Stuck In Time The Tragedy Of Childhood Mental Illness:

Stuck in Time Lee Gutkind, 2014 A harrowing exploration of one of the country's most troubling hidden shames: the widespread neglect of disabled children by the institutions that have sworn to protect them. Four fifths of American children with serious mental health problems receive no professional treatment whatsoever. They are the product of an overextended and often neglectful system that, as Lee Gutkind writes, has reached the level of insanity. Following the stories of three children, Daniel Meggan and Terri Stuck in Time chronicles the tragedies and injustices wrought not only by the deficiencies of the mental health care system but also by the failures of the family. You Can't Make This Stuff Up Lee Gutkind, 2012-08-14 From the Godfather behind Creative Nonfiction and founder and editor of Creative Nonfiction Magazine, a how-to guide for every aspect of creative nonfiction.

In these true stories, writers and their loved ones struggle as their worlds are upended. What do you do when your father kills himself or your mother is committed to a psych ward or your daughter starts hearing voices telling her to harm herself or when you yourself hear such voices? Addressing bipolar disorder, OCD, trichotillomania, self-harm, PTSD, and other diagnoses, these stories vividly depict the difficulties and sorrows and sometimes too the unexpected and surprising rewards of living with mental illness. *Same Time Next Week* Lee Gutkind, 2015-03-01 In any given year, one in four Americans suffers from a diagnosable mental illness, and yet there is still a significant stigma attached to being labeled as mentally ill. We hear about worst-case scenarios, but in many, maybe even most cases, there is much room for hope. These frank, often intimate stories reflect the writer's struggles to overcome both as professionals and as individuals, as current therapists and as former patients. The challenges presented by depression, bipolar disorder, OCD, and other mental disorders. These dramatic narratives communicate clearly the rewards of helping patients move forward with their lives, often through a combination of medication, talk therapy, and common sense. Collectively, these true stories highlight the need for empathy and compassion between therapist and patient and argue for a system that encourages human connection rather than diagnosis by checklist. *The Use of Personal Narratives in the Helping Professions* Jessica K.
