Strawbridge, 2015-11-13 This study offers a fresh approach to reception historical studies of New Testament texts guided by a methodology introduced by ancient historians who study Graeco Roman educational texts In the course of six chapters the author identifies and examines the most representative Pauline texts within writings of the ante Nicene period 1Cor 2 Eph 6 1Cor 15 and Col 1 The identification of these most widely cited Pauline texts based on a comprehensive database which serves as an appendix to this work allows the study to engage both in exegetical and historical approaches to each pericope while at the same time drawing conclusions about the theological tendencies and dominant themes reflected in each Engaging a wide range of primary texts it demonstrates that just as there is no singular way that each Pauline text was adapted and used by early Christian writers so there is no homogeneous view of early Christian interpretation and the way Scripture informed their writings theology and ultimately identity as Christian

The Concept of the Public Realm Noel O'Sullivan, 2013-09-13 In its political form the existence of a public realm is the basis of a shared relationship between rulers and ruled which makes politics more than mere power or domination. How to construct and maintain a public realm in the political sphere is however a matter of especial dispute at the present day due partly to the increasing difficulty of making the distinction between public and private spheres which has been the basis of Western liberal democracy partly to the tendency of public concerns to be identified with economic interests which transforms citizens into consumers partly to pressure for the acknowledgement of diversity of every kind which creates the danger of fragmenting the public realm and partly to globalization processes which have undermined the traditional identification of the public realm with national political institutions. Globalization has in addition raised the question of whether there can be a supra-national public realm and more generally of what form it is likely to assume in non-Western cultures. These are amongst the fundamental contemporary issues addressed by contributors to the present volume. This book was published as a special issue of the Critical Review of International Social and Political Philosophy.
