previously unconsidered John Ruskin and the Fabric of Architecture examines the ways in which Ruskin perceives the evolution of architecture through the idea that architecture is surface The creative act in architecture analogous to the divine act of creation was viewed as a form of dressing By adding highly aesthetic features to designs taking inspiration from the veil of women's clothing Ruskin believed that buildings could be transformed into meaningful architecture This volume discusses the importance of Ruskin's surface theory and the myth of feminine architecture and additionally presents a competing theory of textile analogy in architecture based on morality and gender to counter Gottfried Semper's historicist perspective This book would be beneficial to students and academics of architectural history and theory gender studies and visual studies who wish to delve into Ruskin s theories and to further understand his capacity for thinking beyond the historical methods The book will also be of interest to architectural practitioners particularly Ruskin s theory of surface After Taste Kent Kleinman, 2012 After Taste Expanded Practices in Interior Design is an edited volume comprising texts interviews and portfolios that collectively document new theories and emerging critical practices in the field of interior design The material is informed by but not limited to the annual AfterTaste symposia hosted by Parsons The New School of Design The book's central argument is that the field of interior design is inadequately served by its historical reliance on taste making and taste makers and more recently from a set of theoretical concerns derived from architecture the volume seeks to set an expanded frame by advancing new voices and perspectives in both the theory and practice of interior design considered as an independent discipline In 2007 the Department of Architecture Interior Design and Lighting at Parsons The New School for Design inaugurated an annual international symposium series dedicated to the critical study of the interior Titled AfterTaste these yearly symposia offer expansive views of interior studies highlight emerging areas of research identify allied practices make public its under explored territory and attract future designers and scholars to the field Now in its fourth year AfterTaste has proven to be one of the very few venues internationally for critically exploring interior design The field of interior design is asymmetrically served by the current literature in the field Too frequently the current writing and making in interiors emphasize the ineffable the biographical and the social elite and promote a curiously unsubstantiated notion of connoisseurship as the principal basis for design Other attempts to construct an intellectual agenda for the study of the interior draw heavily from architectural theory ignoring the discipline s own specific and autonomous history AfterTaste the book is intended to adjust this imbalance by introducing interior design material that is theoretically and historically situated technically grounded demographically inclusive and aesthetically adventurous Companion to Roman Architecture Roger B. Ulrich, Caroline K. Quenemoen, 2013-10-10 A Companion to Roman Architecture presents a comprehensive review of the critical issues and approaches that have transformed scholarly understanding in recent decades in one easy to reference volume Offers a cross disciplinary approach to Roman architecture spanning technology history art politics and archaeology Brings together contributions by leading scholars in architectural history An

Marguardt, 2009-01-14 Medieval Art and Architecture after the Middle Ages explores the endurance of and nostalgia for medieval monuments through their reception in later periods specifically illuminating the myriad ways in which tangible and imaginary artifacts of the Middle Ages have served to articulate contemporary aspirations and anxieties The essays in this interdisciplinary collection examine the afterlife of medieval works through their preservation restoration appropriation and commodification in America Great Britain and across Europe from the sixteenth to the twentieth century From the evocation of metaphors and tropes to monumental projects of restoration and recreation medieval visual culture has had a tremendous purchase in the construction of political religious and cultural practices of the Modern era The authors assembled here engage a diverse spectrum of works from Irish ruins and a former Florentine prison to French churches and American department stores and an equally diverse array of media ranging from architecture and manuscripts to embroidery monumental sculpture and metalwork With applications not only to the study of art and architecture but also encompassing such varied fields as commerce city planning education literature collecting and exhibition design this copiously illustrated anthology comprises a significant contribution to the study of medieval art and medievalism **World Observation** Matthew Mullane, 2025-09-04 World Observation explores the archives and architecture of It Ch ta 1867 1954 the eminent architectural thinker of the Japanese empire who traveled across Asia Europe and North America to create the first world history of architecture in Japanese from a truly global set of encounters In his mission to integrate Japan into existing world histories legitimate Japanese colonial expansion and train observers to see the world in the way that he did It theorized new kinds of observation kansatsu in writing and drawing that strategically blended epistemological values from European science philosophy and anthropology with Japanese Buddhism folklore and naturalism World Observation presents close readings of It's writings sketches and designs to cast new light on a

key figure in the architectural history of Imperial Japan and situate his contributions within the sweep of global architectural history across the late nineteenth and early twentieth centuries John Ruskin Andrew Ballantyne, 2015-06-15 John Ruskin 1819 1900 was the most prominent art and architecture critic of his time Yet his reputation has been overshadowed by his personal life especially his failed marriage to Effie Gray which has cast him in the history books as little more than a Victorian prude In this book Andrew Ballantyne rescues Ruskin from the dustbin of history's trifles to reveal a deeply attuned thinker one whose copious writings had tremendous influence on all classes of society from roadmenders to royalty Ballantyne examines a crucial aspect of Ruskin's thinking the notion that art and architecture have moral value Telling the story of Ruskin's childhood and enduring devotion to his parents who fostered his career as a writer on art and architecture he explores the circumstances that led to Ruskin's greatest works such as Modern Painters The Seven Lamps of Architecture The Stones of Venice and Unto This Last He follows Ruskin through his altruistic ventures with the urban poor to whom he taught drawing motivated by a profound conviction that art held the key to living a worthwhile life Ultimately Ballantyne weaves Ruskin's story into a larger one about Victorian society a time when the first great industrial cities took shape and when art could finally reach beyond the wealthy elite and touch the lives of everyday people **Structures and Architecture** Paulo J. Cruz, 2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persua Architecture and the Historical Imagination Martin Bressani, 2016-04-15 Hailed as one of the key theoreticians of modernism Eug ne Emmanuel Viollet le Duc was also the most renowned restoration architect of his age a celebrated medieval archaeologist and a fervent champion of Gothic revivalism He published some of the most influential texts in the history of modern architecture such as the Dictionnaire raisonn de l architecture fran aise du XIe au XVIe si cle and Entretiens sur l architecture but also studies on warfare geology and racial history Martin Bressani expertly traces Viollet le Duc s complex intellectual development mapping the attitudes he adopted toward the past showing how restoration in all its layered meaning shaped his outlook Through his life journey we follow the route by which the technological subject was born out of nineteenth century historicism Structures and Architecture - Bridging the Gap and Crossing **Borders** Paulo J.S.
