**Communicating with Vulnerable Patients** Maria Leticia Castrechini Fernandes Franieck, 2022-12-30 Communicating with Vulnerable Patients explores ways to improve the communication process between highly vulnerable patients and the therapist based on the assumption of the permanent presence of an outsider or potential space in the communication field between them In this space the therapist and highly vulnerable patients can undergo transitional states of mind established between and within their relationship Leticia Castrechini Franieck also known as Maria Leticia Castrechini Fernandes Franieck presents practical methods to overcome communication issues and engage therapeutically with highly vulnerable patients suffering from personality disorders addiction and trauma as well as with deprived children Communicating with Vulnerable Patients is presented in five parts with Part one focused on building communication through a Transient Interactive Communication Approach TICA and Part two applying TICA in forensic settings with five case studies illustrating the approach in a range of contexts Part three considers TICA in intercultural settings including work with refugees and Part four outlines adaptations of the approach including T WAS Together We Are Strong which aims to avoid an increase of antisocial behavior in deprived children and the use of TICA in the COVID 19 pandemic The book concludes in

Part five with reflections on outcomes and limitations of both TICA and T WAS Communicating with Vulnerable Patients will be invaluable reading for professionals psychotherapists group therapists and group analysts working with at risk populations **American Journal of Psychotherapy**, 1947 **Experimentation and Innovation in Psychotherapy** Harold Greenwald, 2017-07-05 After a long period of relatively slow change and development the practice of psychotherapy entered a phase of vigorous experimentation in the 1960s Greatly increased public recognition of the role of psychological approaches has brought about a dramatic upsurge of demand for mental health services on the part of broader segments of the population than ever before Many kinds of people now seek aid and display a greater variety of symptoms and life problems than are recorded in the earlier case history literature The professional response to this new demand markedly increased the professions creativity and imagination as this volume outlines While it is difficult to devise a precise category to cover all forms of such experimentation in psychotherapy one major characteristic has been an increase in activity The non directive or client centered therapist frequently speaks almost as much as his client yet he is not considered active since he attempts to limit his communication to the reflection of the clients feelings More frequently an attempt is made to distinguish between insight oriented therapies and active therapies in terms of differing goals Active psychotherapy is seen as being concerned with techniques that focus directly on the removal of symptoms such as anxiety or maladaptive overt behavior The need to establish a clear dichotomy between insight and behavior modification has often been challenged many of the therapists who stress insight do so in the belief that increased insight no matter how arrived at will modify overt behavioral anxiety Experimentation in Psychotherapy exposes the reader to a wide variety of therapies Although changes in treatment methods and a more short term orientation have limited some future developments in the field this volume admirably describes the techniques traditional therapists can effectively employ given the patient s strengths and limitations

**Radical Perspectives on Psychoanalytic Knowledge** Aner Govrin, 2015-11-06 Psychoanalysis really should not exist today. Until a few years ago most of the evidence suggested that its time was drawing to a close and yet psychoanalysis demonstrated remarkable resilience in the face of criticism alongside significant resurgence over the course of the last years. In *Conservative and Radical Perspectives on Psychoanalytic Knowledge* The Fascinated and the Disenchanted psychoanalyst and philosopher Aner Govrin describes the mechanisms of sociology within the psychoanalytic community which have enabled it to withstand the hostility levelled at it and to flourish as an intellectual and pragmatic endeavour. He defends the most criticized aspect of psychoanalysis the fascination of analysts with their theories. Govrin demonstrates that fascination is a common phenomenon in science and shows its role in the evolution of psychoanalysis. Govrin argues that throughout its history psychoanalysis has successfully embraced an amalgam of what he has defined and termed fascinated and troubled communities. A fascinated community is a group that embraces a psychoanalytic theory such as Bion's Klein's Winnicott's as one embraces truth. A troubled community is one that is not satisfied with the state of psychoanalytic knowledge and seeks to generate a fundamental change that does not square with existing traditions such as new psychoanalytic schools scientifically troubled communities and the relational approach. It is this amalgam and the continuous tension between these two groups that are responsible for psychoanalysis rich and varied development and for its ability to adapt to a changing world. Clinical vignettes from the work of Robert Stolorow, Betty Joseph, Antonino Ferro and Michael Eigen illustrate the dynamic by which psychoanalytic knowledge is formed. *Conservative and Radical Perspectives on Psychoanalytic Knowledge* will be of interest to psychoanalysts, psychotherapists and philosophers alike.

**Gaslighting, the Double Whammy, Interrogation and Other Methods of Covert Control in Psychotherapy and Analysis** Theodore L. Dorpat, 1996-10-28 In treatment the psychotherapist is in a position of power. Often this power is unintentionally abused. While trying to embody a compassionate concern for patients therapists use accepted techniques that can inadvertently lead to control, indoctrination and therapeutic failure. Contrary to the stated tradition and values of psychotherapy they subtly coerce patients rather than respect and genuinely help them. The more gross kinds of patient abuse, deliberate ones such as sexual and financial exploitation, are expressly forbidden by professional organizations. However, there are no regulations discouraging the more covert forms of manipulation which are not even considered exploitative by many clinicians. In this book noted psychiatrist Theo L. Dorpat strongly disagrees. Using a contemporary interactional perspective Dorpat demonstrates the destructive potential of manipulation and indoctrination in treatment. This book is divided into three parts. Part I explores the various ways power can be abused. Part II examines eleven treatment cases in which covert manipulation and control either caused analytic failure or severely impaired the treatment process. Cases discussed include the analyses of Dora and the Wolf Man by Freud, the two analyses of Mr Z by Kohut, as well as other published and unpublished treatments. An interactional perspective is used to examine the harmful short and long term effects of using indoctrination methods as well as to unravel conscious

and unconscious communications between therapists and patients that can contribute to manipulations Part III shows readers how to work using a non directive egalitarian approach in both psychoanalytic psychotherapy and psychoanalysis
