The Anarchy Lesson:

The Reading Lesson Patrick Brantlinger, 1998-12-22 Brantlinger's writing is admirably lucid his knowledge impressive and his thesis a welcome reminder of the class bias that so often accompanies denunciations of popular fiction Publishers Weekly Brantlinger is adept at discussing both the fiction itself and the social environment in which that fiction was produced and disseminated He brings to his study a thorough knowledge of traditional and contemporary scholarship which results in an important scholarly book on Victorian fiction and its production Choice Timely scrupulously researched thoroughly enlightening and steadily readable A work of agenda setting historical scholarship Garrett Stewart Fear of mass literacy stalks the pages of Patrick Brantlinger's latest book Its central plot involves the many ways in which novels and novel reading were viewed especially by novelists themselves as both causes and symptoms of rotting minds and moral decay among nineteenth century readers

Lessons in English History Henry Wilfrid Carter, 1917 **Climbing Lessons** Pete McDonald, 1997-09-30 Climbing Lessons describes the work of an instructor of outdoor pursuits from the late 1960s to the early 1990s It is set mainly at an outdoor education centre in Derbyshire northern England The book is accessible to casual non specialist readers as well as to outdoor professionals It presents outdoor education in plain English Climbing Lessons gives one person's perspective It covers one period Its style differs sharply and deliberately from that of academic works on outdoor education The author turned somersaults to avoid the jargon of education One tertiary lecturer remarked I made use of one of the chapters in a new unit I was struck by how accurately it reflects the reality of working in an outdoor centre Page size A5 Covers Softback Number of pages 384 About Outdoor Education Outdoor Leadership Rockclimbing Caving Walking Derbyshire Notes of Lessons on Moral Subjects Frederick William Hackwood, 1906 Lessons and Legacies I Peter Hayes, 1991-08-01 Nearly half a century after the Nazi massacre of the Jews in Europe the Holocaust is now moving from the domain of experience to that of history It is becoming the subject of recorded rather than living memory Is real comprehension of the development and horror of the Nazi onslaught accessible to us If so through what intellectual processes or categories of understanding and in the face of what temptations or diversions How can we preserve expand and apply our knowledge of why and how barbarity came to prevail What meaning can present and future generations derive from the catastrophe These are the vital questions addressed by the essays in this volume **A King's Lessons in**

Statecraft: Louis XIV Louis XIV (King of France), 1925 *Lessons on Foreign Aid and Economic Development* Nabamita Dutta, Claudia R. Williamson, 2019-09-06 A response to the pressing need to address and clarify the substantial ambiguity within current literature this edited volume aims to deepen readers understanding of the impact of foreign aid on development outcomes based on the latest findings in research over the past decade Foreign aid has long been seen as one of two extremes either beneficial or damaging a blessing or a curse Consequently many readers perceive aid's effectiveness based on the work of scholars who are assessing the impact of aid from one of two antithetical perspectives This book takes a

different approach shedding light on recent research that can deepen our understanding of the complex relationship between aid and its aftereffects Drawing from an extensive set of studies that have explored micro and macro impacts of foreign aid for recipient nations chapter authors highlight more layered and nuanced findings with a focus on donor characteristics political motives and an evaluation of aid projects and their effectiveness including the differential impact based on type of aid This volume is the first of its kind to unpack aid as a complex rather than a unitary concept and explore the wide areas of grey that have long enshrouded foreign aid

Military Interventions in Sierra Leone: Lessons From a Failed State Larry J. Woods, Timothy R. Reese, 2011-03-31 This study by Larry J Woods and Colonel Timothy R Reese analyzes the massive turmoil afflicting the nation of Sierra Leone 1995 2002 and the efforts by a variety of outside forces to bring lasting stability to that small country The taxonomy of intervention ranged from private mercenary armies through the Economic Community of West African States to the United Nations and the United Kingdom In every case those who intervened encountered a common set of difficulties that had to be overcome Unsurprisingly they also discovered challenges unique to their own organizations and political circumstances This cogent analysis of recent interventions in Sierra Leone represents a cautionary tale that political leaders and military planners contemplating intervention in Africa ignore at their peril Originally published by the Combat Studies Institute

E. H. Carr: Imperialism, War and Lessons for Post-Colonial IR Haro L Karkour, 2022-04-25 This book highlights important parallels between Carr and three influential figures in the first wave of post colonialism: DuBois, C. L. R. James, and Fanon on the analysis of imperialism and the causes of war. Specifically, Carr's analysis of imperialism and war parallels the first wave post colonial thinkers in two respects. First, Carr's work historically situates imperialism in the context of the social question in Western democracies. Second, Carr's work provides an ideology critique to Enlightenment rationalism, which postulates that reason could determine what are the universally valid moral laws, and thus, by the voice of reason, men could be persuaded both to save their own immoral souls and to move along the path of political enlightenment and progress. Carr (1984: 22 and 24) Carr's ideology critique exposes the Enlightenment's pretences of reason and universality as a deceptive plea that legitimates imperialism. These parallels the book argues reveal that Carr did not only recognise global hierarchy but also theorised the role of what Julian Go refers to as the episteme of empire, that is, the meanings and modalities of seeing and knowing that accompanied empire and made it possible in the first place. Go (2017: 19-20) Carr's IR theory, in short, was much closer to post colonial thinking than previously appreciated in the discipline.
