foner, George M. Fredrickson, 2004-04-22. Immigration is one of the driving forces behind social change in the United States, continually reshaping the way Americans think about race and ethnicity. How have various racial and ethnic groups, including immigrants from around the globe, indigenous racial minorities, and African Americans, related to each other both historically and today? How have these groups been formed and transformed in the context of the continuous influx of new arrivals to this country? In *Not Just Black and White*, editors Nancy Foner and George M. Fredrickson bring together a distinguished group of social scientists and historians to consider the relationship between immigration and the ways in which concepts of race and ethnicity have evolved in the United States from the end of the nineteenth century to the present. *Not Just Black and White* opens with an examination of historical and theoretical perspectives on race and ethnicity. The late John Higham, in the last scholarly contribution of his distinguished career, defines ethnicity broadly as a sense of community based on shared historical memories, using this concept to shed new light on the main contours of American history. The volume also considers the shifting role of state policy with regard to the construction of race and ethnicity. Former U.S. census director Kenneth Prewitt provides a definitive account of how racial and ethnic classifications in the census developed over time and how they operate today. Other contributors address the concept of panethnicity in relation to whites, Latinos, and Asian Americans and explore socioeconomic trends that have affected and continue to affect the development of ethno-racial identities and

relations Joel Perlmann and Mary Waters offer a revealing comparison of patterns of intermarriage among ethnic groups in the early twentieth century and those today The book concludes with a look at the nature of intergroup relations both past and present with special emphasis on how America s principal non immigrant minority African Americans fits into this mosaic With its attention to contemporary and historical scholarship Not Just Black and White provides a wealth of new insights about immigration race and ethnicity that are fundamental to our understanding of how American society has developed thus far and what it may look like in the future
