The Architect's Eye Deborah Nevins, Robert A. M. Stern, 1979-01-01      **THE ARCHITECT'S EYE.** Deborah Nevins, Robert A. M. Stern, 1979      *American Architects and the Mechanics of Fame* Roxanne Kuter Williamson, 2014-03-07

Why does one talented individual win lasting recognition in a particular field while another equally talented person does not? While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame. The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated. In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern. She traces the apprenticeship connection in case studies of Louis Sullivan, Frank Lloyd Wright, Henry Hobson Richardson, the firm of McKim, Mead, White, Latrobe and his descendants, the Bulfinch and Renwick Lines, the European immigrant masters and Louis Kahn. Although she acknowledges and discusses the importance of family connections, the right schools, self-promotion, scholarships, design competition awards, and promotion by important journals, Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame. She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self-confidence to be true to one's own vision. Perhaps she says this is the case in all the arts. *American Architects and the Mechanics of Fame* is sure to provoke thought and comment in architecture and other creative fields.      *Drawing on Architecture* Jordan Kauffman, 2019-03-19

How architectural drawings emerged as aesthetic objects promoted by a network of galleries, collectors, and institutions, and how this changed the understanding of architecture. Prior to the 1970s, buildings were commonly understood to be the goal of architectural practice; architectural drawings were seen simply as a means to an end. But just as the boundaries of architecture itself were shifting at the end of the twentieth century, the perception of architectural drawings was also shifting; they began to be seen as autonomous objects outside the process of building. In *Drawing on Architecture*, Jordan Kauffman offers an account of how architectural drawings, promoted by a network of galleries and collectors' exhibitions and events, emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts, and how this was both emblematic of changes in architecture and a catalyst for these changes. Kauffman traces moments of critical importance to the evolution of the perception of architectural drawings, beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right. When architectural drawings were seen as having intrinsic value, they became collectible, and Kauffman chronicles early collectors, galleries, and sales. He discusses three key exhibitions at the Leo Castelli Gallery in New York, other galleries around the world that specialized in architectural drawings, the founding of architecture museums that understood and collected drawings as important cultural and historical

artifacts and the effect of the new significance of architectural drawings on architecture and architectural history Drawing on interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change **Marie Adrien Persac** Marie Adrien Persac, H. Parrott Bacot, 2000 Marie Adrien Persac 1823-1873 was a French born Louisiana artist who worked in a range of mediums to produce a unique view of the lower Mississippi Valley at midcentury In the first catalogued exhibition devoted solely to this multifaceted but overlooked talent paintings drawings maps and photographs from numerous holdings have been brought together to present fresh insights and reevaluate this artist's place in the annals of American history and material culture Due in part to his broad talents artist cartographer architect civil engineer photographer and art teacher Persac's work is of major importance to Southern history researchers and art historians His paintings of south Louisiana plantation houses have captured that now varnished lifestyle in minute detail approximating the exactitude of architectural drafting Today this series is invaluable to scholars of the period as is Persac's painting of a steamboat interior the only one known to exist and another French Opera House which burned to the ground in 1919

Reiff, 2010-11-01 Many homes across America have designs based on plans taken from pattern books or mail order catalogs In Houses from Books Daniel D Reiff traces the history of published plans

and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950 *Houses from Books* shows that architectural publications from Palladio's *I Quattro Libri* to Aladdin's *Ready Cut Homes* played a decisive role in every aspect of American domestic building Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country His book also offers a wide ranging analysis of the economic and social conditions shaping American building practices As architectural publication developed and grew more sophisticated it played an increasingly prominent part in the design and the construction of domestic buildings In villages and small towns which often did not have professional architects the publications became basic resources for carpenters and builders at all levels of expertise Through the use of published designs they were able to choose among a variety of plans styles and individual motifs and engage in a fruitful dialogue with past and present architects *Houses from Books* reconstructs this dialogue by examining the links between the published designs and the houses themselves Reiff's book will be indispensable to architectural historians architects preservationists and regional historians Realtors and homeowners will also find it of great interest A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design *Houses from Books* contains a wealth of photographs many by the author that enhance its importance as a history and guide

*Drawn to Design* Eric Jenkins, 2022-04-19 The book is a guide for students and teachers to understand the need for the role of and the methods and techniques of freehand analytical sketching in architecture The presentation focuses on drawing as an approach to and phase of architectural design The conceptual goal of this approach is to use drawing not as illustration or depiction but as exploration The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies The main component is a series of chapters that constitute a typology of fundamental issues in architecture and urban design for instance issues of facade are illustrated with sketch diagrams that show how facades can be explored and sketched through a series of specific questions and step by step procedures In the expanded and updated edition a new part explores the questions and experiences of large architectural offices in applying freehand drawing in the practice of architectural design This book is especially timely in an age in which the false conflict between traditional vs digital gives way to multiple design tools including sketching It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing

*Architecture* Henry-Russell Hitchcock, 1987-01-01 This book examines a period which is far more than a prelude to the age of steel and concrete The first half century culminated in the bold iron and glass of the Crystal Palace There follows the creation of the modern styles of the era based on traditions of the past and finally in the 20th century Art Nouveau and the modern

architects in their generations Perret Wright Gropius Corbusier Mies van der Rohe and others in many parts of the world

*Envisioning Architecture* Iain Fraser, Rod Henmi, 1993-12-16 Examples of world renowned masters of architecture are used in this enlightening book that explores the why of architectural drawing rather than the how By emphasizing the value of drawing over technique the authors demonstrate how the drawing itself influences the designer's processes of thought and exerts its own pull on the evolution of the concept *Grey Room*, 2000 *Grey Room* is a scholarly journal devoted to the theorization of modern and contemporary architecture art and media Published quarterly it is dedicated to the task of promoting and sustaining critical investigation into each of these fields separately and into their mutual interactions
