The Ancient Egyptian Coffin Texts Spells 1 1185 Index Three Volumes:

The Ancient Egyptian Coffin Texts Raymond Oliver Faulkner, 2004 Faulkner's authoritative English translation of Middle Kingdom coffin texts is essential for all Egyptologists. This new edition reprints his whole work in one volume. Filling the gap between the Pyramid texts and the New Kingdom Book of the Dead, these writings were intended to supply the deceased with the speeches he would need to achieve a secure and important position in the next world. As such, they supply valuable insights into Egyptian beliefs and mortuary practices. Concise textual notes are kept to a minimum, allowing the character of the texts to be experienced as a whole. Indexes cover divinities, localities, celestial bodies, selected Egyptian words in translation, and also the parts of boats and sailing gear that figure prominently in some spells. [Egypt, Trunk of the Tree, Vol. I](#) Simson R. Najovits, 2003. Writing in an easy-to-read narrative literary style while respecting the norms of Egyptological scholarship, the author examines the contradictory opinions of major Egyptologists and the major loonies and brings us closer to Egypt's core meaning and influence. Along the way, he illuminates the enchanting imaginative beauty of the Egyptian saga. Ancient Egypt built a society on a remarkable mixture of the new, the useful, and the beautiful while retaining primitive magic, obscurantism, and the infantile, but extraordinarily poetic. Egypt was also one of the most optimistic nations ever founded, inventing optimistic answers to many of man's fundamental questions. Volume I surveys the religious underpinnings of the society, including the founding of the first nation and the first nation to proclaim its sacred nature. Divine kingship, the holy city, and capital city were invented here. **The Ancient Egyptian Book of the Moon: Coffin Texts Spells 154-160**

Gyula Priskin, 2019-05-02. This book proposes that Coffin Texts spells 154-160, recorded at the beginning of the 2nd millennium BCE, form the oldest composition about the moon in ancient Egypt and indeed the world. Based on a new translation, the detailed analysis of these spells reveals that they provide a chronologically ordered account of the phenomena of a lunar month. [Egypt, Trunk of the Tree, Vol. II](#) Simson Najovits, 2003. In the first of a planned two volumes, Najovits, former editor in chief of Radio France International, provides a remarkably evenhanded introductory survey of Egypt. He observes that the earliest Egyptian culture, with the introduction of farming and animal husbandry, can be traced to around 5800 B.C. but his own overview begins around 4000 B.C. with an investigation of the predynastic Naqada culture and its religious system of totemism, animism, and magic. Najovits contends that scholarly focus on ancient Greece and Rome and on Christianity and Judaism has tended to obscure Egyptian contributions to the development of culture. Egyptian religion was highly original, he says. Never before had such an elaborate religion and such an all-inclusive mythology been invented. As to its lasting contributions, the Egyptians, he says, invented the belief that the body could be preserved and stay alive after death. They were also, he claims, the first monotheistic culture, although monotheism waxed and waned under various pharaohs. They developed a belief in a savior god, Osiris, whose resurrection led to a belief in the afterlife. Najovits even concludes that the holy family of Osiris, Isis, and Horus offers the mythological foundations upon which later cultures constructed their own.

