The Architect And The American Country House 1890 194:

American Architect and the Architectural Review, 1891 **The American Architect and Building News**, 1890 A History of American Architecture Mark Gelernter, 2001 Why did the colonial Americans give over a significant part of their homes to a grand staircase Why did the Victorians drape their buildings ornate decoration And why did American buildings grow so tall in the last decades of the 19th century This book explores the history of American architecture from prehistoric times to the present explaining why characteristic architectural forms arose at particular times and in particular places

Index to the Periodicals of 1890-1902 The Review of reviews, 1901 **American Architect and Building News**, 1890 **The Architectural Forum**, 1942-07 Tremaine Houses Volker M. Welter, 2019-11-19 This volume analyzes the extraordinary patronage of modern architecture that the Tremaine family sustained for nearly four decades in the mid twentieth century From the late 1930s to the early 1970s two brothers Burton G Tremaine and Warren D Tremaine and their respective wives Emily Hall Tremaine and Katharine Williams Tremaine commissioned approximately thirty architecture and design projects Richard Neutra and Oscar Niemeyer designed the best known Tremaine houses Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement Focusing on the Tremaines houses and other projects such as a visitor center at the meteor crater in Arizona this volume explores the Tremaines architectural patronage in terms of the family's motivations and values exposing patterns in what may appear as an eclectic collection of modern architecture Architectural historian Volker M Welter argues that the Tremaines patronage was not driven by any single factor rather it stemmed from a network of motives comprising the clients practical requirements their private and public lives and their ideas about architecture and art 194X Andrew Michael Shanken, 2009 During the Second World War American architecture was in a state of crisis The rationing of building materials and restrictions on nonmilitary construction continued the privations that the profession had endured during the Great Depression At the same time the dramatic events of the 1930s and 1940s led many architects to believe that their profession and society itself would undergo a profound shift once the war ended with private commissions giving way to centrally planned projects The magazine Architectural Forum coined the term 194X to encapsulate this wartime vision of postwar architecture and urbanism In a major study of American architecture during World War II Andrew M Shanken focuses on the culture of anticipation that arose in this period as out of work architects turned their energies from the built to the unbuilt redefining themselves as planners and creating original designs to excite the public about postwar architecture Shanken recasts the wartime era as a crucible for the intermingling of modernist architecture and consumer culture Challenging the pervasive idea that corporate capitalism corrupted the idealism of modernist architecture in the postwar era 194X shows instead that architecture's wartime partnership with corporate America was founded on shared anxieties and ideals Business and architecture were brought together in innovative ways as shown by Shanken's persuasive reading of

magazine advertisements for Revere Copper and Brass U S Gypsum General Electric and other companies that prominently featured the work of leading progressive architects including Louis I Kahn Eero Saarinen and Walter Gropius Although the unexpected prosperity of the postwar era made the architecture of 194X obsolete before it could be built and led to its exclusion from the story of twentieth century American architecture Shanken makes clear that its anticipatory rhetoric and designs played a crucial role in the widespread acceptance *Building* ,1890 **Mall Maker** M. Jeffrey Hardwick,2010-03-09 The enclosed shopping mall now so ubiquitous was invented by one man Victor Gruen Mall Maker is the first biography of this visionary spirit *American Architect* ,1890 **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl** Avery Library,1992 **American Architect and Architecture** ,1890 **The Builder** ,1890 *The Architect & the American Country House, 1890-1940* Mark A. Hewitt,Richard Cheek,1990 Wealthy Americans began building opulent country estates in the late 1880s and continued to do so for the next fifty years In this beautifully illustrated and informative book we view the breadth and aesthetic vitality of these American country houses through the expert eye of a practicing architect 250 black and white illustrations 60 color plates *Southern Architecture Illustrated* ,2002 More than two hundred and fifty illustrations and plans of outstanding country and suburban homes in the South as selected by a committee of prominent architects members of the American Institute Includes 101 residential designs and 42 floor plans

Air-Conditioning in Modern American Architecture, 1890-1970 Joseph M. Siry,2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history **The Architects and the City** Robert Brueggemann,1997-08-18 This book connects architectural history with urban history by looking at the work of a major architectural firm Holabird Roche No firm in any large American city had a greater impact

With projects that ranged from tombstones to skyscrapers boiler rooms to entire industrial complexes Holabird Roche left an indelible stamp on the city of Chicago and indeed far beyond In this volume the first of two on Holabird Roche and its successor Holabird Root Robert Brueggemann traces the firm s history from its founding in 1880 to the end of the First World War

Paradise Planned Robert A.M. Stern,David Fishman,Jacob Tilove,2013-12-03 Paradise Planned is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape
