The Ancient Mounds Of Poverty Point Place Of Rings:

The Ancient Mounds of Poverty Point Jon L. Gibson, 2001 Gibson the grand old man of Poverty Point archaeology has presented his personal reflections on his and others extensive work at this mysterious and awe inspiring site He recounts in his equally mysterious Louisiana voice the setting meaning and history of archaeological thought that surround the site Mike Russo National Park Service Jon Gibson confronts the intriguing mystery of Poverty Point the ruins of a large prehistoric Indian settlement that was home to one of the most fascinating ancient cultures in eastern North America The 3 500 year old site in northeastern Louisiana is known for its large elaborate earthworks a series of concentric crescent shaped dirt rings and bird shaped mounds With its imposing 25 mile core it is one of the largest archaic constructions on American soil It s also one of the most puzzling perplexing questions haunt Poverty Point and archaeologists still speculate about life and culture at the site its age how it was created and if it was at the forefront of an emerging complex society Gibson s engaging well illustrated account of Poverty Point brings to life one of the oldest earthworks of its size in the Western Hemisphere the hub of a massive exchange network among native American peoples reaching a third of the way across the present day United States Gibson the eminent authority on the site boldly launches the first full scale political economic and organizational analysis of Poverty Point and nearby affiliated sites Writing in an informal style he examines the period s architecture construction tools and appliances economy exchange and ceremonies **Poverty Point Legends & Lore** Jon L. Gibson, 2021-08-09 Archaeologists have been investigating the ruins of Poverty Point for decades piecing together a fascinating picture of a 3 500 year old hunter gatherer way of life But Poverty Point is more than an archaeological treasure trove It s also an eerie locus for southeastern native lore Cold breezes on warm nights stir up spirit foxes and singing locusts Otherworldly messages find their conduit in the drumming of trees and hooting of owls Archaeologist and author Jon Gibson unearths the strange narratives that are as much a part of Poverty Point as the artifacts and earthworks themselves The Louisiana and Arkansas Expeditions of Clarence Bloomfield Moore Clarence Bloomfield Moore, 2003 The ninth and final volume in the C B Moore reprint series that covers archaeological discoveries along North American Waterways The Oxford Handbook of North American Archaeology Timothy R. Early New World Monumentality Richard L. Burger, Robert M. Rosenswig, 2012-05-20 In studies of ancient civilizations the focus is often on the temples palaces and buildings created and then left behind both because they survive and because of the awe they still inspire today From the Mississippian mounds in the United States to the early pyramids of Peru these monuments have been well documented but less attention has been paid to analyzing the logistical complexity involved in their creation In this collection prominent archaeologists explore the sophisticated political and logistical organizations that were required to plan and complete these architectural marvels They discuss the long term political social and military impacts these projects had on their respective civilizations and illuminate the significance of monumentality among early complex societies in the Americas Early New World Monumentality is ultimately a study of labor and its mobilization as well as the long term spiritual awe and political organization that motivated and were enhanced by such undertakings Mounds and other impressive monuments left behind by earlier civilizations continue to reveal their secrets offering profound insights into the development of complex societies throughout the New World

An Archaic Mexican Shellmound and Its Entombed Floors Barbara Voorhies, 2015-12-31 Tlacuachero is the site of an Archaic period shellmound located in the wetlands of the outer coast of southwest Mexico This book presents investigations of several floors that are within the site's shell deposits that formed over a 600 800 year interval during the Archaic period ca 8000 2000 BCE a crucial timespan in Mesoamerican prehistory when people were transitioning from full blown dependency on wild resources to the use of domesticated crops The floors are now deeply buried in a limited area below the summit of the shellmound The authors explore what activities were carried out on their surfaces discussing the floors patterns of cultural features sediment color density and types of embedded microrefuse and phytoliths as well as chemical signatures of organic remains The studies conducted at Tlacuachero are especially significant in light of the fact that data rich lowland sites from the Archaic period are extraordinarily rare the wealth of information gleaned from the floors of the Tlacuachero shellmound can now be widely appreciated

Early Art of the Southeastern Indians

Susan C. Power, 2004 Early Art of the Southeastern Indians is a visual journey through time highlighting some of the most skillfully created art in native North America. The remarkable objects described and pictured here many in full color reveal the hands of master artists who developed lapidary and weaving traditions established centers for production of shell and copper objects and created the first ceramics in North America. Presenting artifacts originating in the Archaic through the Mississippian periods from thousands of years ago through A D 1600 Susan C Power introduces us to an extraordinary assortment of ceremonial and functional objects including pipes vessels figurines and much more. Drawn from every corner of the Southeast from Louisiana to the Ohio River valley from Florida to Oklahoma the pieces chronicle the emergence of new media and the mastery of new techniques as they offer clues to their creators widening awareness of their physical and spiritual worlds. The most complex works writes Power were linked to male and sometimes female leaders. Wearing bold ensembles consisting of symbolic colors sacred media and richly complex designs the leaders controlled large ceremonial centers that were noteworthy in regional art history such as Etowah Georgia Spiro Oklahoma Cahokia Illinois and Moundville Alabama. Many objects were used locally others circulated to distant locales. Power comments on the widening of artists subjects starting with animals and insects moving to humans then culminating in supernatural combinations of both and she discusses how a piece's artistic language could function as a visual shorthand in local style and expression yet embody an iconography of regional proportions. The remarkable achievements of these southeastern artists delight the senses and engage the mind while giving a brief glimpse into the rich symbolic world of feathered serpents and winged beings.

