Brewster, 1973 A New Struggle for Independence in Modern Latin America Pablo A. Baisotti, 2021-09-30 This volume explores several notable themes related to foreign affairs in Latin America and the reconfiguration of the power of the different states in the region It offers insightful historical perspectives for understanding national regional and global issues from the beginning of the 20th century to the present day from analysis of the traditional hegemony of the United States over

Latin America through its military and political influence due to the presence of the European Union Russia and China These views cannot be reduced to a simplistic vision of the dominant and subordinate rather they attempt to seek lines of continuity by highlighting traditional interpretations of new scenarios such as regional trading and security blocs The volume refuses to impose a traditional and uncritical linear historical narrative onto the reader but instead proposes an alternative interpretation of the past and its relation to the present Finally the growing importance of international mechanisms in enabling the success of certain Latin American regimes is also highlighted in particular the influence of regional diffusion through international organizations or other networks
