Handbook of Training and Supervision in Cognitive Behavioral Therapy Mark D. Terjesen, Tamara Del Vecchio, 2023-09-08
This book provides a scientific and practical guide for training and supervision in cognitive behavioral therapy CBT. It builds on more general fundamentals of clinical supervision with a theory driven approach backed by empirical support for training and supervising clinicians in the practice of CBT. The book dispels the myth of 'do it teach it as it relates to supervision' and addresses the importance of recognizing that one size does not fit all with CBT supervision. The volume synthesizes CBT research on supervision and links it to the practice of supervision. It reviews components of supervision that warrant consideration e.g. therapeutic alliance, ethics, specific settings e.g. medical setting, schools and clients e.g. culture, individual, group, disability and high risk. In addition, it addresses a neglected area of developing competency including developmental models as well as measuring trainee and supervisor competency in the provision of clinical supervision. The book recommends future directions on how to integrate technology into supervision to enhance the quality of supervision and ultimately client outcome. Key areas of coverage include: Major constructs in CBT supervision and training; Supervising work with various clients including individuals, children, adolescents, families and couples; Supervision and high risk cases; Teaching and supervision within a behavioral medicine context; Issues of diversity, technology and ethics of supervision. The *Handbook of Training and Supervision in Cognitive Behavioral Therapy* is an essential resource for researchers, professors and graduate students as well as clinicians, therapists and other professionals in clinical and school psychology, pediatrics, social work, developmental psychology, behavioral therapy, rehabilitation, child and adolescent psychiatry, nursing and special education.

Cognitive Behavioral Therapy in Schools Linda Raffaele Mendez, 2016-11-10. In recent years, many U.S. schools have implemented tiered models of support to address a range of student needs, both academic and behavioral. While cognitive behavioral therapy (CBT) has simultaneously gained popularity as an effective means of supporting the mental health needs of students, *Cognitive Behavioral Therapy in Schools* provides school-based practitioners with the necessary skills to determine students' mental health needs, establish a tiered CBT-based system of supports, select appropriate programs at Tiers 1, 2, and 3, deliver CBT using various formats to students who are at risk or demonstrating problems, progress monitor, multiple tiers of service, and work collaboratively with teachers, administrators, and families.
