Dynamic Interpretation of Early Cities in Ancient China Hong Xu, 2021-06-14 This book offers an archaeological study on China's ancient capitals. Using abundant illustrations of ancient capital sites, it verifies the archaeological discoveries with documentary records. The author introduces the dynamical interpretation of each ancient capital to the interpretation of the entire development history of China's ancient capitals. The book points out that for most of the almost 2000 years from the earliest Erlitou to the Ye city, there was an era where ancient capitals didn't have outer enclosures due to factors such as the strong national power, the military and diplomatic advantage, the complexity of the residents, and the natural conditions. Thus, an era of the huge ancient capitals without guards lasting for over 1000 years formed. The concept that China's ancient capitals don't have outer enclosures presented in the book questions the traditional view that every settlement has walled enclosures. Combining science with theory, it offers researchers of history a clear understanding of the development process of China's ancient capitals.

The Archaeology of China Li Liu, Xingcan Chen, 2012-04-30 Past, present, and future. The archaeological materials recovered from the Anyang excavations in the period between 1928 and 1937 have laid a new foundation for the study of ancient China.

Li C 1977 ix When inscribed oracle bones and enormous material remains were found through scientific excavation in Anyang in 1928, the historicity of the Shang dynasty was confirmed beyond dispute for the first time.

Li C 1977 ix xi This excavation thus marked the beginning of a modern Chinese archaeology endowed with great potential to reveal much of China's ancient history.

Half a century later, Chinese archaeology had made many unprecedented discoveries which surprised the world, leading Glyn Daniel to believe that a new awareness of the importance of China will be a key development in archaeology in the decades ahead.

Daniel 1981 211 This enthusiasm was soon shared by the Chinese archaeologists when Su Bingqi announced that the Golden Age of Chinese archaeology is arriving.

Su B 1994 139 140 In recent decades, archaeology has continuously prospered, becoming one of the most rapidly developing fields in social science in China.