foundational holy families e.g. Jesus Mary and Joseph Egypt also provided examples of early jurisprudence and political systems primarily in its extensive legal codes and its focus on kingship On balance Najovits offers a detailed and original historical survey of Egypt as a cradle of civilization Publishers Weekly Egypt, the Trunk of the Tree, Vol. II Simson Najovits, 2003 An award winning writer and international journalist leads the general reader through ancient Egypt exploring the maze of facts and fantasies and examines Egypt's place in the history of religion and monotheism in particular Volume 1 examines the conte Egypt 2015: Perspectives of Research Mladen Tomorad, Joanna Popielska-Grzybowska, 2017-04-30 This volume presents proceedings from the Seventh European Conference of Egyptologists Zagreb Croatia 2015 **Bodily Fluids in Antiquity** Mark Bradley, Victoria Leonard, Laurence Totelin, 2021-04-26 From ancient Egypt to Imperial Rome from Greek medicine to early Christianity this volume examines how human bodily fluids influenced ideas about gender sexuality politics emotions and morality and how those ideas shaped later European thought Comprising 24 chapters across seven key themes language gender eroticism nutrition dissolution death and afterlife this volume investigates bodily fluids in the context of the current sensory turn It asks fundamental questions about physicality and fluidity how were bodily fluids categorised and differentiated How were fluids trapped inside the body perceived and how did this perception alter when those fluids were externalised Do ancient approaches complement or challenge our modern sensibilities about bodily fluids How were religious practices influenced by attitudes towards bodily fluids and how did religious authorities attempt to regulate or restrict their appearance Why were some fluids taboo and others cherished In what ways were bodily fluids gendered Offering a range of scholarly approaches and voices this volume explores how ideas about the body and the fluids it contained and externalised are culturally conditioned and ideologically determined The analysis encompasses the key geographic centres of the ancient Mediterranean basin including Greece Rome Byzantium and Egypt By taking a longue dur e perspective across a richly intertwined set of territories this collection is the first to provide a comprehensive wide ranging study of bodily fluids in the ancient world Bodily Fluids in Antiquity will be of particular interest to academic readers working in the fields of classics and its reception archaeology anthropology and ancient to Early Modern history It will also appeal to more general readers with an interest in the history of the body and history of medicine Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Dictionary of Daily Life in Biblical & Post-Biblical Antiquity: Magic Edwin M. Mediterráneos Arturo Echavarren, Sergio Carro Martín, Esther Fernández Medina, 2014-08-26 Throughout history different cultural traditions, all of them with considerable linguistic diversity, have flourished and converged in the Mediterranean and Near Eastern regions. The International Conference of Junior Researchers in Mediterranean and Near Eastern Languages and Cultures provided a transverse and interdisciplinary framework of discussion and reflection on the intellectual and cultural production of the Mediterranean and the Near East from its earliest stages to the present. This book is the result of the analysis of the different political, religious and social trends of thought, material culture and artistic literary and linguistic expressions brought together in this geographical area, highlighting the scope of this blend of traditions within different space-time surroundings.

Irrigation in Early States Stephanie Rost, 2022-06-30 Irrigation has long been of interest in the study of the past. Many early civilizations were located in river valleys and irrigation was of great economic importance for many early states because of the key role it played in producing an agricultural surplus, which was the main source of wealth and the basis of political power for the elites who controlled it. Agricultural surplus was also necessary to maintain the very features of statehood such as urbanism, full time labor specialization, state institutions and status hierarchy. Yet the presence of large scale or complex irrigation systems does not necessarily mean that they were under centralized control. While some early states organized the construction, operation and maintenance of irrigation works and resolved conflicts related to water distribution, other early governments left most of the management to local farmers and controlled only the surplus. The cross cultural studies in this volume reexamine the role of irrigation in early states. Ranging geographically from South America and the southwestern United States to North Africa, the Middle East and Asia, they describe the physical attributes and environments of early irrigation systems, various methods for empirical investigation of ancient irrigation and irrigation's economic, sociopolitical and cosmological dimensions. Through their interdisciplinary perspectives, the authors, all experts in the field of irrigation studies, advance both methodological and theoretical approaches to understanding irrigation in early civilizations.

Isaiah's Kingship Polemic William D. Barker, 2014-11-19 William D. Barker analyzes a wide array of possible ancient Near Eastern backgrounds to Isaiah 24-27. He finds that there is a uniquely Ugaritic background to the chapters with evidence of a literary framework and narrative progression that has been intentionally adopted and creatively adapted from either the Ba

al Myth KTU 1 1 1 6 itself or a shared tradition between ancient Ugarit and ancient Israel Barker also closely examines Isaiah 24 27 in the light of the Ugaritic material and thereby contributes to the resolution of some of the historic questions about the interpretation genre dating and function of Isaiah 24 27 A new epithet for the chapters is also proposed
