Structurefunction Relationships Of Proteolytic Enzymes:

Structure-Function Relationships of Proteolytic Enzymes P. Desnuelle,H. Neurath,M. Ottesen,2014-05-10 Structure Function Relationships of Proteolytic Enzymes provides information pertinent to the fundamental aspects of proteolytic enzymes This book presents the historical role of proteolytic enzyme as a group in protein and enzyme chemistry Organized into 23 chapters this book begins with an overview of the results obtained from investigation on the chymotrypsinogens of porcine origin This text then examines the differences of amino acid sequence between chymotrypsin trypsin and elastase that affect the substrate binding site which reflect the specificity differences between these enzymes Other chapters consider the kinetic parameters related to the trypsin catalyzed hydrolysis of several model peptides This book discusses as well the acetylation of trypsin which result in functional consequences varying from complete inactivation to promotion of activity The final chapter deals with the physical properties of stem bromelain in comparison with the data for three other sulfhydryl proteases of plant origin This book is a valuable resource for enzymologists microbiologists and biochemists

Truscheit,2012-12-06 These proceedings contain the papers presented at the Bayer Symposium V which was held in Grosse Ledder on October 16 21 1973 and which was simultaneously the Second International Research Conference on Proteinase Inhibitors The cordial atmosphere the frank discussions and the profitable exchange of ideas during the First International Research Conference on Proteinase Inhibitors which was held on November 4 6 1970 in Munich were a stimulant for us to consider holding a Second Conference especially as the steadily increasing research activities in this and related fields called for a new assessment of recent efforts in proteinase inhibitor research In the three years since the First Conference was held this field has developed particularly in the areas of molecular aspects of protein protein interactions and in the extension to inhibitors of nonserine proteinases and peptidases In planning this meeting the Organizing Committee was faced with the problem of selecting a limited number of participants and we decided that it was appropriate and necessary to focus in detail on the chemistry of proteinase inhibitors their interactions with a variety of enzymes and also to invite more general papers to survey the physiological and clinical aspects of the subject which we felt would be of importance in the future **Summary of Awards in Energy-related General Research** National Science Foundation (U.S.).
