The Archaeologist's Manual for Conservation Bradley A. Rodgers,2004-07-21 This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the forces of specialization p 3 andhewantstoremedythatsituationthroughthismanual He seesthisworkasa calltoactionforthenon professionalconservator permitting curators conservators and archaeologists to identify artifacts that need prof sional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple non toxic procedures p 5 It is the mission of Brad s manual to bring conservation back into arch ology p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says The conservationist archaeologist is responsible to make preparation for an artifact s care even before it is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organicsandcompositsofartifactsconservationthanwasable to me when I rst faced that archaeological challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed made great progress For instance acommonprocedurethenwastoheattheartifactsredhotinafurnace a method that made me cringe **Early American Technology** Judith A. McGaw,2014-01-01 This collection of original essays documents technology s centrality to the history of early America Unlike much previous scholarship this volume emphasizes the quotidian rather than the exceptional the farm household seeking to preserve food or acquire tools the surveyor balancing economic and technical considerations while laying out a turnpike the woman of child bearing age employing herbal contraceptives and the neighbors of a polluted urban stream debating issues of property odor and health These cases and others drawn from brewing mining farming and woodworking enable the authors to address recent historiographic concerns including the environmental aspects of technological change and the gendered nature of technical knowledge Brooke Hindle s classic 1966 essay on early American technology is also reprinted and his view of the field is reassessed A bibliographical

essay and summary of Hindle's bibliographic findings conclude the volume. The contributors are Judith A McGaw, Robert C Post, Susan E Klepp, Michal McMahon, Patrick W O Bannon, Sarah F McMahon, Donald C Jackson, Robert B Gordon, Carolyn C Cooper, and Nina E Lerman. **Art Market Research** Tom McNulty, 2013-12-27. This book is for art market researchers at all levels. A brief overview of the global art market and its major stakeholders precedes an analysis of the various sales venues: auction, commercial gallery, etc. Library research skills are reviewed and advanced methods are explored in a chapter devoted to basic market research. Because the monetary value of artwork cannot be established without reference to the aesthetic qualities and art historical significance of our subject works, two substantial chapters detail the processes involved in researching and documenting the fine and decorative arts respectively and provide annotated bibliographies. Methods for assigning values for art objects are explored and sources of price data, both in print and online, are identified and described in detail. In recent years, art historical scholarship increasingly has addressed issues related to the history of art and its markets; a chapter on resources for the historian of the art market offers a wide range of sources. Finally, provenance and art law are discussed with particular reference to their relevance to dealers, collectors, artists, and other art market stakeholders.

Metalworking Trades in Early America Henry J. Kauffman, 1995. A fascinating and informative survey of early metalworking trades. Each is covered in its own separate chapter: the blacksmith, whitesmith, edgetool maker, cutler, locksmith, wheelwright, gunsmith, nailer, and tinsmith. Introductory chapters describe and explain the blast furnace, forge, and iron foundry processes that provided the raw material for the early metal trades. Quoting extensively from contemporary sources, Mr. Kauffman describes not only what was made but also how it was made. Enhancing the text are more than 200 illustrations, many never before available. Here is the complete story told in straightforward words by an authority who has spent a lifetime working in teaching and writing about the early American metalworking trades. A valuable resource for the collector, practitioner, student, or anyone interested in American. *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1973.
