La Comunidad Latina in the United States David T. Abalos, 1998-05-26 La comunidad Latina the fastest growing ethnic group in the United States has long been told that assimilation is the only way to succeed in American society This book challenges that generally accepted view and concludes instead that transformation as a way of life is the only viable option for the Latino community as a whole regardless of racial class regional or religious differences It highlights how in the everyday life of la comunidad Latina the members of the community can recognize the underlying ways of life the stories and the patterns of relationships that cripple them and how to break with these ways of life stories and relationships to create fundamentally more loving and compassionate alternatives Along with all men and women Latinos and Latinas face four choices retaining a blind loyalty to a romanticized past assimilating violating each other or transforming their ethnic and racial group for the better This examination of the underlying sacred meaning of the stories of the Latino culture attempts to determine whether these stories are destructive or creative Now coming of age la comunidad Latina previously wounded by assimilation continues to tell its story in art literature history and religion so that the world may perhaps for the first time see its personal political historical and sacred faces The most important story now being lived is that of Latina women and Latino men who are making choices that will determine the ultimate meaning of a new Latino culture in this nation

Diversity's Promise for Higher Education Daryl G. Smith, 2020-08-11 Building sustainable diversity in higher education isn t just the right thing to do it is an imperative for institutional excellence and for a pluralistic society that works Updated Edition Daryl G Smith has devoted her career to studying and fostering diversity in higher education In Diversity s Promise for Higher Education Smith brings together research from a wide variety of fields to propose a set of clear and realistic practices that will help colleges and universities locate diversity as a strategic imperative and pursue diversity efforts that are inclusive of the varied and growing issues apparent on campuses without losing focus on the critical unfinished business of the past To become more relevant to society the nation and the world while remaining true to their core missions colleges and universities must continue to see diversity like technology as central not parallel to their work Indeed looking at the relatively slow progress for change in many areas Smith suggests that seeing diversity as an imperative for an institution s individual mission and not just as a value is the necessary lever for real institutional change Furthermore achieving excellence in a diverse society

requires increasing institutional capacity for diversity working to understand how diversity is tied to better leadership positive change research in virtually every field student success accountability and more equitable hiring practices In this edition which is aimed at administrators faculty researchers and students of higher education Smith emphasizes a transdisciplinary approach to the topic of diversity drawing on an updated list of sources from a wealth of literatures and fields The tables and figures have been refreshed to include data on faculty diversity over a twenty year period and the book includes new information about gender identity embedded bias student success the growing role of chief diversity officers the international emergence of diversity issues faculty hiring and important metrics for monitoring progress Drawing on forty years of diversity studies this third edition also includes more examples of how diversity is core to institutional excellence academic achievement and leadership development updates issues of language examines the current climate of race based campus protest addresses the complexity of identity and explains how to attend to the growing kinds of identities relevant to diversity equity and inclusion while not overshadowing the unfinished business of race class and gender

Beyond Affirmative Action Robert A. Ibarra, 2001-03-05 A century ago universities were primarily in the business of molding upper class young men for the professions The world has changed and universities have been forced to keep pace by experimenting with affirmative action curriculum overhauls part time degree programs and the like But at the core of the modern university establishment is an ingrained academic culture that has operated in the same ways for centuries contends Robert Ibarra and in Beyond Affirmative Action he calls for a complete paradigm shift Why does academic culture he asks emphasize individual achievement over teamwork Why do so many exams test discrete bits of knowledge rather than understanding of the big picture Why is tenure awarded for scholarly publications rather than for sharing knowledge in diverse ways with students and a wider community Why do undergraduates drop out And why do so many bright graduate students and junior faculty including many minorities women and some majority males become disenchanted with academia or fail to be accepted and rewarded by the tenured faculty Ibarra introduces a theory of multicontextuality which proposes that many people learn better when teachers emphasize whole systems of knowledge and that education can create its greatest successes by offering and accepting many approaches to teaching and learning This revolutionary paradigm also addresses why current thinking about academic systems and organizational culture affirmative action and diversity must be revised Ibarra bases his groundbreaking proposals upon his own synthesis of findings from anthropological educational and psychological studies of how people from various cultures learn as well as findings from extended interviews he conducted with Latinos and Latinas who pursued graduate degrees and then either became university faculty or chose other careers From his perspectives as a practicing anthropologist teacher researcher and administrator Ibarra provides a blueprint for change that will interest o Administrators developing campus strategic plans o Boards commissions and agencies making policy for educational institutions o Students and faculty struggling to find ways that academia can serve multiple constituencies o Academic and career advisors to students o Researchers in cognitive psychology sociology anthropology education and ethnic studies o Businesses rethinking their organizational cultures and strategies
