The Human Security Paradigm: Challenges & Opportunities Dr. Priti Chahal ,Dr. Meenakshi Mawi ,Dr. Megha Kumari ,2024-12-20 In an era marked by unprecedented global challenges the concept of human security has emerged as a significant framework for rethinking traditional approaches to security Historically security was almost exclusively understood in terms of state sovereignty military capacity and territorial protection However as the world has become more interconnected with transnational threats becoming more complex there has been a growing recognition of the need to move beyond the state centric militarized definition of security The human security paradigm offers an alternative one that emphasizes the security of individuals and communities rather than just that of states This shift reflects the reality that the threats faced by people today are multidimensional and transcend national borders From poverty inequality and environmental degradation to terrorism pandemics and cyber threats the sources of insecurity are increasingly non military in nature demanding a more comprehensive and people centric approach