Timothy R. Pauketat, 2007 This book sweeps away the last vestiges of social evolutionary explanations of chieftdoms by rethinking the history of Pre Columbian Southeast peoples and comparing them to ancient peoples in the Southwest Mexico Mesoamerica and Mesopotamia *The Caddos and Their Ancestors* Jeffrey S. Girard, 2018-03-14 Taking an archaeological perspective on the past Jeffrey S Girard traces native human habitation in northwest Louisiana from the end of the last Ice Age through the formation of the Caddo culture in the tenth century BCE to the early nineteenth century Employing the results of recent scientific investigations The Caddos and Their Ancestors depicts a distinct and dynamic population spanning from precolonial times to the dawn of the modern era Girard grounds his research in the material evidence that defined Caddo culture long before the appearance of Europeans in the late seventeenth century Reliance solely on documented observations by explorers and missionaries which often reflect a Native American population with a static past propagates an incomplete account of history By using specific archaeological techniques Girard reveals how the Caddos altered their lives to cope with ever changing physical and social environments across thousands of years This illuminating approach contextualizes the remnants of houses mounds burials tools ornaments and food found at Native American sites in northwest Louisiana Through ample descriptions and illustrations of these archaeological finds Girard deepens understanding of the social organization technology settlement art and worldviews of this resilient society This long overdue examination of an often overlooked cultural force provides a thorough yet concise history of the 14 000 years the Caddo people and their predecessors survived and thrived in what is now Louisiana **The Attacking Ocean** Brian Fagan, 2013-06-11 The past

fifteen thousand years the entire span of human civilization have witnessed dramatic sea level changes which began with rapid global warming at the end of the Ice Age when coastlines were more than seven hundred feet below modern levels Over the next ten millennia the oceans climbed in fits and starts These rapid changes had little effect on those humans who experienced them partly because there were so few people on earth and also because those people were able to adjust readily to new coastlines Global sea levels stabilized about six thousand years ago except for local adjustments that caused often significant changes to places such as the Nile Delta The curve of inexorably rising seas flattened out as urban civilizations developed in Egypt Mesopotamia and South Asia The earth's population boomed quintupling from the time of Christ to the Industrial Revolution The threat from the oceans increased with our crowding along shores to live fish and trade Since 1860 the world has warmed significantly and the ocean's climb has accelerated The sea level changes are cumulative and gradual no one knows when they will end The Attacking Ocean from celebrated author Brian Fagan tells a tale of the rising complexity of the relationship between humans and the sea at their doorsteps a complexity created not by the oceans which have changed little What has changed is us and the number of us on earth

The Cultural Dynamics of Shell-Matrix Sites Mirjana Roksandic, Sheila Mendonça de Souza, Eggers Sabine, Meghan Burchell, 2014-05-15 The excavation of shell middens and mounds is an important source of information regarding past human diet settlement technology and paleoenvironments The contributors to this book introduce new ways to study shell matrix sites ranging from the geochemical analysis of shellfish to the interpretation of human remains buried within Drawing upon examples from around the world this is one of the only books to offer a global perspective on the archaeology of shell matrix sites A substantial contribution to the literature on the subject and essential reading for archaeologists and others who work on this type of site Barbara Voorhies University of California Santa Barbara author of *Coastal Collectors in the Holocene The Chantuto People of Southwest Mexico*

European explorers were the first to find the evidence of earlier civilizations who built monumental earthwork mounds ceremonial complexes and cities in the Mississippi and Ohio River Valleys Speculations went wild about who built these incredible centers This fascination over the mysterious mound building cultures continues to this very day **North**

America before the European Invasions Alice Beck Kehoe, 2016-12-01 North America Before the European Invasions tells the histories of North American peoples from first migrations in the Late Glacial Age sixteen thousand years ago or more to the European invasions following Columbus s arrival Contrary to invaders propaganda North America was no wilderness and its peoples had developed a variety of sophisticated resource uses including intensive agriculture and cities in Mexico and the Midwest Written in an easy flowing style the book is a true history although based primarily on archeological material It reflects current emphasis within archaeology on rejecting the notion of pre history instead combining archaeology with post Columbian ethnographies and histories to present the long histories of North America s native peoples most of them still here and still part of the continent s history
