Understanding Contexts Of Business In Western Asia:

Land Of Bazaars And High-tech Booms Leo-paul Dana, Aidin Salamzadeh, Veland Ramadani, Ramo Palalic, 2022-05-05 Not one size fits all Yet some books teach business with minimal focus on the context for business In reality firms large and small are highly affected by the context in which they operate yet context is not uniformly conceptualized theorized and operationalized by scholars of business and management While most theories have come from developed countries with bountiful contexts the diverse contexts of Western Asia are little understood Religious factors are profoundly dominant in Western Asia and businesses in this diverse area operate with considerations that are rarely considered in research This book reveals a variety of schools of thought that have molded several business models and mechanisms which are to some extent different from the context of Western economies The Agriculture of West Asia Henrietta Holm Tegeler, 1966

Agricultural Situation in Africa and West Asia United States. Department of Agriculture. Economic Research Service, United States. Dept. of Agriculture. Economic Research Service, 1972 *Labor and Rainfed Agriculture in West Asia and North Africa* Dennis Tully, 2012-12-06 The basic objective of agricultural research at ICARDA is to enhance producer and consumer welfare through increasing the productivity stability and profitability of agriculture Improved practices must be technically ec onomically and socially suitable to farmer conditions The rainfed areas of West Asia and North Africa have highly variable environmental conditions as well as complex social and economic structures In recent years the region has been experiencing major changes in the relative availabilities and costs of the classical factors of production land labor and capital These changes have important implications for the design of new agricultural technology On the one hand the availability of labor may be an important factor determining the acceptability of new technology On the other it is important to consider the impact that technology can have on rural employment To develop a better awareness of these issues and their relevance to technology development ICARD A initiated a project on Agricultural Labor and Tech nological Change The first stage of the project is published here it is a review of available literature on selected issues of regional importance com bined with more detailed analyses of the situations of eight countries with important rainfed agricultural sectors ICARDA greatly appreciates the financial assistance of the Ford Foun dation which allowed us to support the execution of the study and publi cation of its findings We also appreciate the great efforts of the authors in the face of often limited data and facilities

Sivakumar,Rattan Lal,Ramasamy Selvaraju,Ibrahim Hamdan,2013-07-30 The countries of West Asia and North Africa WANA have long had the challenge of providing sustainable livelihoods for their populations in the fragile ecosystems of semi arid and arid areas Climate change is already a reality in WANA and it places additional constraints on the already fragile ecosystems of dry areas and limited natural resources in WANA A comprehensive and integrated approach to planning and implementing the climate change adaptation strategies

across the wide range of agro ecosystems in different countries in WANA could help both the planners and the local communities to deal effectively with the projected impacts and also contribute to overall sustainability of agricultural production systems This book addresses the important issue of climate change and food security in West Asia and North Africa and presents the appropriate strategies which could help in the development of new policies to better adapt agriculture production systems and enhance food security in WANA **Displacing Territory** Karen Culcasi,2023-07-14

Displacing Territory explores the core concepts of territory and belonging and humanizes refugees in the process Based on fieldwork with Palestinian and Syrian refugees in Jordan **Displacing Territory** explores how the lived realities of refugees are deeply affected by their imaginings of what constitutes territory and their sense of belonging to different places and territories Karen Culcasi shows how these individual conceptualizations about territory don t always fit the Western centric division of the world into states and territories thus revealing alternative or subordinated forms and scales of territory She also argues that disproportionate attention to refugee crises in the Global North has diverted focus from other parts of the world that bear the responsibility of protecting the majority of the world s refugees By focusing on Jordan a Global South state that hosts the world s second largest number of refugees per capita this book provides insights to consider alternate ways to handle the situation of refugees elsewhere In the process Culcasi brings the reader into refugees diverse realities through their own words inherently arguing against the tendency of many people in the Global North to see refugees as aberrant burdensome or threatening *The Oxford Handbook of Christianity in Asia* Felix Wilfred,2014-05-23 Named by the International Bulletin of Missionary Studies as an Outstanding Book of 2014 for Mission Studies Despite the ongoing global expansion of Christianity there remains a lack of comprehensive scholarship on its development in Asia This volume fills the gap by exploring the world of Asian Christianity and its manifold expressions including worship theology spirituality inter religious relations interventions in society and mission The contributors from over twenty countries deconstruct many of the widespread misconceptions and interpretations of Christianity in Asia They analyze how the growth of Christian beliefs throughout the continent is linked with the socio political and cultural processes of colonization decolonization modernization democratization identity construction of social groups and various social movements With a particular focus on inter religious encounters and emerging theological and spiritual paradigms the volume provides alternative frames for understanding the phenomenon of conversion and studies how the scriptures of other religious traditions are used in the practice of Christianity within Asia **Sustainable Agricultural Development in the Dry Areas of West Asia and North Africa** J. I.

Furtado,Aart van Schoonhoven,Safei El-Deen Hamed,1995 Report based on a Seminar on Natural Resources and Environment Management in the Dry Areas of West Africa and North Africa Aleppo Syria 16 27 February 1992 *Socialist India* ,1973 *The Geography of Contemporary China* Jing'ai Wang,Shunlin Liang,Peijun Shi,2022-06-28 This textbook provides a comprehensive and very detailed insight into Chinese Contemporary Geography in English It documents the

geographical issues associated with China's rapid growth. Since initiating the reforms and open policy, China has achieved tremendous success. China's rapid growth is now a driving force in the global economy and is achieving unprecedented rates of poverty reduction. However, China also faces a number of sustainability and emerging challenges associated with rapid growth, such as growing regional disparities in terms of per capita income and social economic development, sustainable resource development, and issues related to regional and global economic integration. In addition, rapid economic growth has also brought about major challenges such as resource shortages, ecological and environmental destruction, land degradation, and frequent disasters. This book presents the author's reflections. This lavishly illustrated book covers physical geography, history, and economic and political systems of the world's most populous country. The major focus is on geographical issues in China's contemporary development, agriculture, population, urbanization, resource, and energy and environment. The lead author of the book has taught relevant courses in China for three decades and authored and edited multiple textbooks for Chinese students. This book will appeal to undergraduate students of geography and related disciplines with a regional focus on China and to the general reader who wants to learn different geographical aspects of modern China with little academic background in geography.
