**THE ANTAGONISTIC LINK.** Rolinka Kattouw,1992      **The Discursive-Digital Link** Ehsan Dehghan,2025-08-22 We are in a state of crisis Democracy is under threat authoritarian politics are on the rise and digital media once heralded as emancipatory technologies are increasingly implicated in democratic erosion The Discursive Digital Link offers a critical framework for understanding the entangled relationships between discourse digital media and the hidden dynamics behind antagonism and polarisation The Discursive Digital Link presents a fluid social ontology that theorises how discourses and digital communication technologies are inseparably entangled and how this entanglement contributes to the formation of complex hierarchical relations Drawing on discourse theory and new materialist perspectives Dehghan maps how the various components of the discursive digital link users collectives identities the medium s design underlying neoliberal capitalist logics and structural power dynamics together shape antagonistic frontiers in digital spaces Through detailed case studies across multiple digital media Dehghan demonstrates how these entanglements manifest through different articulatory logics that could transform societies towards either agonistic progress or disastrous polarisation By revealing the logics of discursive digital alliances and active passivity Dehghan provides critical insights for academics activists and anyone seeking to foster progressive togetherness The Discursive Digital Link offers a powerful theoretical framework and methodology for analysing digitally mediated communication It challenges monolithic understandings of polarisation technological solutionism and symptom focused approaches instead advocating for radical structural interventions across all entangled components of the discursive digital link a necessary shift in both academic research and progressive political strategy to address the democratic crises of our time      **The Antagonistic Principle** Massimo Modonesi,2018-11-05 In this important contribution to political theory Massimo Modonesi develops the thesis that a Marxist theory of political action can be developed from the notion of antagonism defined as a distinctive feature of struggle and of the political experience of insubordination The author argues this central idea with close reference to the concept of class struggle He advances a theoretical proposal based on the triad subalternity antagonism autonomy as well as the uneven and combined character of the processes of political subjectification At the center of this triad the concept of antagonism stands out as a logical principle and the core of a Marxist theory of political action At the same time subalternism reappears frequently as the counter pole of antagonistic activation and autonomous practices and as the root of what Antonio Gramsci calls passive revolutions      *Food Webs* John C. Moore,Peter C. de Ruiter,Kevin S. McCann,2018 This book presents new approaches to studying food webs using practical and policy examples to demonstrate the theory behind ecosystem management decisions      **Network Data Mining And Analysis** Ming Gao,Ee-peng Lim,David Lo,2018-09-28 Online social networking sites like Facebook LinkedIn and Twitter offer millions of members the opportunity to befriend one another send messages to each other and post content on the site actions which generate mind boggling amounts of data every day To make sense of the massive data from these sites we

Theories of the Nonobject M—nica Amor,2016-03-15 Theories of the Nonobject investigates the crisis of the sculptural and painterly object in the concrete neoconcrete and constructivist practices of artists in Argentina Brazil and Venezuela with case studies of specific movements artists and critics Amor traces their role in the significant reconceptualization of the artwork that Brazilian critic and poet Ferreira Gullar heralded in Theory of the Nonobject in 1959 with specific attention to a group of major art figures including Lygia Clark H lio Oiticica and Gego whose work proposed engaged forms of spectatorship that dismissed medium based understandings of art Exploring the philosophical economic and political underpinnings of geometric abstraction in post World War II South America Amor highlights the overlapping inquiries of artists and critics who working on the periphery of European and US modernism contributed to a sophisticated conversation about the nature of the art object Provided by publisher

**The Art of Joaquín Torres-García** Aarnoud Rommens,2016-08-05 Intertwining art history aesthetic theory and Latin American studies Aarnoud Rommens challenges contemporary Eurocentric revisions of the history of abstraction through this study of the Uruguayan artist Joaqu n Torres Garc a After studying and painting for decades in Europe Torres Garc a returned in 1934 to his native home Montevideo with the dream of reawakening and revitalizing what he considered the true indigenous essence of Latin American art Abstract Spirit Rommens rigorously analyses the paradoxes of the painter s aesthetic philosophical doctrine of Constructive Universalism as it sought to adapt European geometric abstraction to the Americas Whereas previous scholarship has dismissed Torres Garc a s theories as self contradictory Rommens seeks to recover their creative potential as well as their role in tracing the transatlantic routes of the avant garde Through the highly original method of reading Torres Garc a s artworks as a critique on the artist s own writings Rommens reveals how Torres Garc a appropriates the colonial language of primitivism to construct the artificial image of pure pre Columbian abstraction Torres Garc a thereby inverts the history of art this book teases out the important lessons of this gesture and the implications for our understanding of abstraction today
